HER EXCELLENCY
MRS. JOYCE BANDA
PRESIDENT OF THE REPUBLIC OF MALAWI

PRESIDENTIAL STATEMENT

When the MGDS was being conceptualized, the country was perpetually food insecure and growth was dismal. It was envisioned that the country could be food secure, with rapid economic growth and reliable infrastructure, given its potential. With the implementation of the MGDS, 2006-2011, the country has become food self sufficient and has been able to realize food surpluses. During the same period, the economy grew at an average of 7.5 percent against the projected target of six percent. Furthermore, there has been a number of infrastructure development projects across the country.

It is my strong wish and the wish of all Malawians that the gains achieved during MGDS be sustained and accelerated as we implement the Malawi Growth and Development Strategy II (MGDS II). In this respect, the objective of MGDS II will remain wealth creation and reduction of poverty through sustainable economic growth and infrastructure development. It is my expectation that the implementation of MGDS II will accelerate the transformation of the country from being a predominantly importing and consuming economy to a predominantly producing and exporting economy.

Considering the phenomenal growth and development the country has achieved during the MGDS implementation, this strategy will continue focusing on the nine priorities within priorities. The priorities are: Agriculture and Food Security; Energy, Industrial Development, Mining and Tourism; Transport Infrastructure and Nsanje World Inland Port; Education, Science and Technology; Public Health, Sanitation, Malaria and HIV and AIDS Management; Integrated Rural Development; Green Belt Irrigation and Water Development; Child Development, Youth Development and Empowerment; and Climate Change, Natural Resources and Environmental Management. These Key Priority Areas will also accelerate the attainment of the MDGs.

Government will lead the implementation of this strategy and will continue to create an enabling environment for the participation of all stakeholders including the private sector. I, therefore, urge all stakeholders to actively participate and align their plans and programmes to the MGDS II.

It is my sincere hope that the cooperation that prevailed during the preparation of the MGDS II will continue during the implementation period for the wellbeing of mother Malawi. May God bless our country.

Mrs. Joyce Banda

PRESIDENT OF THE REPUBLIC OF MALAWI

FOREWORD

The Malawi Growth and Development Strategy II (MGDS II) is the second medium term national development strategy formulated to attain the country's long term development aspirations. It represents a decisive and strategic single reference document to be followed by all stakeholders to achieve the goal of wealth creation through sustainable economic growth and infrastructure development.

The fundamentals of the MGDS II are based on the nation's development aspirations and builds on the gains, lessons and best practices achieved during the implementation of the predecessor strategy.

Just like its predecessor, MGDS II is built on thematic areas from which priorities within priorities are derived. Whereas MGDS had five themes, MGDS II is based on six thematic areas. These are: Sustainable Economic Growth; Social Development; Social Support and Disaster Risk Management; Infrastructure Development; Governance; and Gender and Capacity Development as an additional theme. From these themes, the MGDS II derives nine key priority areas which are central to the achievement of sustainable economic growth and wealth creation. These key priority areas are: Agriculture and Food Security; Energy, Industrial Development, Mining and Tourism; Transport Infrastructure; Education Science and Technology; Public Health, Sanitation, Malaria and HIV and AIDS Management; Integrated Rural Development; Green Belt Irrigation and Water Development; Child Development, Youth Development and Empowerment; and Climate Change, Natural Resources and Environmental Management.

This strategy including its themes and key priority areas have been thoroughly discussed and agreed upon by all stakeholders including the United Nations Country Team, the IMF, World Bank and the European Union. I am confident that the same commitment that prevailed during the formulation process of this strategy will continue during its implementation. While the major implementation tool of this strategy is the National Budget, all stakeholders will be expected to complement by aligning their programmes and activities to the MGDS II.

EXECUTIVE SUMMARY

Introduction and Background

The Malawi Growth and Development Strategy II (MGDS II) is the overarching medium term strategy for Malawi designed to attain Malawi's long term development aspirations. The strategy covers a period of five years, from 2011 to 2016. It follows the successful implementation of the country's medium term strategy, the Malawi Growth and Development Strategy (MGDS) between 2006 and 2011. The objective of MGDS II is to continue reducing poverty through sustainable economic growth and infrastructure development.

The MGDS II identifies six broad thematic areas, namely; Sustainable Economic Growth; Social Development; Social Support and Disaster Risk Management; Infrastructure Development; Governance; and Gender and Capacity Development. Within these six thematic areas, the MGDS II isolates nine key priority areas (KPAs), namely; Agriculture and Food Security; Transport Infrastructure; Energy, Industrial Development, Mining and Tourism; Education, Science and Technology; Public Health, Sanitation, Malaria and HIV and AIDS Management; Integrated Rural Development; Green Belt Irrigation and Water Development; Child Development, Youth Development and Empowerment; and Climate Change, Natural Resources and Environmental Management. The selection of the key priority areas is meant to sustain and accelerate economic growth within the available resources.

Through the nine priorities within priorities and the thematic areas, the MGDS II maintains a balance among economic, social and environmental components of the economy. This will in turn reduce poverty and bring about prosperity in the medium term while accelerating attainment of the Millennium Development Goals (MDGs).

Just like its predecessor, the process of developing MGDS II was highly participatory and consultative involving the Executive, through Central Government Ministries and Departments and local authorities across the country; the Legislature; Civil Society Organizations; Donors and Cooperating Partners; Non-Governmental Organizations; Private Sector; the Academia; Youth; Children; Women Groups; Faith Based Organizations and the general public.

Macroeconomic Framework

Successful implementation of MGDS II will largely depend on sound macroeconomic management and a stable political environment. This is necessary to attract investment and mobilize resources with which to finance the budget.

The total revenue and grants are programmed to average 26.8 percent of Gross Domestic Product (GDP) during the implementation period. Total revenue is expected to average 21.1 percent of the GDP. The total government expenditure is expected to average 26.4 percent of GDP. Government will increase its capital expenditure during the period of MGDS II. The overall fiscal balance is expected to average 0.4 percent of the GDP. The MGDS II budget framework will be geared towards creating an enabling environment for private sector development and improving economic infrastructure such as energy, road networks, water systems and telecommunication.

MGDS II Thematic Areas

The MGDS II identifies six broad based thematic areas, namely; Sustainable Economic Growth; Social

Development; Social Support and Disaster Risk Management; Infrastructure Development; Governance; and Gender and Capacity Development.

Theme 1: Sustainable Economic Growth

Sustainable economic growth is key to poverty reduction and improvement in the living standards of Malawians. Over the past five years, Malawi registered progress in a number of areas including high economic growth, declining poverty levels, strong donor support, increased foreign direct investment and transformation in infrastructure. The country, however, faces a number of challenges such as inadequate energy generation and supply, narrow export base, climate change, environmental degradation, and unemployment. In order to address these challenges, the Government through MGDS II will continue implementing interventions aimed at ensuring sustainable economic growth. Emphasis will be placed on maximizing the contribution of potential growth sectors such as agriculture, mining and tourism, while creating an enabling environment for private sector participation and development; fostering job creation; empowering rural communities; ensuring equitable access to land; and enhancing sustainable use of the environment. The sustainable economic growth thematic area has eight sub-themes namely: agriculture; natural resources and environmental management; mining; private sector development, industry and trade; rural development; tourism, wildlife and culture; labour and employment; and land. Within the sub-themes, focus will be placed on wildlife and culture, labour and employment, and land. Whilst, agriculture, mining, natural resources and environmental management, industry, trade, integrated rural development, and tourism have been isolated as key priority areas.

Wildlife: Wildlife is a valuable tourism resource as it can contribute significantly to income and employment. The sector, however, faces a number of challenges including poaching, poor supporting infrastructure, and low community participation in wildlife conservation. Government will continue to conserve and manage wildlife in both protected areas and natural habitats through, among other strategies, strengthening institutional capacity to manage protected areas and ecosystems.

Culture: Culture is an important element to support tourism development. However, the sub-sector is not well developed. It lacks purpose-built cultural infrastructures such as museums, arts centres and the national archives buildings. Government will, therefore, undertake a number of initiatives to promote Malawi's culture. In the medium term, it is expected that there will be improved preservation of Malawi's cultural heritage and values, and increased promotion and development of Malawi's culture.

Labour and Employment: A skilled and productive labour force contributes meaningfully to economic growth and improved living standards. As such, Government will implement the following strategies: promoting occupational safety and health, promoting skills development, testing and certification, and establishing an effective and efficient labour market information system.

Land: Land is a basic factor of production and an important source of livelihood. It is also a source of income, nation's wealth; and provides cultural identity and shelter. Government recognizes a number of challenges facing the sector, including: increased demand for land emanating from rapid population growth, high rate of urbanization and insufficient public awareness on land laws. Government therefore, will ensure that there is equitable access to land and tenure security; efficient management and administration system; and an ecologically balanced use of land and land-based resources.

Theme 2: Social Development

High rates of population growth have far reaching implications on the social and economic

development of a country. Consequently, provision of social services such as health and education in the country is greatly affected by the prevailing population dynamics. There are six sub-themes in this thematic area, namely: population; health; education; child development and protection; youth development and nutrition. From this theme, health, education, child development, and youth development have been isolated as key priority areas.

Nutrition: Government recognizes that malnutrition is a silent crisis. Many children especially in the rural areas are characterized by high levels of nutrition disorders such as stunting, wasting and underweight. A number of key strategies will be implemented to reduce the prevalence rate of nutrition disorders, including: promoting exclusive breastfeeding practices for children aged 0-6 months; preventing and controlling micronutrient deficiency disorders; and strengthening institutional and human capacities for the effective delivery of nutrition services.

Population: Population influences all aspects of socio-economic development. Government through this strategy will pursue policies aimed at managing population growth. To achieve this, a number of strategies will be implemented, including: enhancing the provision, access, delivery and utilization of Sexual and Reproductive Health (SRH) services; advocating girls' education and delayed marriage; promoting the small family concept; and strengthening migration and national vital registration systems.

Theme 3: Social Support and Disaster Risk Management

Despite the food surplus that the country enjoyed during the implementation of the previous strategy as well as the reduction in poverty levels and the impressive economic growth, there are sections of the population that experience extreme poverty and still require social support. In addition, the country has been experiencing natural disasters that have negatively affected national development and led to loss of lives. Drought has also led to food insecurity in some places requiring humanitarian assistance. Government will, therefore, continue to provide social support to the vulnerable and to strengthen disaster risk management.

Supporting the Vulnerable: Government will continue to refocus its attention on productivity enhancing interventions and provision of welfare support. Strategies to be implemented include enhancing and promoting predictable transfers to the most vulnerable and the ultra poor households, and promoting longer term skills oriented and asset enhancing interventions.

Disaster Risk Management: The magnitude, frequency and impact of disasters have been increasing, due to climate change, population growth and environmental degradation. In responding to these challenges, Government will implement a number of strategies, including strengthening Disaster Risk Management (DRM) coordination mechanisms, developing an integrated national Early Warning System (EWS), and implementing mitigation measures in disaster prone areas.

Theme 4: Infrastructure Development

Infrastructure is a key component for creating an enabling environment for private sector driven growth and provision of timely and quality social services. There are five sub themes under infrastructure development, namely: energy; transport; water development; information and communication; and housing and urban development. From this thematic area, energy, transport, and water development have been isolated as key priority areas. In addition to these key priority areas, Government will focus on the following:

Air Transport: Government recognizes the need to continuously improve air transport infrastructure and services to enhance trade, tourism and investment. In the medium term, a number of outcomes will be achieved, including improved air safety and management in line with international standards; improved regulatory and institutional framework, and improved security in airports.

Information and Communication: A well developed information and communication system is essential for the development of the country. In this respect, Government will continue to implement Information and Communication Technology (ICT) strategies that will facilitate E-services, increase public efficiency and grant citizen access to public services. This will entail among other things, developing a reliable, fast, adaptive and robust national ICT infrastructure that feeds into international networks; improving efficiency in delivering postal services; and developing public online services.

Media and Communication: Media and communication provide alternatives to the public to express their developmental aspirations and priorities, and in shaping the public perception on a variety of important issues. Government will ensure that the population has access to timely and relevant information, and that there is popular participation of citizens in development, governance and democratic processes. This will be achieved by implementing a number of strategies, including promoting screening of developmental video documentaries; promoting discussion forums on topical issues; and enhancing skills capacity of media personnel.

Housing and Urban Development: Adequate and quality housing is one of the key indicators of development as it relates to basic needs and is crucial in assessing living conditions of a population. Government will aim at increasing access to decent housing and create a sustainable, economically and socially integrated urbanizing system. The key strategies will include promoting Public and Private Partnerships (PPPs) in housing delivery; scaling up the provision of basic infrastructure and services particularly in informal settlements; promoting national housing financing mechanisms; and enforcing rules and regulations on land use and physical plans.

Theme 5: Governance

Good governance minimizes distortionary incentives and ensures equitable allocation and distribution of public resources. It enhances public security and safety, and guarantees property and personal rights, which in turn creates a conducive environment for private sector investment. Government recognizes that the successful implementation of its development strategy depends on the prevalence of good governance. Government will, therefore, among other things, continue to address issues related to access to economic opportunity, private sector participation, efficient stewardship of public resources, promotion of democratic governance institutions, and justice and the rule of law. Focus will be placed on four sub-themes, namely economic governance, corporate governance, democratic governance and public sector management.

Economic Governance: Government recognizes that a stable macroeconomic environment is vital for economic growth and is a catalyst for investment and industrial development. To consolidate the economic gains achieved in the last five years, the economic governance sub-theme will aim at sustaining economic growth within a stable macroeconomic environment. In the medium term, it is expected that there will be strong evidence-based planning and macroeconomic policy formulation; improved resource mobilization, allocation, and use of public resources; enhanced and diversified export base and improved access to financial services. Some of the key strategies that will be pursued include: harmonizing the national budget and priorities in the national development strategy; diversifying sources of government revenue; expanding and improving financial services to Micro, Small and Medium Enterprises (MSMEs); improving national procurement, audit and reporting

systems and improving legal and regulatory framework of the financial sector.

Corporate Governance: Government recognizes that good corporate governance is an important element in the creation of an enabling environment for rapid and sustainable private sector development. Thus, this strategy will pursue the goal of ensuring well regulated, transparent, accountable and efficient business systems. To achieve this, key strategies will include: improving and strengthening business regulatory framework; enhancing regulatory regime for parastatals; promoting the adoption of good corporate governance code of conduct; and promoting zero tolerance to corruption.

Democratic Governance: Broa based growth and improvement in the quality of life and social well being flourishes with good democratic governance. Government will therefore pursue strategies that will ensure the continuation of good democratic governance.

The Democratic Governance sub-theme will focus on justice and rule of law, human rights, elections, and peace and security. On justice and rule of law, Government aims at fostering independence and credibility of the judicial system; promoting supremacy and respect for the constitution and promoting a people-centred, accessible, affordable, and expeditious justice system, among other strategies. Whilst on human rights, the focus will be on the promotion and protection of rights and freedoms enshrined in the country's constitution. With regard to elections, Government will continue to promote free and fair elections by enhancing credibility and management of electoral process and ensuring independence of elections governing bodies. Government will also ensure that peace and security continues to prevail as a prerequisite for ensuring a conducive environment for business and economic activity.

Public Sector Management: Effective public sector management is necessary for efficient delivery of public goods and services. Government will therefore among other things, strive to achieve enhanced public service leadership; improved performance and service delivery in the public service; harmonized and evidence-based policies; and enhanced implementation of Public Sector Reform programmes.

Theme 6: Gender and Capacity Development

Gender, capacity development, research and development, Human Immunodeficiency Virus (HIV) and Acquired Immune Deficiency Syndrome (AIDS), nutrition, environment, climate change, population and science and technology are critical issues that cut across and impact on all sectors of the economy. This thematic area however, focuses on gender and capacity development.

Gender: In Malawi, evidence has shown that the Millennium Development Goals (MDGs) targets that are lagging behind have very pronounced gender connotations. Government will, therefore implement a number of strategies to reduce gender inequalities in the country. These strategies include: promoting women entrepreneurship and involvement in cooperatives; promoting equal access to appropriate technologies and micro-finance schemes; advocating for affirmative action to increase representation of women in politics and decision making positions; strengthening Gender Based Violence (GBV) service delivery systems; strengthening legal and regulatory framework; and mainstreaming gender at all levels.

Capacity Development: Government recognizes the need to develop capacity at all levels for successful implementation of its development programmes. Government will, therefore, reorient and expand existing investment in infrastructure and equipment. It will also provide a conducive environment for the development of skills and knowledge to respond to the needs of the economy. The key strategies include developing and strengthening human and institutional capacities, mainstreaming

capacity development in all sectors and promoting effective performance management systems.

MGDS II Key Priority Areas

The MGDS II has isolated nine key priority areas from the themes which are necessary to achieve rapid economic growth and improvement in the well-being of Malawians within the implementation period. The key priority areas are: Agriculture and Food Security; Energy, Industrial Development, Mining, and Tourism; Transport Infrastructure and Nsanje World Inland Port; Education, Science and Technology; Public Health, Sanitation, Malaria and HIV and AIDS Management; Integrated Rural Development; Green Belt Irrigation and Water Development; Child Development, Youth Development and Empowerment; and Climate Change, Natural Resources and Environmental Management.

1. Agriculture and Food Security

Agriculture is key to food security, economic growth and wealth creation. The sector, however, faces a number of challenges including over dependence on rain-fed farming, low absorption of improved technologies, weak private sector participation, and lack of investment in mechanization. To address these challenges, Government will aim at enhancing agricultural productivity, diversification and food security through, among others, the following strategies: enhancing provision of effective extension services; enhancement of livestock and fisheries productivity; promotion of diversification of agricultural production for domestic and export markets; promoting dietary diversification; improving the functioning of agricultural markets; increasing national food storage capacity; and reducing post harvest losses.

2. Energy, Industrial Development, Mining and Tourism

A well-developed and efficient energy system is vital for industrial, mining and tourism development. Government will therefore focus on increasing the generation, transmission and distribution of electricity and promote other energy sources with the aim of improving service delivery and increased output in the economy. To promote industrial development, Government will promote use of modern technology in manufacturing; facilitate accreditation of quality assurance institutions; undertake industrial reforms; promote product and market diversification; and promote value addition in existing and potential products. Government will also implement a number of strategies to promote mining and tourism sectors. These strategies include: enforcing legislations on sustainable use and management of mineral resources; promoting the development of high-quality tourism facilities in designated areas; providing infrastructure that is supportive to tourism and mining development; and promoting participation of both local and foreign investors in the tourism and mining industries.

3. Transport Infrastructure and Nsanje World Inland Port

Good transport infrastructure is a catalyst for development. Better domestic and regional connectivity demands improved road, water, rail and air transport. While continuing with the improvement of the road network, Government will focus on rail and water transport infrastructure including the Nsanje World Inland Port.

4. Education, Science and Technology

Rapid development in all sectors of the economy will require highly skilled and educated workforce, and the application of science and technology. To strengthen the education system and promote science, technology and innovation, Government will implement among others, the following strategies:

constructing additional school infrastructure; training and recruiting additional teaching staff; improving scientific and technological infrastructure for research and development and strengthening innovation regulatory framework; and promoting adoption, transfer and utilization of appropriate technologies.

5. Public Health, Sanitation, Malaria and HIV and AIDS Management

Government recognizes that a healthy population is necessary for sustainable economic growth and development. To ensure a healthy population, Government will among others, implement the following strategies: strengthening community health service delivery and health support systems; improving availability and access to maternal care services; strengthening initiatives for prevention, diagnosis and treatment of emerging non-communicable diseases; scaling up the delivery of Indoor Residual Spraying (IRS); and scaling up of Long Lasting Insecticide Nets (LLINs). Government will also improve water and sanitation infrastructure and undertake public awareness and education campaigns to address the challenges in the areas of sanitation and hygiene. On HIV and AIDS management, Government will promote HIV Testing and Counselling (HTC); promote Prevention of Mother-to-Child Transmission of HIV (PMTCT); promote advocacy and awareness campaigns and behavioural change at all levels; and offer effective HIV and AIDS education and life skills programmes in all primary and secondary schools.

6. Integrated Rural Development

The majority of Malawi's population live in rural areas. Thus, improvement of living standards for rural communities is critical to the development of the country. Government will use an Integrated Rural Development (IRD) approach to resuscitate rural economies and transform them into potential drivers of economic growth and development. IRD will set a platform for empowering rural people to exploit socioeconomic opportunities and tackle challenges for improving their livelihoods. To achieve this, Government will pursue a number of strategies, including: promoting the establishment of rural growth centres; providing basic amenities to the rural areas; promoting the establishment of satellite model villages; and promoting the rural electrification programme.

7. Green Belt Irrigation and Water Development

Malawi depends on rain-fed agriculture, although she is endowed with vast water resources. Government will continue to embark on the Green Belt Irrigation initiative to utilize water from lakes and perennial rivers to enhance the country's production of a variety of crops, livestock and fisheries. To achieve this, Government will pursue a number of initiatives, including the following: developing irrigation infrastructure; enhancing technical and administrative capacities in irrigated agriculture; rehabilitating irrigation schemes and dams; promoting research in irrigation technology; developing potential groundwater resources; establishing piped water systems; rehabilitating water facilities throughout the country; and promoting user friendly technologies for water resource conservation and utilization.

8. Child Development, Youth Development and Empowerment

Children and the youth constitute a significant proportion of the population of Malawi. It is, therefore, essential to invest in child development, youth development and empowerment. In the medium term, it is expected that there will be equitable access to quality child development services; and increased absorption of skills, technology and innovations by the youth. In this respect, strategies to be implemented include: promoting early childhood development and pre-primary education; protecting

children against abuse; eliminating harmful cultural practices; improving youth's technical, vocational, entrepreneurial and life skills; and improving youth's access to credit facilities for entrepreneurship.

9. Climate Change, Natural Resources and Environmental Management

Natural resources form a principal source of social well being and economic development in Malawi. However, these resources are under constant stress from climate change and unprecedented human, industrial and other developmental activities. To address this, Government will implement a number of strategies including: developing adaptation and mitigation measures to climate change related impacts; improving coordination of environment and natural resource programmes; promoting bio-diversity conservation programs; promoting development and implementation of Clean Development Mechanism (CDM) projects; promoting projects on waste management and air pollution and other environmentally friendly technologies and practices; and developing, conserving and protecting forest plantations and natural woodlands.

MGDS II Assumptions

The achievement of the above will be based on a number of assumptions such as the country sustains and accelerates real GDP growth rates; continues to enjoy political stability; provides conducive macroeconomic environment; increases diversification and value addition of export commodities; provides effective aid and debt management; ensures availability of adequate resources and capacity; sustains good governance; and guarantees continued political will.

Implementation Framework

The MGDS II was formulated through a participatory process involving all stakeholders. This strategy represents views and ideas of various stakeholders on the path of development the country should follow in the next five years, 2011-2016. Implementation of this strategy will involve all stakeholders and government will align the national budget to this strategy. Other stakeholders including donors and cooperating partners will also align their programmes and support to the MGDS II. Monitoring and evaluation will be done through Sector Working Groups to ensure that it is inclusive and participatory.

CHAPTER 1 INTRODUCTION

1.1 Overview

The Malawi Growth and Development Strategy II (MGDS II) is the overarching operational medium term strategy for Malawi for the next five years, 2011 to 2016. It is designed to attain the country's Vision 2020. The underlying philosophy of MGDS II is to continue creating wealth through sustainable economic growth and infrastructure development. It presents a policy framework that articulates issues related to both economic growth and social development. The MGDS II is meant to serve as a single reference document for policy makers in Government, the private sector, civil society, donors, the international community and co-operating partners on the country's socio-economic development priorities.

The MGDS II is framed on six broad thematic areas namely; sustainable economic growth; social development; social support and disaster risk management; infrastructure development; governance; and gender and capacity development. The strategy recognizes that issues of gender and capacity development are cross cutting and therefore have been addressed under a separate theme. To ascertain immediate economic benefits for the people of Malawi, the MGDS II will in the next five years focus on the following nine key priority areas: Agriculture and Food Security; Energy, Industrial Development, Mining and Tourism; Transport Infrastructure; Education, Science and Technology; Public Health, Sanitation, Malaria and HIV and AIDS Management; Integrated Rural Development; Green Belt Irrigation, and Water Development; Child Development, Youth Development and Empowerment; and Climate Change, Natural Resources and Environmental Management. Figure 1 is a schematic view of the relationship between themes and KPAs.

1.2 Main Assumptions of MGDS II

The MGDS II is premised on the following assumptions:

- The country sustains and accelerates real GDP growth rates to continue on its poverty reduction path;
- Prudence in management of fiscal and monetary policies;
- Continued political stability;
- Conducive macroeconomic environment;
- Increased diversification and value addition of export commodities to effectively drive export led growth;
- Effective aid management and further improvement in domestic debt management;
- Adequate resources and capacity to implement MGDS II activities;
- Good governance is entrenched and institutionalised to avoid wastage of scarce resources;
- Effective social protection programmes are designed to mitigate negative side effects of growth and development; and
- Continued political will.

1.3 MGDS II Outline

The MGDS II is organized as follows: Chapter 1 is an introduction and presents an overview and main assumptions of the strategy. Chapter 2 presents the background and outlines past development policies; Chapter 3 summarizes the macroeconomic environment and expenditure framework within which the MGDS II will be implemented. Chapter 4 presents in detail the thematic areas of the MGDS II while Chapter 5 presents the key priority areas. Finally, Chapter 6 presents the implementation, monitoring and evaluation framework.

CHAPTER 2 BACKGROUND

The MGDS II succeeds the MGDS (2006-2011) as an overarching operational medium term national development strategy, designed to attain the nation's Vision 2020. It is a product of a highly consultative process involving a broad range of stakeholders. It therefore, represents a consensus on how Malawi can further accelerate the attainment of its development objectives. The MGDS II also incorporates lessons learnt from the implementation of the MGDS and simultaneously addresses the MDGs.

The successful implementation of this strategy, therefore, requires commitment of all stakeholders. Government will spearhead the implementation of the MGDS II. However, all stakeholders including the private sector, civil society organizations, donors, cooperating development partners, and the general public have varying responsibilities in the implementation process to ensure the attainment of the set goals.

2.1 Overview of Development Policies

Since the launch of the Malawi Vision 2020 on 31st March, 1998 Government has implemented two medium term national development strategies: Malawi Poverty Reduction Strategy (MPRS) and MGDS. The MGDS II, therefore, becomes the third national development strategy. It translates the goals and objectives that emerged from a nation-wide consultation process as reflected in Vision 2020.

2.2 National Development Policies

2.2.1 Malawi Vision 2020

Vision 2020 is a policy framework that sets out a long-term development perspective for Malawi. It emphasizes long term strategic thinking, shared vision and visionary leadership, participation by the population, strategic management and national learning. The Vision 2020 states that "by the year 2020 Malawi as a God fearing nation, will be secure, democratically mature, environmentally sustainable, self-reliant with equal opportunities—and active participation by all, having social services, vibrant cultural and religious values and a technologically driven middle-income economy".

2.2.2 Malawi Poverty Reduction Strategy

In May 2002, Government launched the MPRS which presented a first attempt to translate long-term vision into medium term focused action plans. The MPRS became the overarching medium term strategy of the Government for reducing poverty in the country. The goal of the MPRS was to achieve "sustainable poverty reduction through empowerment of the poor".

The MPRS was built around four strategic pillars namely: sustainable pro-poor growth; human capital development; improving the quality of life of the most vulnerable; and good governance. In addition, it had four key cross cutting issues namely: HIV and AIDS, gender, environment, science and technology. The implementation period for the MPRS was three years ending in the 2004/05 fiscal year.

In the second half of 2005, the MPRS was reviewed to draw lessons from its implementation. The lessons are summarized in the report "Comprehensive Review of the MPRS 2005" and the findings

informed the strategic direction of the MGDS. The notable achievement of the MPRS was the decline in poverty levels from 54.1 percent to 52.4 percent. Also important was the fact that Ministries and Departments implemented their activities in line with the MPRS framework. However, there were some short falls that hampered the implementation process. These included failure by Ministries and Departments to translate the activities into the budget and Medium Term Expenditure Framework (MTEF), slow implementation of the devolution process, and funding not based on priorities defined by MPRS.

2.2.3 Malawi Growth and Development Strategy

Government launched the MGDS in 2007. It was designed as an overarching operational medium-term strategy for Malawi to attain the nation's Vision 2020 and the MDGs for the period 2006 to 2011. The main aim of the MGDS was to create wealth through sustainable economic growth and infrastructure development as a means of achieving poverty reduction. It presented a policy framework that balanced issues related to both economic growth and social development.

To ascertain immediate economic benefits for the people of Malawi, the MGDS focused on the following six key priority areas: Agriculture and Food Security; Irrigation and Water Development; Transport Infrastructure Development; Energy Generation and Supply; Integrated Rural Development; and Prevention and Management of Nutrition Disorders, HIV and AIDS. These key priority areas were also expected to accelerate the attainment of the MDGs in the areas of health, education, gender, environment, and governance. They were isolated from the MGDS five thematic areas namely; sustainable economic growth; social protection and disaster risk management; social development; infrastructure development and improving governance. The MGDS recognized that issues of HIV and AIDS, science and technology, gender, empowerment and environment were cross cutting and as such they were streamlined within the five thematic areas.

Annual reviews were conducted throughout the period of MGDS to draw lessons from its implementation. These lessons, among other things, informed the strategic direction of the MGDS II.

2.2.4 International Development Commitments

The MGDS II recognizes Government's commitment to several global agreements and declarations including the MDGs, and the Plan of Implementation of the World Summit on Sustainable Development. Government through the MGDS II is committed to the MDGs as internationally agreed targets for eradicating extreme poverty and hunger; achieving universal primary education; promoting gender equality and empowering women; reducing child mortality; improving maternal health; combating HIV and AIDS, malaria and other diseases; ensuring environment sustainability; and developing global partnership for development. The country has made progress on all its targets and is on track to attain five of the eight MDGs targets by the year 2015.

On eradicating extreme poverty and hunger, the poverty headcount has declined from 50 percent in 2005 to 39 percent in 2010 while the proportion of population below minimum level of dietary energy requirement has decreased from about 22 percent in 2005 to 15 percent in 2009. Under universal primary education, there has been an increase in primary school net enrolment from 73 percent in 2006 to 83 percent in 2009 while youth literacy rate has increased from 74.9 percent in 2005 to about 84 percent in 2009. Progress has also been made on gender equality and empowerment of women. The ratio of girls to boys in primary school has increased from 0.95 in 2005 to 1.03 in 2009. The proportion of seats held by women in Parliament has significantly improved from 14 percent in 2004 to 22 percent in 2009 (Malawi MDG Report, 2010).

In addition, progress has also been made on reducing child mortality and improving maternal health. Infant mortality rate has declined from 76 deaths per 1,000 live births in 2004 to 66 per 1,000 live births in 2010, while under-five mortality rate has declined from 133 deaths per 1,000 live births in 2004 to 112 deaths per 1,000 live births in 2010. Maternal mortality rate has declined from 984 births per 100,000 live births in 2004 to 675 births per 100,000 live births in 2010. The HIV prevalence rate among pregnant women aged 15 to 24 years has declined from about 14.3 percent in 2005 to 12 percent in 2009, while deaths associated with tuberculosis cases has declined from 19 percent in 2005 to 8 percent in 2009 (DHS Report, 2010).

Although progress has been made in all the goals, Malawi is still lagging behind in achieving targets in three goals, namely; improve maternal health, achieve universal primary education and promote gender equality and women empowerment. In this respect, efforts will be made to achieve all the MDG targets during the implementation of this strategy.

2.3 Situation Analysis

The economy of Malawi is dependent on agriculture. The sector remains the country's main foreign exchange earner with tobacco, sugar, tea, coffee and cotton as major export products followed by manufacturing and tourism. The country's dependence on this sector renders its economy vulnerable to shocks hence the need to diversify. In recent years, efforts have been made to diversify the economy to other sectors such as mining, tourism and service. Consequently, the contribution of other sectors including mining to GDP has increased over the years with agriculture declining from about 38 percent in 1994 to about 27 percent in 2010.

Prior to MGDS implementation (2002 to 2005), GDP growth rate averaged 3.5 percent against the target of 5.2 percent. On the other hand, during the implementation period of the MGDS (2006 to 2011), the economy performed remarkably well, with an average real GDP growth rate of 7.5 per cent compared to a target of 6 percent. During the same period, inflation rate declined to single digit levels, and bank lending rate also declined.

Over the past years, there has been significant reduction in the number of people living in poverty from 52 percent in 2004 to 39 percent in 2010. In addition the country has seen significant improvement in infrastructure development in the transport, health and education sectors. Consequently, there has been an increase in the provision of and access to social services. The proportion of the population with access to safe potable water and basic sanitation increased from 73 percent and 84 percent in 2005 to 80 and 93 percent, respectively, in 2010. HIV prevalence declined from 14 percent in 2005 to 12 percent in 2010. In the health sector, birth attended by skilled personnel increased from 38 percent in 2005 to 58 percent in 2010 and maternal mortality and infant mortality declined from 984 per 100,000 live births and 76 per 1,000 births to 675 deaths and 72 deaths, respectively during the same period. Life expectancy also increased from 40 years in 2005 to 49 years in 2010 (DHS, 2010).

Although Malawi has improved the welfare of its citizens, the country still faces a number of challenges including: insufficient energy generation and supply; high transportation costs; inadequate skilled human resource; inadequate financial resources; narrow export base; inadequate diversification; high illiteracy levels; high population growth; over dependence on rain-fed agriculture and HIV and AIDS pandemic.

In addition, Malawi has challenges to meet some of the MDGs namely: improving maternal health, achieving universal primary education and promoting gender equality and empowering women. The

themes and key priority areas in this strategy, therefore, aim to address the above challenges while consolidating the achievements attained during the MGDS implementation.

2.4 Overview of MGDS Implementation

The MGDS has generally been effective as an instrument of achieving the country's developmental goals. Having experienced stagnant and at times negative growth spanning over 15 years prior to the implementation of the MGDS, poverty had increased significantly; incomes dwindled; and the livelihoods of the majority of Malawians adversely impacted upon. The introduction of MGDS has reversed some of these challenges. Although still not sufficient, Malawi has begun to record positive economic growth as well as impressive results on many MDGs indicators.

2.4.1 Aid Effectiveness

At the start of the MGDS, Malawi received significant debt cancellations under the Heavily Indebted Poor Countries (HIPC) Initiative and the Multilateral Debt Relief Initiative (MDRI) in 2006 when the outstanding external debt stock was reduced from US\$2.97 billion as of end 2005 to US\$0.52 billion in August 2006. This debt relief led to increased fiscal space arising from the debt service savings, thus permitting increased Government spending on priority areas. The debt relief led to improved debt indicators thereby increasing the scope for the Government to acquire more external aid in the form of concessional loans.

Aid disbursement remained stable over the last three fiscal years of MGDS implementation, 2007/08 to 2009/10. Traditional donors continued to provide the majority of the aid support with EU contributing the largest disbursements in 2009/10 Fiscal Year (FY) followed by World Bank and DfID. Other key donors were USAID, Norway and AfDB. During the same period, new donors like the Peoples Republic of China and the Republic of India began to play an increasingly important role. However, aid has been concentrated in a small number of sectors with Economic Governance being the largest recipient sector of overall donor support followed by Health; Agriculture; Education; and Water and Sanitation in that order in 2009/10 Fiscal Year. In contrast, the 5 smallest recipient sectors were Public Administration; Tourism, Wildlife and Culture; Energy and Mining; Gender, Youth Development and Sports; and Trade, Industry and Private Sector Development.

During the same period, aid predictability was high but undermined by a couple of key donors with aid disbursement modalities shifting from Pooled Sector Support to General Budget Support. Budget Support increased to 30 percent in 2009/10 FY from 21 percent in 2008/09 FY of total donor receipts by Government while Pooled Sector Support declined from 24 percent in 2008/09 FY to 17 percent in 2009/10 FY.

In this regard, Government will assume that external resources will be forthcoming to support the MGDS II activities following international commitments made by the G8 Nations at the Gleneagles Summit in 2005 as well as similar commitments by both bilateral and multilateral donors.

2.4.2 Macroeconomic Performance

MGDS projected a 6 percent annual GDP growth rate as the level at which meaningful poverty reduction would be achieved. The economy performed well as GDP growth rate averaged 7.5 percent at the end of the five year period. The above average growth rate emanated from good performance in strategic sectors such as agriculture, construction, mining and services. During MGDS implementation, domestic resource mobilisation increased as a share of GDP from 17.5 percent of

GDP in 2006 to 22.6 percent of GDP in 2010 while expenditure averaged 35 percent of GDP. Expenditures throughout the period were within their MGDS target of 39 percent of GDP. Consequently, fiscal balances significantly improved to -2.9 percent of GDP.

Within the same period, monetary policy was geared towards achieving price stability whilst providing sufficient room for private sector activity. Reserve money continued to be the nominal anchor for prices and money supply and its growth was programmed to expand at about the pace of nominal GDP to contain inflationary pressures and manage domestic demand. Subsequently, inflation declined from 10.1 percent in December 2006 to 6.3 percent in December 2010.

2.4.3 Sector Performance

Agriculture: The country's introduction of the Farm Input Subsidy Programme (FISP) to smallholder farmers in the year 2005/06 has demonstrated the importance and value of investing in food crops as a step towards sustained economic growth and poverty reduction. The 2010 MDG Report attributed the country's sharp decline in poverty levels between 2005 and 2010 to FISP. Welfare Monitoring Survey reports indicate that the number of Malawians at risk of hunger has been decreasing overtime due to FISP. In the period before 2005 about 5 million Malawians were at risk of hunger. This reduced to about 500,000 in year 2008. Furthermore, maize production increased from 1.22 million metric tons in 2005 to 3.4 million metric tons in 2010 (Economic Report, 2011).

Energy: During the implementation of MGDS, the sector registered a number of achievements including establishment of the Malawi Energy Regulatory Authority (MERA) in 2007; rehabilitation of Tedzani I & II in which 40MW of installed capacity was restored. In addition, there has been an increase in the percentage of households with access to electricity from 4 in 2005 to 9 in 2010. This is partly due to successful implementation of rural electrification program which has increased the number of trading centres connected to electricity from 45 in 2005 to 182 in 2010. Furthermore, there has been a decline in the proportion of population using solid fuels from 94.8 percent in 2005 to 78 percent in 2010.

Education: Government implemented a number of programmes in the education sector leading to the following achievements: primary school net enrolment increased from 73 percent in 2006 to 83 percent in 2009. The proportion of pupils starting grade one who reach grade five increased from 69 percent in 2000 to 76 percent in 2008 (UNDP, 2010). Completion rate in primary school has improved from 26.8 percent in 2005 to 53 percent in 2008. Primary school dropout rate has declined from 22 percent in 2005 to 5 percent in 2008.

Health: The sector registered a number of achievements including reduction in infant mortality rate from 76 per 1,000 in 2004 to 66 per 1,000 in 2010; reduction in under-five mortality rate from 133 per 1,000 in 2004 to 112 per 1,000 in 2010; reduction in maternal mortality rate from 984 per 100,000 in 2004 to 675 per 100,000 in 2010; reduction in the prevalence of HIV among 15-24 year old pregnant women attending antenatal care from 14 percent in 2004 to 12 percent in 2009; reduction in malaria inpatient case fatality rate from 7 percent in 2004 to 3.2 percent in 2010 and increase in proportion of births attended by skilled health personnel from 38 percent in 2004 to 75 percent in 2009 (DHS, 2010).

Nutrition: A number of interventions were implemented to improve nutrition. The interventions include school health and nutrition programmes; vitamin A supplementations; and nutrition support programmes. These interventions have resulted in improvement of nutrition indicators. For instance, the percentage of underweight children decreased from 22 percent in 2004 to 13 percent in 2010 (DHS, 2010).

_

¹ WMS reports (2007-2009)

Mining: During the implementation of MGDS, contribution of mining to GDP rose from 3 percent in 2005 to 10.8 percent in 2010 partly attributed to the Kayelekera Uranium Mine (Annual Economic Report, 2010).

Transport: The transport sector carried out a number of interventions aimed at improving the quality of infrastructure. Some of the recent achievements include an increase in paved road network from 3,663 km in 2004 to 4,073 km in 2010; 215 km of the paved road network rehabilitated out of the 293 km during the same period (RA, 2011). The preparation of the Transport Sector Investment Plan (TSIP) will bring about coordinated and competitive development of all transport modes and enhancement of intermodal transport along the corridors. In addition, in the roads subsector Government has adopted the Road Sector Programme (RSP) to guide both the medium and long term investment programmes in the subsector.

Water Development: The sector made notable achievements and these include increased adoption of improved irrigation technologies, construction of dams, rehabilitation of irrigation schemes and promotion of Water and Sanitation Hygiene (WASH). The country's proportion of the population with access to basic sanitation increased from 84 percent in 2005 to 93 percent in 2009. There was an increased percentage of the population with access to safe potable water from 73 percent in 2005 to 84 percent in 2009 (WMS, 2009).

Natural Resources and Environmental Management: The sector registered remarkable progress in a number of areas including compliance with the Environmental Management Plans (EMP) of development projects and programs; setting standards on pollution control and waste management; increased public awareness on environment and natural resources management; increased land area under industrial plantations; improved protection of river catchment areas, increased land area under industrial plantations from 1609 ha in 2005 to 5784 ha in 2010; reduced tonnage of ozone depleting substances such as chlorofluorocarbons (CFC) from 5.9 tonnes in 2005 to almost zero in 2010; and increased customary land area planted with trees from 77,810 ha in 2005 with 194,524,672 trees to 187,791 ha with about 275 million trees planted in 2010 (Department of Forestry, 2010).

Tourism: To improve tourism, Government undertook a number of development projects that transformed the tourism landscape. These include construction of access roads to tourist sites in Mangochi; improvement of airports and airstrips and construction of Mpale Cultural Village. In addition, Government started constructing a 1500-seater International Conference Centre which is expected to boost the tourism potential of the country.

Private Sector Development, Industry and Trade: A number of reforms were undertaken including establishment of a commercial court and simplification of trade regime. These reforms coupled with macroeconomic and political stability led to attraction of Foreign Direct Investment (FDI). According to the Reserve Bank of Malawi, FDI in 2010 amounted to USD 9.2 million.

Science and Technology: During implementation of MGDS, Government carried out a number of reforms aimed at improving research and development and application of science and technology in the country. These reforms include establishment of the National Commission for Science and Technology as an apex body in all matters of research, science and technology; and review of the National Science, Technology and Innovation Policy; and development of the National Intellectual Property Policy.

Rural Development: On rural development, a number of interventions were made to assist rural communities. These include community development programmes; subsidized farm inputs; rural industrialization; public works programme; construction of school buildings, teacher's houses and

clinics; water supply schemes; and improvement of other rural social infrastructure.

Wildlife and Culture: The sector registered a number of achievements and these include improved quality and standards of tourism units; improved wildlife conservation; animal translocation and restocking; construction and rehabilitation of national monuments and other cultural infrastructure; and research on national heritage.

Land: Government implemented a number of initiatives including re-allocation of land to poor households largely through the Community Based Rural Land Development Project (CBRLDP) and introduction of land administration and management courses at tertiary level. The sector also embarked on design and implementation of a computerized title deed registration system.

Population: Under this sub-sector, there was an increased provision of sexual and reproductive health services which raised awareness and contributed to a high proportion of the population using contraceptives. During the same period there was an increase in primary school girls' completion rate. These contributed to a reduction in the fertility rate from 6.0 in 2005 to 5.7 in 2010 (DHS, 2005; 2010).

Child Development and Protection: A number of initiatives were implemented to address some of the challenges faced by children. Achievements include increased number of early child development centres from 5,945 in 2005 to 8,933 in 2010; increased primary school net enrolment; increased number of girls accessing primary level education thereby helping to achieve gender parity; and decreased infant mortality and child mortality rates. In addition, regulatory and policy framework for the protection of children has been put in place.

Youth Development and Empowerment: Achievements under this sub-sector include; increased access to capital through the establishment of the Youth Enterprise Development Fund; expansion of the university student intake; construction of secondary school boarding facilities for girls; improving access to sexual and reproductive health, HIV and AIDS services; and establishment of information centres.

Social Support and Disaster Risk Management: A number of initiatives were implemented aimed at fighting poverty. These resulted in the decline of poverty incidence from 52 percent in 2004 to 39 percent in 2009. This trend was accompanied by a reduction in ultra-poverty from 22 percent in 2005 to 15 percent in 2009. This achievement is largely attributed to agricultural farm inputs subsidy programme which on average benefited 1.3 million Malawians per year since 2005. In addition, Government implemented Targeted Support to School Meals; Public Works programme; Village Savings and Lending; and Microcredit programmes. Government also continued piloting the Social Cash Transfer (SCT) programme.

Information and Communication: A number of achievements were made including connection to the optic fibre cable resulting in improved delivery of telecommunication services; increased mobile phone coverage; increased provision of broadcasting services; increased postal and courier service and automation of some of Government's operations and services.

Housing and Urban Development: Achievements registered under this sub-sector include the following: maintained houses under government lease, constructed Government Offices; conducted quinquennial valuations and supplementary valuation rolls; decentralized the Rural Housing Programme; commenced a National Slum Upgrading Programme; and developed Guidelines on Safer House Construction. In addition, Malawi Housing Corporation (MHC) continued to construct houses.

Economic Governance: Malawi experienced a stable macroeconomic environment characterized by high GDP growth rate, low inflation rate, a stable exchange rate, and sustainable levels of both domestic and foreign debt. The challenge is therefore to sustain and accelerate the positive economic growth and continue with a stable macroeconomic environment.

Democratic Governance: The country experienced positive developments including successful presidential and parliamentary elections; a motivated civil service; a growing number of civil society and non-governmental organizations; and deepening constitutionalism. On justice and the rule of law a number of legal and policy reforms were carried out. These included legal and policy reforms, and the strengthening of some of the key institutions of governance that led to increased access to legal system.

Gender: Achievements made under gender sector include increased proportion of women in the National Assembly from 14 percent in 2004 to 22 percent in 2009; increased number of women in decision making positions in public service; establishment of victim support units; and achievement of gender parity at primary school level.

Capacity Development: Initiatives implemented in the public sector have had a number of positive results. These include an increased number of trained personnel in key sectors including health and education, institutional development of ministries, departments and organizations; establishment of Leadership Development Framework and implementation of the Public Sector reform program.

HIV and AIDS Management: Prevalence of HIV and AIDS among pregnant women within the age group of 15 to 24 years has declined from 15 percent in 2005 to 12 percent in 2009. Factors contributing to this positive development include increased awareness programmes in HIV prevention and behavioural change, increased access to a number of preventive interventions, increased access to HIV and AIDS Testing and Counselling (HTC) sites, and the PMTCT programme.

Challenges

Despite the achievements outlined above, the country still faces a number of challenges which MGDS II endeavours to address. The specific challenges are covered in the relevant sections of the strategy.

2.5 Lessons Learnt from Implementation of MGDS

The following lessons from MGDS will strengthen the implementation of MGDS II:

- Successful implementation of any national development strategy requires commitment from all stakeholders:
- A strong indicator framework is critical for measuring progress towards defined goals, outcomes and targets;
- Availability of data is crucial for monitoring progress of MGDS implementation;
- Strengthened human and financial capacity is crucial for successful implementation of the MGDS:
- Alignment of the national budget and sector strategies to the national development strategy; and
- Alignment of donor support to the national development strategy.

2.6 The MGDS II Formulation Process

Stakeholders Consultations: Just like its predecessor, the MGDS II is a product of a highly consultative and participatory process that identified specific themes and confirmed strategies to be

employed. It is also acknowledged that successful implementation of the MGDS II requires commitment from all stakeholders including the public and private sectors, civil society organizations (CSOs), development partners, the international community, donors and the general public.

To facilitate the formulation, Government established structures to guide and oversee the process. These structures include a ministerial committee to provide political guidance; a steering committee to provide policy guidance; and a core drafting team to provide technical expertise to the process. A number of consultative meetings and workshops were held with all stakeholders to seek their input in the strategy. The consultative meetings and workshops targeted all district councils, Government Ministries and Departments, civil society organizations and non-governmental organizations, the private sector, development partners, the academia, the youth, children and chairpersons and vice-chairpersons of parliamentary committees, and all the sixteen Sector Working Groups (SWGs).

The MGDS II, therefore, represents the aspirations of all Malawians. However, it should be clear to all stakeholders that the real challenges lie in realizing MGDS II objectives and targets. Unless the strategies contained in this document are implemented, the country's efforts in realizing its vision will have been wasted. Government is committed to ensuring the implementation of the MGDS II, using the Budget as the key tool and expects that all stakeholders will play their part in implementation as was the case at the formulation stage.

CHAPTER 3 MACROECONOMIC FRAMEWORK

3.1 Introduction

Malawi has since the year 2000 implemented two medium term national development strategies to address developmental challenges of the country. These strategies are the Malawi Poverty Reduction Strategy (MPRS) and the Malawi Growth and Development Strategy (MGDS) implemented from 2002 to 2005 and from 2006 to 2011, respectively. From 2011 to 2016, Malawi will implement the MGDS II. This chapter lays out the macroeconomic framework for the MGDS II. The projections are primarily based on output from a macroeconomic model for Malawi.

The overall goal of the MPRS was to achieve sustainable poverty reduction through empowerment of the poor. During the implementation of this strategy, Gross Domestic Product (GDP) growth averaged 3.5 percent against a target of 5.2 percent. The main thrust of the MGDS was to reduce poverty through sustained economic growth and infrastructure development. During the implementation of this strategy, GDP growth averaged 7.5 percent against a target of 6 percent. This high growth rate emanated from agriculture, distribution, construction, mining and services sectors. Table 3.1 below compares performance of the two strategies.

Table 3.1: Real GDP Growth and Inflation

	Target	Achievement
MPRS (2002-2005)		
Real GDP	5.2	3.5
Inflation (end period)	<10	16.9
MGDS (2006-2011)		
Real GDP	6	7.5
Inflation (end period)	<10	6.3 ³

During the MGDS implementation period, fiscal balances averaged -2.9 percent of GDP due to improved fiscal management. Domestic resource mobilisation as a share of GDP increased from 17.5 percent in 2006 to 22.6 percent in 2010. Expenditures throughout the implementation period averaged 35 percent of GDP, thus staying within the target of 39 percent of GDP. In addition, Government's domestic debt dropped to 16 percent of GDP from 25 percent of GDP registered at the beginning of MGDS.

Over the same period, monetary policy was geared towards achieving price stability whilst providing sufficient room for private sector activity. Reserve money continued to be the nominal anchor for prices, and money supply growth was programmed to expand at the same pace of nominal GDP growth in order to contain inflationary pressures and manage domestic demand. Consequently, inflation eased significantly from 10.1 percent in December 2006 to 6.3 percent in December 2010.

² MalawiMod is the macroeconomic model for Malawi used for the projections and is implemented by EP&D

³ Actual inflation achievement at December, 2010

Monetary policy was largely accommodative to stimulate demand hence the bank rate was adjusted downwards by 2.0 percentage points in August 2010 from 15.0 percent to 13.0 percent.

3.2 Medium Term Macroeconomic Prospects

The medium term projections for MGDS II are aimed at consolidating the gains achieved during the implementation of the previous strategy. Government will continue to pursue sound economic policies geared at increasing and sustaining economic growth, maintaining inflation rate at single digit level, maintaining flexible exchange rate and improving foreign reserve position. During the implementation period of the MGDS II, the economy is expected to achieve an average real GDP growth rate of 7.2 percent. The following sections provide the macroeconomic assumptions and projections employed to drive the economy during the MGDS II implementation. Table 3.2 below shows a summary of projections for key selected indicators.

Table 3.2: Summary of Selected Indicators, 2011-2016

	2011	2012	2013	2014	2015	2016
OUTPUT AND PRICES (percentage growth)						
GDP at constant prices	6.9	7.1	7.4	7.3	7.4	7.3
GDP deflator	8.6	7.9	7.5	6.9	6.4	6.2
Inflation (annual average)	8.7	7.9	7.4	6.8	6.1	5.9
FISCAL OPERATIONS\1 (as percentage of GDP)						
Total revenue and grants	32.1	29.8	28.3	27.7	27.2	26.8
Tax and non-tax revenue	24.2	24.1	24.2	24.1	24.0	24.0
Grants	7.9	5.7	4.2	3.6	3.2	2.8
Total expenditure	31.9	29.2	26.8	25.8	25.0	24.3
Overall balance	0.2	0.6	1.5	1.9	2.2	2.5
EXTERNAL SECTOR (percentage of GDP)						
Exports of goods and services	22.8	23.2	23.7	24.1	24.6	25.0
Imports of goods and services	38.8	38.3	37.8	37.3	36.8	36.3
Current account balance	-18.8	-17.3	-15.7	-14.4	-13.0	-11.7
Overall balance	-7.8	-9.5	-10.0	-9.5	-8.8	-8.0

Source: Ministry of Economic Planning and Development, MalawiMod.

3.2.1 Output and Prices

The prospects for high growth in GDP are premised on the gains from MGDS and are projected to be largely driven by agriculture, mining, distribution, construction and services sectors. Consequently, private consumption is projected to increase by 6.7 percent due to improvements in real disposable income. Consumption in the smallholder sub-sector is expected to grow significantly by 5.0 percent annually over the MGDS II implementation period.

An increase in national investment will be a catalyst for the projected growth which in turn will create broad based employment. Investment will be built on foundations laid in the previous strategy with

^{\1} Fiscal numbers are reported on calendar basis.

emphasis in areas of infrastructure development, such as electricity generation and supply, transportation and irrigation.

During the MGDS II implementation period, average annual inflation is expected to decline from 8.7 percent to 5.9 percent. Despite the risk of an increase in international commodity prices, domestic prices will be suppressed due to availability of domestically produced food stuff on the market as a result of continued policy on farm input subsidy program.

3.2.2 Fiscal Operations

Fiscal policy in MGDS II will largely aim at restricting the growth of fiscal deficits. Government will endeavour to boost domestic resource mobilization, consequently reducing domestic borrowing. Increased public investment will be geared towards supporting export diversification and economic growth. Accordingly, during the implementation period, fiscal performance is expected to remain solid with overall fiscal balance for the period averaging a surplus of 1.5 percent of GDP.

Total revenue and grants are projected to average 28.7 percent of GDP against an average total expenditure projection of 27.2 percent of GDP. On the other hand, domestic resources are expected to average 24.1 percent of GDP.

Financing for MGDS II key priorities and themes will be through the national budget in the context of a three year Medium Term Expenditure Framework (MTEF). However, the budgetary resources fall short of the needs-based resource requirements for the country to achieve all its objectives. It is expected that the resource gap will be complemented by the private sector and other stakeholders. The budgetary allocation to the key priorities and themes are presented in Chapter 6 on the Implementation Framework while Annex 3 gives detailed needs-based resource requirement for MGDS II.

3.2.3 External Sector and Monetary Operations

During the MGDS II implementation period, the goal will be to improve the current account position. Emphasis will be to pursue an export led growth with major investments in agriculture, manufacturing, mining, and tourism sectors. Within the agricultural sector the objective will be to increase the country's market share in traditional agricultural products such as sugar, cotton, coffee and tea as well as diversifying away from tobacco into wheat, cassava, macadamia nuts, fruits, pulses and vegetables among others. This will also aim at increasing value addition on mining and tourism products.

Monetary policy will continue to gear towards achieving price stability but at the same time giving sufficient room for private sector activity. Resonating around the projected strong economic growth, broadly defined money supply is expected to grow at a pace consistent with nominal GDP in a bid to contain inflationary pressures. Domestic credit will be expected to pick up in the medium term to support private activities and investment. Foreign direct investment will also be encouraged in the mining, tourism and manufacturing sectors to boost investment in the country. Private sector credit is envisaged to remain strong. It is expected that private sector growth will take advantage of a conducive macroeconomic climate projected in the MGDS II period. Over the same period, the exchange rate will continue to be market determined.

3.3 Challenges and Risks

While the economy will be on a trajectory for growth over the period, there are several factors that may pose challenges and risks in attaining the growth rates projected in the strategy. Major risks include:

- (i) Unstable world economic output and commodity prices coupled with deteriorating terms of trade;
- (ii) Unpredictable and unreliable aid flows which can affect implementation of the fiscal policy; and
- (iii) Unfavorable weather conditions and natural calamities of disasters that can derail agricultural production in the country.

CHAPTER 4 THEMATIC AREAS

The MGDS II rests on six thematic areas that are covered in this chapter. These themes holistically address the need of the country to achieve sustainable socio-economic development, but also attain the MDGs. It is believed that effective implementation of the strategies therein will take the Malawi economy to a higher level of development. It is, however, recognized that the resource envelope to finance the requisite activities is limited and hence the need to prioritise. The priorities within priorities which this strategy has identified emanate from these six themes. The six themes are: Sustainable Economic Growth; Social Development; Social Support and Disaster Risk Management; Infrastructure Development; Governance; and Gender and Capacity Development.

THEME 1: SUSTAINABLE ECONOMIC GROWTH

Sustainable economic growth is key to poverty reduction and improvements in the living standards of Malawians. Over the past five years, Malawi's economic growth has continued to exceed expectations with an annual growth rate averaging 7.5 percent compared to the projected 6 percent. During the same period, poverty levels declined from 50 percent to 39 percent. This is attributed to sound macroeconomic policies and a stable political environment. During the implementation of MGDS, Malawi also experienced strong donor support, increased foreign direct investment and transformation in infrastructure, among other developments. However, the country still faces a number of challenges such as inadequate energy supply, narrow export base, climate change, environmental degradation, and unemployment.

To address these challenges, the Government through MGDS II will continue implementing interventions aimed at ensuring sustainable economic growth. These require action on multiple fronts to deliver on inclusive growth. In this respect, emphasis will be to maximize the contribution of potential growth sectors such as agriculture; mining; and tourism while creating an enabling environment for private sector participation and development; fostering job creation; empowering rural communities; ensuring equitable access to land; and promoting sustainable use of the environment. The Sustainable Economic Growth thematic area comprises eight sub-themes namely: agriculture; mining; natural resources and environmental management; industry, trade and private sector development; rural development; tourism; labour and employment; and land. Table 4.1 presents a summary of the long-term goals and medium-term expected outcomes of each of the sub-themes.

_

⁴ This figure 50 percent is for IHS(2005) while 39 percent is for WMS(2009).

Table 4.1: Sustainable Economic Growth Theme

Sub Theme	Goal	Medium-Term Outcomes	
1. Agriculture-refer to Key Priority Area (KPA) Chapter			
2. Natural Resources and I	Environmental Management		
2.1 Forestry	Enhance sustainable management of forest resources and their contribution to national economy.	 Increased forest cover; and Increased incomes from forestry products and services. 	
3. Mining- refer to KPA Chap			
4. Private Sector Development, Industry and Trade 5. Rural Development	Develop and promote a conducive environment that will enhance inclusive private sector growth and competitiveness.	 Improved environment for domestic and foreign investments created; Increased investments by both local and foreign entrepreneurs; and Improved productivity and market access of enterprises. 	
_			
5.1 Decentralization	Enhance decision-making and participation of local communities in development planning and implementation.	 Empowered local government structures; Enhanced participation and ownership of the development programmes by local communities; and Improved coordination at district level. 	
5.2 Rural Industrialization	Improve living standards of rural communities through enhanced rural industrialization.	 Enhanced product diversification; Reduced rural-urban migration; Reduced poverty among rural communities; and Increased employment for rural population. 	
6. Tourism, Wildlife and Cult		1 1 11110	
6.1 Wildlife	Conserve and manage wildlife in both protected areas and natural habitats.	 Improved wildlife management; and Improved institutional and regulatory framework. 	
6.2 Culture	Uphold and promote national heritage for identity, posterity and development.	 Improved preservation of Malawi's cultural heritage and values; and Increased promotion and development of Malawi's culture. 	
7. Labour and Employment	Stimulate and ensure productive and decent employment for better standards of living.	 Improved labour productivity; Increased gainful and decent employment for all; Strengthened legal, regulatory and institutional reforms; Eliminated worst forms of child labour; and Improved labour statistics. 	
8. Land	Ensure equitable access to land and tenure security; efficient management and administration system, and ecologically balanced use of land and land-based resources.	 Improved equitable access to land and tenure security; Improved land planning, ecologically balanced land use and management; and Improved provision of geospatial information. 	

Sub-Theme 1: Agriculture

The agriculture sector remains the main driver of economic growth in Malawi. It employs about 80 percent of the total workforce, contributes about 75 percent to foreign exchange earnings, and approximately 30 percent of gross domestic product (GDP). The sector contributes significantly to national and household food security. It is, therefore, evident that investing in agriculture will foster economic growth and development and assist in attaining the aspirations of Malawians as stipulated in the country's Vision 2020.

Recognizing the importance of the sector in fostering economic growth for the country, the Government of Malawi has been allocating substantial resources during the implementation of the MGDS as compared to the period prior to the MGDS. The average sector's budget has been around 16 percent of the national budget for the five years of the MGDS implementation as compared to an average of 6.1 percent during the period before the MGDS. Average per capita spending on agriculture rose significantly from US\$3.21 during the MPRSP period (2000-2005) to about US\$16.25 during the MGDS period (2006-2009). With the increased resources, the sector implemented a number of interventions in land resource conservation, research, extension, crops and livestock development and capacity building to improve productivity and enhance its contribution to the country's economic growth and contribute to the attainment of the MDGs of eradicating poverty and hunger by the year 2015.

The country's introduction of the FISP to smallholder farmers in the year 2005/06 has demonstrated the importance and value of investing in food crops as a step towards sustained economic growth and poverty reduction. In the last six years to 2010, increased food production has contributed substantially to reduction of poverty and eradication of hunger in the country. Welfare Monitoring Survey reports indicate that the number of Malawians at risk of hunger has been decreasing overtime due to FISP. In the period before 2005 about 5 million Malawians were at risk of hunger. This number dropped to about 500,000 in 2008. Furthermore, maize production increased from 1.22 million metric tons in 2005 to 3.4 million metric tons in 2010. This high production partly contributed to the sector's average growth of 6.4 percent per annum in recent years which is above the Comprehensive African Agriculture Development Programme's (CAADP) target of 6 percent. Government is therefore committed to enhance efficiency, effectiveness and sustainability in implementing FISP.

Although there has been an increase in maize production and productivity, the sector still faces a number of challenges including low productivity, over dependence on rain-fed farming, low level of irrigation, development, and low uptake of improved farm inputs. Furthermore, there are high transport costs, inadequate farmer organizations, insufficient extension services, inadequate markets and market information, limited access to agricultural credit, inefficient input and output markets and low technology development and transfer.

To attain the sector's objectives and consolidate its contribution to economic growth, the sector has embarked on a coordinated approach to the implementation of programmes as outlined in Agricultural Sector Wide Approach (ASWAp). Focus areas are food security and risk management, agri-business and market development and sustainable land and water management. Other key areas include technology generation and dissemination and institutional strengthening and capacity building.

Agriculture and food security is one of the Key Priority Areas and with details on goals, expected outcome and strategies in the next chapter.

Sub-Theme 2: Natural Resources and Environmental Management

Natural resources form a principal source of social well being and economic development in Malawi. However, these resources are under constant stress from unprecedented human, industrial and other developmental activities which if not curbed might generate irreversible outcomes in the long-term. The Malawi UNCA Report (2010) estimates that unsustainable natural resource use cost Malawi about US\$ 191 million, or 5.3 percent of GDP in 2010. These activities have resulted into a reduction in the proportion of land under forest cover from 41 percent in 1990 to 35 percent in 2008 (MDGs Annual Report, 2009). This is compounded by increased climate variations experienced in the form of prolonged dry spells, droughts, floods and temperature variability, which in turn have negatively affected the performance of sectors such as agriculture, natural resources, irrigation and water development, and energy.

During the past five years, the sector registered remarkable progress in a number of areas including compliance to the EMPs of development projects and programs; setting standards on pollution control and waste management; increased public awareness on environment and natural resources management; enhanced early warning; improved weather information systems; increased land area under industrial plantations from 1,609 ha in 2005 to 5,784 ha in 2010; and increased customary land area planted with trees from 77,810 ha in 2005 with 194,524,672 trees to 187,791 ha with about 275 million trees planted in 2010.

Despite the above achievements, the sector still faces a number of challenges which require immediate attention for the country to sustain the development achieved so far. Some of these challenges include climate variability, weak institutional capacity for managing climate change, inadequate mainstreaming of climate change issues; weak enforcement capacity of laws and regulations; accelerated deforestation and poor land use management practices.

In Malawi, forestry resources form a principal part of natural resources and contribute significantly to the socioeconomic development of the country. They provide forest goods and services such as catchment conservation, employment, industrial poles, timber for construction, fruits, mushroom and grass for thatching houses, medicine and herbs among others.

In view of this, Government through MGDS II will implement a number of interventions in the forestry subsector to sustain the country's development. Climate change, natural resources and environmental management are a key priority area with details in the next chapter. The following are the goal, expected outcomes and key strategies for the forestry sub-sector.

Goal

The goal is to enhance sustainable management of forest resources and their contribution to national economy.

Medium-Term Expected Outcomes

- Increased forest cover; and
- Increased incomes from forestry products and services.

Key Strategies

The main strategies will include:

- Developing, conserving and protecting forest plantations, customary estates and natural woodlands;
- Strengthening institutional capacity of the sector;
- Improving forestry extension services, research, and information management;
- Enforcing and ensuring compliance with agreed national, regional, and international obligations and legislation; and
- Promoting large, medium and small scale forest enterprises.

Sub-Theme 3: Mining

Malawi has rich mineral resources that if sustainably exploited would significantly contribute towards economic growth and development. These resources include coal, uranium, gemstone, limestone, dimension stones, gypsum and rock aggregates. It is expected that exploration activities currently going on will also reveal a lot of other mineral deposits. For example, recent discoveries indicate that the country has substantial deposits of Niobium, uranium and Zircon at Kanyika in Mzimba.

Government recognises that development of the mining industry can significantly boost economic growth of the country through employment creation and generation of foreign exchange. During the implementation of MGDS, contribution of mining to GDP rose from 3 percent to 10 percent due to the opening of the Kayelekera Uranium Mine in 2009. The sector currently employs over 21,000 people. The overall value of all mineral exports improved from MK43 million in 2006 to over MK17.7 billion in 2010. This resulted in over MK2 billion in revenue generated by government in 2010. The sector increased its ability to supply mineral raw materials to industries by developing capacity of both small scale and large scale miners.

However, the sector faces numerous challenges including inadequate institutional capacity, outdated policies, low investment and non existence of a corporate entity to look at government and local Malawian shareholding in mining ventures. It is for this reason that Government, through the MGDS II will continue to create an enabling environment to attract more investments into the subsector. Mining is a key priority area with details on goal, outcome and strategies in the next chapter.

Sub-Theme 4: Private Sector Development, Industry and Trade

The private sector is the engine for economic growth and wealth creation. Government will continue to ensure creation of a conducive environment for private sector participation in industrial development and trade promotion. Increased industrial activities are critical for generating employment opportunities, expanded manufacturing base, enhancing value addition and diversifying exports. Besides enhancing foreign exchange earnings, trade promotion assists industries to benefit from economies of scale through expanded markets.

In the past five years, the country has undertaken a number of reforms including the establishment of a commercial court and simplification of trade regime. These reforms coupled with macroeconomic and political stability have led to an increase in Foreign Direct Investment (FDI).

Despite these achievements, the sector still faces a number of challenges including inadequate energy supply, weak institutional and regulatory framework, insufficient supportive infrastructure, narrow

export base, inability to meet standards, limited information about trade opportunities, high cost of doing business, limited value addition, and limited credit facilities.

Government, through MGDS II will continue implementing interventions in the sector. Trade and industrial development are key priority areas with details in the next chapter. The following are goal, expected outcomes and key strategies for private sector development.

Goal

The goal is to develop and promote a conducive environment that will enhance inclusive private sector growth and competitiveness.

Medium Term Expected Outcomes

- Improved environment for domestic and foreign investments created;
- Increased investments by both local and foreign entrepreneurs; and
- Improved productivity and market access of enterprises.

Key Strategies

The main strategies will include:

- Fostering pro-business legal and regulatory reforms;
- Providing supportive infrastructure and services for both start-ups and expanding enterprises;
- Promoting growth of local MSMEs;
- Promoting private sector investment in rural areas;
- Strengthening the capacity of private sector supporting institutions and PPPs;
- Enhancing dissemination of business information;
- Promoting adoption of modern and appropriate technologies;
- Establishing a national investment company; and
- Promoting and strengthening the development of cooperatives.

Sub-Theme 5: Rural Development

Malawi's population is primarily rural based. It is estimated that 84.7 percent of the country's population lives in rural areas and is involved in smallholder agriculture with limited access to basic needs such as health, education and transport infrastructure.

Government has prioritised decentralisation as a mechanism for improving rural livelihoods. The process provides people at district, and local levels with the ability to effectively plan and prioritise implementation of activities and democratically elect their local representatives. Furthermore, decentralization has offered a better mechanism for reducing bureaucracy; ensuring quality, timely and equitable provision of services; and enhancing transparency and accountability.

During the past five years efforts have been made to assist rural communities by implementing a number of programmes including community development programmes; FISP, rural industrialization with One Village One Product (OVOP) initiative as one of the major components; public works programme through which construction of some school buildings was carried out; construction of teacher's houses and clinics; provision of water supply schemes; and improvement of other rural social infrastructure.

However, there is a need to continue implementing programmes to improve livelihoods of the rural communities and generate sustainable long term economic growth. Emphasis will be on fostering participation, ownership, and empowerment of rural communities. In this respect Government through MGDS II will continue promoting decentralisation in the provision of services to rural communities. With decentralization at the core, an integrated approach to rural development will be pursued. Integrated Rural Development is thus one of the key priority areas to be covered in details in the next chapter. In this section, goal, expected outcomes and key strategies for decentralization and rural industrialization will be covered.

Decentralization

Decentralization is the process of devolving some of the government functions from central government (line ministries) to the local government (local authorities). With decentralization, implementation of programmes is improved since the local population is encouraged to actively participate at all levels of decision making. This in turn helps to promote transparency and accountability at the local level.

Goal

The goal is to enhance decision-making and participation of local communities in development planning and implementation.

Medium-Term Expected Outcomes

- Empowered local government structures;
- Enhanced participation and ownership of the development programmes by local communities; and
- Improved coordination at district level.

Key Strategies

The main strategies will include:

- Enhancing implementation of the decentralization process;
- Strengthening community participation in development;
- Strengthening coordination of local government systems;
- Institutionalising the policy and oversight functions of the sectors that have devolved functions to the councils:
- Promoting fiscal devolution and good financial management;
- Strengthening the M&E system; and
- Strengthening capacity of local government structures and stakeholders.

Rural industrialization

Most industries in Malawi are in urban areas due to lack of supportive infrastructure in rural areas. This has exacerbated rural unemployment, rural-urban migration, skewed development and poverty. Therefore, to foster balanced development, curb rural-urban migration and create employment for the rural population, government has been implementing rural industrialization.

Goal

The goal is to improve living standards of rural communities through enhanced rural industrialization.

Medium Term Expected Outcomes

- Enhanced product diversification;
- Reduced rural-urban migration; and
- Reduced poverty among rural communities.

Key Strategies

The main strategies will include:

- Promoting industrial projects in rural areas;
- Promoting equal access to credit;
- Strengthening and expanding OVOP initiatives in rural areas;
- Promoting development of supportive infrastructure; and
- Building capacity in product diversification, business management, and production processes.

Sub-Theme 6: Tourism, Wildlife and Culture

Tourism, wildlife and culture sector is one of the emerging sectors in Malawi with a potential to significantly contribute towards the country's socio-economic development. Overall, the sector estimates that the contribution of tourism to the economy has grown steadily over the years. The sector has the potential to generate revenue; create employment; and promote MSMEs, among others. In Malawi, the physical environment (including lakes, wildlife, and mountains) and culture are an integral part of the tourism industry as they are a source of tourist attraction and can positively contribute to ecotourism development of the country. Lake Malawi and the beautiful mountains throughout the country are major tourist attractions. Sustainable management of biodiversity, natural resources and preservation of cultural values alongside development of appropriate infrastructure have potential to boost the tourism industry.

The sector registered a number of achievements during implementation of MGDS. These include improved quality and standards of tourism units; improved wildlife conservation; construction and rehabilitation of national monuments and other cultural infrastructure; research on national heritage; and animal translocation and restocking. For example, through the restocking programme, the number of animals moved to various protected areas increased from about 100 in 2005 to 283 in 2010 (Department of National Parks and Wildlife).

Despite these achievements, the sector encountered a number of challenges such as inadequate supporting infrastructure; inadequate marketing of Malawi's tourism products and services; human-animal conflicts; inadequate conservation and awareness; and lack of purpose-built cultural infrastructure.

Therefore, Government through MGDS II will continue implementing interventions in this sub-sector. Tourism is one of the key priority areas with details in the next chapter. Following are goals, expected outcomes and key strategies for wildlife and culture.

Wildlife

Tourism in Malawi is overwhelmingly wildlife and nature. It generates foreign exchange and contributes to economic growth. However, wildlife faces a number of challenges including poaching, low populations of animals in some protected areas; poor supporting infrastructure; low community participation in wildlife conservation; and insufficient institutional capacity.

Goal

The goal is to conserve and manage wildlife in both protected areas and natural habitats.

Medium-Term Expected Outcomes

- Improved wildlife management; and
- Improved institutional and regulatory framework.

Key Strategies

The main strategies will include:

- Strengthening institutional capacity to manage protected areas and ecosystems;
- Improving law enforcement and effectiveness;
- Reducing human animal conflicts;
- Promoting alternative livelihood sources for communities living around protected areas;
- Promoting and regulating wildlife farming, utilization and trade;
- Encouraging community wildlife conservation and monitoring;
- Enhancing wildlife IEC programmes; and
- Developing a database to monitor wildlife population trends.

Culture

Culture is another important aspect for tourism development. Malawi is endowed with a rich and diverse culture. The major challenge in the sub-sector is lack of purpose-built cultural infrastructure such as museums, arts centres and national archives buildings. Government, through MGDS II will therefore undertake a number of initiatives to promote Malawi's culture as outlined below.

Goal

The goal is to uphold and promote national heritage for identity, posterity and development.

Medium-term Expected Outcomes

- Improved preservation of Malawi's cultural heritage and values; and
- Increased promotion and development of Malawi's culture.

Key Strategies

The main strategies will include:

• Preserve historical artefacts and upgrade retrieval system;

- Preserve and construct national monuments;
- Promote establishment of cultural centres:
- Create public awareness on national heritage programs;
- Promote and preserve local cultural diversity;
- Promote research and documentation of Malawi's cultural and natural heritage; and
- Enhance the sub-sector's institutional capacity.

Sub-Theme 7: Labour and Employment

Labour as a factor of production is a key component of growth. A skilled and productive labour force contributes meaningfully to economic growth and improved living standards. Earnings from employment drive consumption as well as investment which helps a country to realize sustained growth. Equal opportunity to employment is a right for all productive age-groups.

In the last 5 years, the economy grew by an average of 7.5 per cent, and invariably creating employment. Robust labour statistics is needed to determine the number, level and type of employment created during these years. This is one of the challenges to be addressed by the strategy. It should be noted, however, that according to the Annual Economic Business Survey, private sector formal employment rose from 709,118 in 2005 to 897,277 in 2010.

Other challenges in this sub-sector include low labour productivity, weak institutional and regulatory framework, inadequate skills development and lack of adherence to occupational safety and health standards. Recognizing that employment is cross-cutting, this strategy will emphasize labour intensive investments across all sectors to enhance employment generation and improve labour productivity. To achieve this, the strategy will pursue the following goal, medium term expected outcomes and strategies.

Goal

The goal is to stimulate and ensure productive and decent employment for improved standards of living.

Medium-Term Expected Outcomes

- Improved labour productivity;
- Increased gainful and decent employment for all;
- Strengthened legal, regulatory and institutional reforms; and
- Eliminated worst forms of child labour.

Key Strategies

The main strategies will include:

- Establishing an effective and efficient labour market information (LMI) system;
- Promoting occupational safety and health;
- Integrating child labour issues into development initiatives and interventions;
- Integrating gender specific issues in all labour initiatives and interventions;
- Reviewing, harmonizing and enforcing existing legislation on child labour;
- Promoting labour intensive investments in the productive and service sectors;
- Reducing all forms of discrimination in the labour market;
- Promoting skills development, testing and certification; and

• Promoting labour administration systems.

Sub Theme 8: Land

There are three legally recognized types of land tenure in Malawi: customary, public and private with customary land tenure being the most widespread category. Land is a basic factor of production and an important source of livelihood. It is a source of income, nation's wealth, and provides cultural identity and shelter. Appropriate land interventions can therefore yield multiplier effects to the entire economy. Such interventions include formulation and implementation of appropriate land management and administration policies.

Over the past five years, Government implemented a number of initiatives including re-allocation of land to poor households largely through the Community Based Rural Land Development Project (CBRLDP) and introduction of land administration and management courses at tertiary level. The sector also embarked on designing and implementing a computerized title deed registration system.

The major challenge facing the sector is increased demand for land emanating from rapid population growth, high rate of urbanization and improved economic growth. Other challenges include low institutional capacity, poor land practices, and insufficient public awareness on land laws.

Goal

The goal is to ensure equitable access to land and tenure security; efficient management and administration system; and ecologically balanced use of land and land-based resources.

Medium Term Expected Outcomes

- Improved equitable access to land and tenure security;
- Improved land planning, ecologically balanced land use and management; and
- Improved provision of geospatial information.

Key Strategies

The main strategies will include:

- Promoting land ownership and title registration;
- Providing physical development planning standards, management guidelines and legal framework;
- Decentralizing land administration and management functions;
- Developing a geospatial database and establishing a national Spatial Data Centre;
- Preparing a National Spatial Framework for Strategic Physical Development Planning and Management;
- Raising public awareness on land related laws, policies, and procedures; and
- Developing mechanism for widespread dissemination of geographic information and digital mapping services.

THEME 2: SOCIAL DEVELOPMENT

Social development is a major pillar for improving the well-being of Malawians. It contributes to reduction of poverty and plays a key role in raising economic productivity of the country. To achieve socio-economic development, Malawi requires a healthy and educated population that grows at a sustainable rate. High rates of population growth have far reaching implications on social and economic development of a country. Provision of social services such as health and education in the country is greatly affected by the prevailing population dynamics. Thus fertility, mortality and migration affect the population size, age-sex structure, life expectancy, dependency ratio and spatial distribution which in turn determine resource allocation.

Over the last five years, Government has significantly improved the provision of social services in health, education, child development and protection, youth development, nutrition and HIV and AIDS management. In addition, the country's fertility rate has dropped from 6.0 in 2005 to 5.7 in 2010 (DHS 2005, 2010). However, the fertility rate is still high and remains a challenge to socio-economic development of the country. Recognizing the interrelated nature of population and socio-economic development, Government through this strategy will implement interventions focusing on population, education, health, child development and protection, youth development and nutrition.

Table 4.2: Summary of Social Development Theme

Sub-theme Goal Med		Medium Term Expected Outcomes		
1. Population	Manage population growth for sustainable socioeconomic development.	Reduced fertility rate; andWell managed migration.		
2. Health – refer to K	2. Health – refer to KPA chapter			
3. Education—refer to KPA chapter				
4. Child Development and Protection – refer to KPA chapter				
5. Youth Development – refer to KPA chapter				
6. Nutrition	A well nourished population that effectively contributes to economic growth.	Reduced prevalence rate of nutrition disorders		

Sub-Theme 1: Population

Population influences all aspects of socio-economic development. Due to high fertility rate, Malawi's population is growing rapidly at 2.8 percent per annum (PHC, 2008). This high population growth exerts pressure on provision of social services especially schools and health facilities and environment among others, resulting in decreased welfare of the average Malawian.

During MGDS implementation, Government increased the provision of sexual and reproductive health services which raised awareness and contributed to an increase in the proportion of the population using contraceptives. During the same period there was an increase in primary school girls' completion rate. These have contributed to a reduction in the fertility rate from 6.0 in 2005 to 5.7 in 2010 (DHS 2005, 2010). The slight reduction in fertility rate underlines the major challenges that exist. These challenges include relatively low access to contraceptives, low women empowerment, high dropout rate amongst school going girls and early marriages.

To address the above challenges, Government through this strategy will pursue the following goal, outcomes and key strategies.

Goal

The goal is to manage population growth for sustainable socio-economic development.

Medium-Term Expected Outcomes

Medium term expected outcomes include the following:

- Reduced fertility rate; and
- Well managed migration.

Key Strategies

In responding to challenges posed by demographic dynamics, Government will implement the following strategies:

- Enhancing the provision, access, delivery and utilization of SRH services to all including the vulnerable and disadvantaged groups;
- Advocating girls' education and delayed marriage;
- Promoting the small family concept;
- Providing SRH education for both in- and out-of-school sexually active population;
- Strengthening migration and national vital registration systems; and
- Addressing the vulnerabilities caused by population ageing, migration and rapid urbanization, and the interdependence of population and the environment.

Sub-Theme 2: Health

A healthy population is key to increased productivity and sustainable economic growth. There is a strong correlation between health status and level of development. In general poor health is costly to households and the economy. In particular, access to health care is low among the rural poor and the cost of maintaining better health is high.

The country's health indicators show that there are a number of challenges including high prevalence of preventable diseases, high mortality rates, high prevalence of HIV, high incidence of malaria cases, high incidence of TB cases, limited access to maternal health services, low institutional capacity, inadequate supply of essential drugs and inadequate health infrastructure.

During the implementation of MGDS, the country registered a number of achievements including reduction in infant mortality rate from 76 per 1,000 in 2004 to 66 per 1,000 in 2010; under five mortality rate from 133 per 1,000 in 2004 to 112 per 1,000 in 2010; maternal mortality rate from 984 per 100,000 in 2004 to 675 per 100,000 in 2010; and HIV prevalence from 11.8 percent in 2004 to 10.6 percent in 2010 (DHS, 2004 and 2010). In addition there has been a reduction in malaria in-patient case fatality rate from 7 percent in 2004 to 3.2 percent in 2010 (Malaria Indicator Survey, 2010); increase in TB cure rate from 74 percent in 2004 to 88 percent in 2010 (Health Sector Annual Report, 2010) and increase in proportion of births attended by skilled health personnel from 38 percent in 2004 to 75 percent in 2009 (WMS, 2009).

Despite these achievements, the country still faces a number of challenges including high prevalence of diseases, high mortality rates, high prevalence of HIV, high incidence of malaria cases, limited access to maternal health services, low institutional capacity, inequitable access and utilization of EHP services, inefficiency of health care system, high prevalence of health risk factors, inadequate supply of essential drugs, and inadequate health infrastructure.

To adequately address health challenges and to raise the health status of all Malawians, Government has identified Public Health, Sanitation, Malaria and HIV and AIDS Management as a key priority area. Details of the goals, outcomes and strategies of the health sub-theme are presented in the next chapter.

Sub-Theme 3: Education

Education is essential for social-economic development and industrial growth. It is an instrument for empowering the poor, the weak and the voiceless as it provides them with equal opportunity to participate in local and national development. It is through education that group solidarity, national consciousness and tolerance of diversity is enhanced. In essence, Government wishes to ensure better access and equity, relevance and quality, good governance and efficient management in all education sub-sectors. The sector is directly linked to the two MDGs namely 1) achieve universal primary education, and 2) promote gender equality and empower women.

During the last five years, Government carried out a number of initiatives aimed at improving quality and relevance of education as well as access to education. Within this period primary school curriculum was revised and new teaching and learning materials procured and distributed. Teacher training was expanded using Teacher Training Colleges (TTCs) and Open Distance Learning (ODL). Primary school net enrolment increased from 73 percent in 2006 to 83 percent in 2009. According to the Education Management Information System (EMIS 2010), dropout rate at standard one declined from 23 percent in 2005 to 12.7 percent in 2010. Survival rate at standard eight improved from 26.1 percent in 2005 to 48.8 percent in 2010. In addition, 17 girls' hostels each of a maximum capacity of 224 beds were constructed. Furthermore, enrolment in public technical colleges increased from 800 students in 2005 to 1,326 in 2010.

Despite these achievements, the country is still constrained by a number of challenges which render the education system inefficient and inequitable. Some of the challenges include: high illiteracy rate; limited integration of students with special needs; shortage of qualified teachers; inadequate and inferior physical learning infrastructure; poor participation of school committees and their communities in school management; inadequate teaching and learning resources such as libraries; laboratories and computers; low enrolment of girls in technical institutions; relatively high unit cost of training a student in the public universities and technical colleges; and limited human capacity and material resources.

Recognizing the important role education plays in the country's development, Government has identified education as one of the key priorities. Key outcomes and strategies are discussed in detail in the next chapter under Education Science and Technology key priority area.

Sub-Theme 4: Child Development and Protection

Children are the future of every nation. In Malawi, children aged 0 to 9 years, constitute a significant proportion of the population. Investing in child development guarantees future human capital and productivity. Children are vulnerable to abuse, violence, neglect, malnutrition and subject to harmful cultural practices. The AIDS pandemic has hit children hard by creating a growing number of orphans and making them destitute. They therefore need special protection so that they grow into productive and responsible citizens.

Over the past five years, progress was made in addressing some of the challenges faced by children. For example, Early Child Development Centres were increased from 5,945 in 2005 to 8,933 in 2010 (Ministry of Women, Children and Community Development). In addition, primary school net enrolment increased; the number of girls accessing primary level education rose to almost achieving gender parity; and infant and child mortality rates decreased. Regulatory and policy framework for the protection of children was also put in place.

Nevertheless, children in Malawi still face a number of challenges which are of social, economic, political and cultural in nature. These threaten their individual potential and the future of the nation in general. It is in this context that addressing child issues is one of the priorities of Government's

development agenda. Key outcomes and strategies are discussed in detail in the next chapter under child development, youth development and youth empowerment key priority area.

Sub-Theme 5: Youth Development

The youth, aged 10 to 29 years, constitutes a significant and growing labour force for the country. They provide a vast human resource potential, which, if properly nurtured can greatly contribute to sustainable economic growth and development. The youth are energetic, industrious, and willing to learn and adopt new innovations.

Over the past five years some progress has been made in addressing challenges faced by the youth. These include increased access to capital through the establishment of the Youth Enterprise Development Fund; expansion of the university student intake; improved technical and vocational training, construction of secondary school boarding facilities for girls; improving access to Sexual and Reproductive Health, HIV and AIDS services; and establishment of information centres.

Nonetheless, there still exists a number of social, cultural and economic factors that limit the youth's contribution to sustainable economic growth and development. Some of these limiting factors include high illiteracy and innumeracy levels; inadequate technical, vocational and entrepreneurial skills; limited access to credit facilities; high unemployment rate; poor access to guidance and counselling services; poverty and deprivation; marginalization in decision making processes; early marriages and teenage pregnancies. High prevalence of HIV and AIDS and limited access to SRH services further compounds the ability of the youth to meaningfully contribute to socio-economic development of the country.

Recognizing the potential that the youth have in fostering the growth of the economy, Government has included Youth Development and Empowerment as a key priority area in this development strategy.

Sub-Theme 6: Nutrition

Adequate nutrition is a prerequisite for human development. It is critical for one's physical and intellectual development, and work productivity hence an integral element for the socio-economic development. It is also important in the attainment of most MDGs particularly those related to hunger and poverty, education, child and maternal health, and mitigation of HIV and AIDS. Government having recognized that malnutrition is a silent crisis and is characterized by high levels of nutrition disorders such as stunting, wasting and underweight, included prevention and management of nutrition disorders amongst the priority intervention areas.

Sufficient nutrition is crucial for building and maintaining the immune system to enable it fight infections. In the absence of adequate nutrition, the body's immune system is weak and vulnerable to attack by various infections. This affects one's productivity and quality of life. One such infection is HIV and AIDS. The interaction between HIV and AIDS and nutrition will be discussed in detail under Public Health, Sanitation, Malaria and HIV and AIDS Management key priority area in the next chapter.

During the last five years, Government implemented a number of interventions to improve nutrition. The interventions included school health and nutrition programmes; Vitamin A supplementations; and nutrition support programmes. These interventions have resulted in improvement of nutrition indicators. For instance, the percentage of underweight children decreased from 22 percent in 2004 to 13 percent in 2010 (DHS, 2010). In addition, iodine status improved among school aged children and women. Outcomes of severely malnourished children also improved as a result of early case detection and timely treatment.

However, the country still faces a number of challenges mainly emanating from the underlying causes of under-nutrition. These include low household incomes, poor child feeding and care practices, inadequate education and lack of knowledge which lead to poor food processing and utilization and sometimes cultural beliefs which deny women and children consumption of high nutritive value foods. Other constraints include low institutional capacity and inadequate mainstreaming of nutrition in sectoral programmes. To address these challenges, Government will continue to place nutrition issues on its development agenda.

Goal

The goal is to have a well nourished population that effectively contributes to development of the country.

Medium-Term Expected Outcome

In the medium term, it is expected that there will be reduced prevalence of nutrition disorders.

Key Strategies

Key strategies include:

- Promoting exclusive breastfeeding practices for children aged 0-6 months;
- Promoting optimal feeding practices for children aged 6-24 months and beyond;
- Promoting optimal feeding of a sick child during and after illness;
- Promoting the prevention, control and treatment of micronutrient deficiency disorders, particularly those caused by Vitamin A, Iodine and Iron deficiencies, including food fortification;
- Improving access to nutrition supplements for malnourished children, expectant, lactating mothers, the elderly and physically challenged;
- Promoting access to at least one nutritious meal and related health and nutrition services for the school-going children;
- Strengthening capacities for households and communities to attain adequate nutrition;
- Preventing and controlling nutrition related non-communicable and other diseases:
- Scaling up innovative interventions in quality management of malnutrition among the various population groups;
- Strengthening institutional and human capacities for effective delivery of nutrition services;
- Promoting health lifestyles; and
- Promoting production and access to high nutritive value foods for diversified and nutritious diets.

THEME 3: SOCIAL SUPPORTAND DISASTER RISK MANAGEMENT

Poverty headcount and extreme poverty levels have declined significantly since 2005. The country has also experienced improved economic growth averaging 7.5 percent per year. However, despite the reduction in poverty levels and impressive economic growth, there are still sections of the population in extreme poverty that still require social support. In addition, the country has been experiencing a number of disasters that have negatively affected national development and led to loss of lives due to inadequate early warning infrastructure and mitigation measures. Despite the food surplus the country enjoyed during the last five years, natural disasters such as drought led to food insecurity in selected districts which required humanitarian assistance. This theme is therefore aimed at continued provision of social support to the vulnerable and strengthening disaster risk management.

Over the last five years, a number of initiatives were implemented aimed at fighting poverty. These resulted in the decline of poverty incidence from 50 percent in 2005 to 39 percent in 2009. This trend was accompanied by a reduction in ultra-poverty from 22 percent in 2005 to 15 percent in 2009. This achievement is largely attributed to agricultural FISP which on average benefited 1.3 million Malawians per year since 2005. In addition, the Government implemented Targeted Support to School Meals, Public Works Programme, Village Savings and Lending and Microcredit programmes and continued piloting the SCT programme.

Table 4.3: Summary of Social Support and Disaster Risk Management Theme

Sul	b-theme	Goal	Medium Term Expected Outcomes
1.	Supporting the Vulnerable	Improve resilience and quality of life for the poor to move out of poverty and vulnerability.	 Improved asset base and productive capacity of the poor; and Improved social security interventions.
2.	Disaster Risk Management	Reduce the social, economic and environmental impact of disasters.	Strengthened capacity for effective preparedness, response and recovery.

Sub-Theme 1: Supporting the Vulnerable

Vulnerability is defined as people's inability to meet their basic needs due to exposure to a hazard and lack of resilience. In Malawi, the most vulnerable include the elderly, the chronically sick, orphans and other vulnerable children, persons with disabilities, and destitute families. These categories of people are vulnerable to risk and lack resilience, which constrains them from engaging in higher economic return activities to enable them move out of chronic poverty and ultimately above the poverty line.

During the last five years, implementation of the SCT managed to increase the assets of the poor while the School Meals programme resulted in an upsurge in primary school attendance and retention. In all, the proportion of the disadvantaged receiving conditional and unconditional cash transfer increased from 4 percent in 2005 to 37 percent in 2010. At the same time the Public Works Program increased its coverage from 130,000 people in 2009 to 335,225 in 2010. The government also developed National Social Support framework to guide the design and implementation of social support interventions.

Despite these achievements, social support activities continue to face challenges. These challenges include: unavailability of regulatory instruments for programme implementation which compromise beneficiary targeting, financial sustainability and continuity of programmes. In addition, direct assistance and social transfers were limited in coverage largely due to financial constraints.

In the next five years, Government intends to refocus its attention on productivity enhancement

interventions that are developmental in nature as well as provision of welfare support to improve social economic status of the vulnerable section of the population.

Goal

The goal is to improve resilience and quality of life for the poor to move out of poverty and vulnerability.

Medium-Term Expected Outcomes

In the medium-term, it is expected that Malawi will have attained:

- Improved asset base and productive capacity for the poor; and
- Improved social security interventions.

Key Strategies

The expected outcomes above will be achieved through implementation of the following key strategies:

- Enhancing and promoting predictable transfers to the most vulnerable and the ultra poor households;
- Promoting longer term, skills oriented and asset enhancing interventions;
- Establishing coherent and progressive social support synergies;
- Promoting existing livelihood activities for the poor;
- Promoting village savings and loans programmes; and
- Improving and scaling up the Social Cash Transfer Programmes.

Sub-Theme 2: Disaster Risk Management

Malawi faces a number of disasters, both natural and manmade which include floods, drought, strong winds, hailstorms, landslides, earthquakes, pest infestations, disease outbreaks, fire, accidents, refugee influx and civil strife. The magnitude, frequency and impact of disasters have been increasing, in light of climate change, population growth and environmental degradation. Disasters disrupt people's livelihoods, endanger human lives and food security, damage infrastructure and hinder economic growth and development among others. Disasters also increase poverty of rural and urban households and erode the ability of the national economy to invest in key social sectors which are important to reducing poverty. Poor households, particularly female headed are more vulnerable to disasters since women tend to be more reliant on the environment than men for food and are primary gatherers of water and firewood. It is, therefore, important to address disaster risks for the socio-economic development of the country.

Currently the DRM is facing a number of challenges which include, lack of policy and strategy to effectively coordinate DRM activities; inadequate institutional capacity both at local and national levels to effectively carryout DRM activities; insufficient coverage and depth of disaster reduction activities; lack of an updated and upgraded risk assessment system for early warning; limited investment in knowledge and education for disaster risk reduction; and non-existence of a multi stakeholder forum for coordination of disaster risk management activities.

In the next five years, Government will implement a number of activities aimed at improving preparedness, response and recovery from disaster, and risk management.

Goal

The goal is to reduce social, economic and environmental impact of disasters.

Medium-Term Expected Outcome

In the medium term, it is expected that Malawi will have attained strengthened capacity for effective preparedness, response and recovery.

Key Strategies

In responding to the challenges faced within the DRM, government will implement the following strategies:

- Developing and strengthening DRM policy and institutional frameworks;
- Mainstreaming DRM into policies, strategies and programmes;
- Strengthening DRM coordination mechanisms among stakeholders;
- Enhancing capacity on the use of GIS and other remote sensing technologies;
- Developing an integrated national EWS;
- Implementing mitigation measures in disaster prone areas;
- Promoting awareness, access, distribution and utilization of reliable and relevant DRM information; and
- Incorporating DRM in all school curricula.

THEME 4: INFRASTRUCTURE DEVELOPMENT

Infrastructure is one of the key prerequisites for economic growth. It is a key component for creating an enabling environment for private sector driven growth and provision of timely and quality social services. Government has singled out energy, transport and water development as some of the key priority areas for the MGDS II. It is envisaged that development of the prioritized infrastructure will contribute to the realization of sustained economic development for Malawi.

There are five sub themes under infrastructure development, namely: Energy and Transport; Water Development; Information and Communication; and Housing and Urban Development. Out of these, energy, transport and water development will be discussed in detail in the chapter on key priority areas.

 Table 4.4: Summary of Infrastructure Development Theme

Table 4.4: Summary of Infrastructure Development Theme					
Sub-theme	Goals	Medium Term Expected Outcomes			
1. Energy-refer to I	1. Energy-refer to KPA				
2. Transport					
2.1. Air Transport	Ensure a safe, efficient and competitive aviation industry	 Improved safety and management in accordance with international standards; Improved reliability and competitiveness; Improved regulatory and institutional framework; and Improved security in airports. 			
3. Water Developm	3. Water Development -refer to KPA				
4. Information and	Communication				
4.1.Information and Communication	Increase utilization of ICT, ensure universal access to ICT products and services to improve service delivery in both public and private sectors.	 Improved ICT broadband infrastructure; Increased usage and access to information, communication services; Improved postal and broadcasting services; Improved ICT governance; and Enhanced ICT capacity for the general public. 			
4.2. Media and Communication	Ensure that the population has access to timely and relevant information, and increase popular participation of citizens in development, governance and democratic processes.	• Increased access to information.			
5. Housing and Ur	5. Housing and Urban Development				
5.1. Housing	Increase access to decent housing with particular attention to low income households.	 Increased availability of affordable and decent houses. 			
5.2.Urban Development	Create a sustainable, economically and socially integrated urbanizing system.	• Improved and sustainable urbanization system with a view to reducing slums.			

Sub-Theme 1: Energy

A well-developed and efficient energy system is vital for socio-economic development. In this respect, increasing generation capacity, improving transmission, distribution and supply of electricity will contribute to an efficient energy system in the economy. Improving the distribution and supply of other energy sources will complement an efficient energy system.

During the implementation of the MGDS, the energy sector registered a number of achievements including establishment of the Malawi Energy Regulatory Authority (MERA) in 2007; pre-feasibility study on construction of an Oil Pipe line from Beira to Nsanje which revealed viability of the Oil Pipe line project; rehabilitation of Tedzani I & II in which 40MW of installed capacity was restored; training of 400 biomass briquette producers, 100 briquette stove producers, 230 ceramic liner producers, and establishment of 20 briquette production centres, 24 briquettes stove production centres and 7 ceramic liner production centers in the cities as alternative energy sources to reduce dependence on charcoal and firewood. As a result of promotion of use of alternative sources of energy, there has been a decline in the proportion of the population using solid fuels from 94.8 percent in 2005 to 78 percent in 2010.

In addition, there has been an increase in the percentage of households with access to electricity from 4 in 2005 to 9 in 2010. This is partly due to successful implementation of rural electrification program which has increased the number of trading centres connected to electricity from 45 in 2005 to 182 in 2010. Furthermore, within the same period, 6 villages were energized with Solar/Wind hybrid systems and this too has contributed to the increased access to electricity.

Despite these achievements, energy generation capacity in Malawi is low and has often been cited as one of the major constraints to industrial development. Recognizing the importance of energy in the economic development of the country, Government has put energy as one of the key priority areas in this development strategy.

Sub-Theme 2: Transport

Efficient transportation system provides better connectivity to local, regional and international markets. This reduces cost of production and marketing of goods and services through, among other things, reduction in lead times. Thus investment in the transport system plays a major role in socio-economic development. This investment involves the development of infrastructure and provision of services in all modes of transport, namely road, rail, air and water. Furthermore, the provision of high quality and affordable transport infrastructure improves access to social services such as education, health, markets and communication facilities.

During the implementation of the MGDS, the transport sector carried out a number of interventions aimed at improving the quality of infrastructure. The paved road network increased from 3,663 km in 2004 to 4,073 km in 2010; 215 km of the paved road network was rehabilitated out of the 293 km during the same period. Fuel levy now meets all the country's routine road maintenance requirements. Other interventions included the preparation of the Transport Sector Investment Plan (TSIP) that will bring about coordinated and competitive development of all transport modes and enhancement of intermodal transport along the corridors. In addition, in the roads subsector Government has adopted the RSP to guide both the medium and long term investment programmes in the road transport subsector.

However, there are critical issues that are negatively impacting on the performance of the transport sector, which include: high construction costs; limited absorptive capacity of the available resources in the road sub-sector; lack of balanced competition and connectivity among the modes; limited supply of skilled artisans; inadequate investment in construction machinery; poor condition of most ports; and old navigation aids.

Government recognizes that improved transport infrastructure and services are crucial for economic development and has included road, rail and water transport as focus areas within Transport Infrastructure and Nsanje World Inland Port key priority area. This key priority area is covered in detail in the next chapter. Air transport is discussed below.

Air Transport

Air transport is the most efficient and effective means of transportation. It has the potential to promote tourism and enhance prospects for economic growth. Government recognizes that there is need to continuously improve air transport infrastructure and services to enhance trade, tourism and investment. To ensure air transport efficiency, Government will pursue the following goal; medium term expected outcomes and strategies.

Goal

The goal is to ensure a safe, efficient and competitive aviation industry.

Medium Term Expected Outcomes

In the medium term it is expected that Malawi will have attained:

- Improved safety and management in accordance with international standards;
- Improved reliability and competitiveness;
- Improved regulatory and institutional framework; and
- Improved security in airports.

Key Strategies

Main strategies include:

- Promoting and facilitating a competitive and efficient air transport industry;
- Providing safe, efficient, reliable aviation infrastructure and services;
- Strengthening legislative and regulatory frameworks;
- Promoting effective safety and security oversight systems;
- Undertaking reforms in the aviation sector;
- Strengthening institutional capacity;
- Implementing environmental protection measures; and
- Promoting PPPs to facilitate private investment.

Sub-Theme 3: Water Development

Water development is key to the socio-economic development of the country. It has direct linkages with sectors such as agriculture, industry, natural resources, health, tourism, energy and fisheries. Water is a fundamental catalyst for energy, transport, health, agriculture and biodiversity. Water development will also facilitate GBI development to increase agricultural production and productivity. Furthermore, improved water supply services have direct impact on lives of women and children by reducing the burden of water carriage for households.

Water, sanitation and hygiene services also make a significant contribution to public health and alleviation of the burden on curative health services by reducing disease transmission. Improved water supply, sanitation and hygiene facilities in schools significantly contribute to the quality of education by reducing disease burden among children and staff, improving school attendance and retention particularly among girls, improving attraction and retention of teachers and provides more effective learning through a safe and conducive environment.

The sector made notable progress during the implementation of MGDS. These include increased adoption of improved irrigation technologies, construction of dams, and rehabilitation of irrigation schemes and promotion of WASH. The country's proportion of population with access to basic sanitation increased from 84 percent in 2005 to 93 percent in 2009. There was an increased percentage of population with access to safe potable water from 73 percent in 2005 to 84 percent in 2009 (WMS, 2009).

The water sector is facing challenges which include: degradation of water resources; vandalism of water facilities; limited access to potable water hence women walking long distances to fetch water; inadequate promotion of hygiene and sanitation; inadequate water reservoirs; inadequate capacity of contractors and consultants; and poor state of suitable infrastructure for effective management, treatment and disposal of solid and liquid waste. Due to the importance of water development, sanitation and greenbelt irrigation, Government has included them within key priority areas detailed in the next chapter.

Sub-Theme 4: Information and Communication

Information is a vital resource for all human kind throughout all stages of life. It is therefore important that information should be made available in a form that is applicable and usable, and at the right time. Use of ICT enhances the production, transportation and provision of information to the general public for human development as well as for making informed decisions. This sub-theme comprises ICT, and Media and Communication.

During the implementation of the MGDS, the sector made a number of achievements including connection to the optic fibre cable resulting in improved delivery of telecommunication services; increased mobile phone coverage; increased provision of broadcasting services; increased postal and courier service and automation of some of Government's operations and services.

Despite these achievements the sector still faces a number of challenges. These include: low usage and adoption of electronic and online services; lack of effective regulatory frameworks; high communication costs; high printing costs; lack of coordination and collaboration on ICT infrastructure development; intermittent availability of service, low geographical coverage; low local content in terms of provision of information; inadequate institutional and human capacity and low usage of modern broadcasting technology.

Goal

The goal is to ensure better access to information.

Information and Communication Technology

Well developed information and communication technology system is essential for the development of a country. Malawi's ICT is still underdeveloped. In this respect Government will implement ICT strategies that will facilitate e-services, increase public sector efficiency, grant citizens access to public services by making them available online (e-government). It will also promote production of exportable ICT products and services, encourage economic diversification in areas such as tourism, financial services, medical research, and telecommunication and create new jobs. Improvement of network connectivity will reduce communication costs thereby increasing access to information by majority of people living in the country.

Goal

The goal is to increase utilization of ICT, ensure universal access to ICT products and services to improve service delivery in both public and private sectors.

Medium-Term Expected Outcomes

The expected medium term outcomes include:

- Improved ICT broadband infrastructure;
- Increased usage and access to information and communication services;
- Improved postal and broadcasting services;
- Improved ICT governance; and
- Enhanced ICT capacity for the general public.

Key Strategies

Main strategies include:

- Developing a reliable, fast, adaptive and robust national ICT infrastructure that feeds into international networks;
- Mainstreaming ICT into sector policies and strategies and operations;
- Improving ICT service access by rural and underserved communities;
- Promoting the participation of private ICT service providers;
- Promoting information, education and communication on ICT;
- Improving efficiency in delivering postal services;
- Migrating from analogue to digital television broadcasting;
- Improving the regulatory framework for the sector;
- Developing a comprehensive national database; and
- Developing public online services.

Media and Communication

Media and communication is an important tool in promoting mass participation in decision making as well as in developmental processes. Media and communication provide alternatives to the public to express their developmental aspirations and priorities, and in shaping the public perception on a variety of important issues. Thus, the availability of a vibrant media and communication sub sector is a prerequisite to development.

Goal

The goal is to ensure that the population has access to timely and relevant information, and increase popular participation of citizens in development, governance and democratic processes.

Medium Term Expected Outcomes

In the medium term, it is expected that there will be increased access to information.

Key Strategies

The expected outcomes above will be achieved through implementation of the following key strategies:

- Promoting distribution of publications;
- Promoting screening of developmental video documentaries to communities;
- Strengthening regulatory framework to facilitate free flow of information;
- Abridging, translating and distributing policies and other important documents into major vernacular languages;
- Strengthening IEC on topical issues;
- Promoting discussion forums on topical issues; and
- Enhancing skills capacity of media personnel.

Sub-Theme 5: Housing and Urban Development

Housing and urban development is crucial in the development of the country. Adequate and quality housing is one of the key indicators of development as it relates to basic needs and is crucial in assessing living conditions of a population. Currently Malawi has a high rate of urbanization estimated at 6.3 percent. Proper housing and structured urbanization reduces the rise in unplanned settlements, crime and the strain on government capacity to provide adequate security and social services. Regularization and titling of land is expected to facilitate use of land and property thereon, as collateral to obtain credit from financial institutions for investment.

During the implementation of MGDS, achievements registered include the following: maintained houses under government lease, constructed Government Offices, conducted quinquennial valuations and supplementary valuation rolls, decentralized the Rural Housing Programme, commenced a National Slum Upgrading Programme, developed Guidelines on Safer House Construction and continued construction of houses by the Malawi Housing Corporation.

Despite these achievements, the sub-sector still faces a number of challenges. These include: outdated and inadequate legislation and related procedures; high investment costs; inadequate capacity; lack of housing finance, particularly for low-income households; unclear mandate of local authorities in relation to housing delivery and involvement of traditional leaders in land delivery for housing development within urban areas; limited access to land for housing development; and development of unplanned settlements.

Goal

The goal is to increase access to decent housing and provide guidelines for infrastructure development.

5.1 Housing

Good housing contributes to economic growth and poverty reduction. It adds to the reduction of the health burden from infectious and parasitic diseases and accidents. It also provides security and is a large asset base and a source of income.

The nation has a large housing deficit. The 2008 Population and Housing Census indicates that out of 2,869,933 houses, 21.4 percent were permanent, 34.18 percent were semi-permanent while 44.42 percent were classified as traditional. The Malawi Urban Housing Profile of 2009 revealed that to meet

the housing demands in the urban areas, there is a need to construct 21,000 houses per year for a period of ten years. This, therefore, means that the majority of Malawians are living in houses that are not decent.

Goal

The goal is to increase access to decent housing with particular attention to low income households.

Medium Term Expected Outcomes

In the medium term, it is expected that there will be increased availability of affordable and decent houses.

Key Strategies

Main strategies include:

- Strengthening institutional, legal and regulatory framework;
- Strengthening capacity for decentralized housing delivery;
- Promoting PPPs in housing delivery;
- Scaling up the provision of basic infrastructure and services particularly in informal settlements;
- Promoting national housing financing mechanisms;
- Promoting planning to improve quality of rural and urban housing and settlement patterns;
- Providing safe and adequate space to public institutions and officers; and
- Developing and promoting the use of local building materials.

5.2 Urban Development

Malawi's urbanization is growing at 6.3 percent per annum. The growth of urbanization in Malawi is exacerbated by high rural-urban migration and population growth. The result is increasing urban poverty whose most visible manifestations are the slums which continue to develop in and around the cities and towns in Malawi. These settlements are characterized by poor access to physical infrastructure such as roads, electricity and poor access to social services such as education, health, insecure tenure and poor housing conditions. It is therefore important that the focus should be to provide proper plans for urban areas and emerging towns.

Goal

The goal is to create a sustainable, economically and socially integrated urbanizing system.

Medium-Term Expected Outcome

In the medium term it is expected that there will be improved and sustainable urbanization system with a view to reduce slums.

Key Strategies

The key strategies include:

- Providing support to processes of urban renewal and slum upgrading;
- Supporting the development of utilities, mechanisms and structures in local authorities and urbanizing systems for the provision of critical urban infrastructure;
- Enforcing rules and regulations on land use and physical plans;
- Promoting PPPs in the development of urban infrastructure; and
- Improving infrastructure facilities in slum areas and restrict the formation of new slums.

THEME 5: GOVERNANCE

Malawi Government recognizes that the successful implementation of its development strategy depends on the prevalence of good governance. Good governance implies the provision of an efficient regulatory regime that ensures the absence of corruption; promulgation of consistent policies to eradicate poverty and the provision of appropriate institutions to support human existence. Good governance keeps in check distortionary incentives and ensures equitable allocation and distribution of public resources. It enhances public security and safety, and guarantees property and personal rights, which in turn creates a conducive environment for private sector investment. In this respect, Government has put in place mechanisms to manage societal affairs in accordance with democratic principles.

In the last five years, progress was made in improving governance as manifested by ongoing legal and economic policy reforms, coupled with the establishment and strengthening of key institutions of governance.

In line with the Malawi constitution which guarantees human rights, including the right to economic activity, the strategy will, among other things, continue to address issues related to access to economic opportunity, private sector participation, efficient stewardship of public resources, promotion of democratic governance institutions and justice and the rule of law.

There are four sub-themes under governance, namely economic governance, corporate governance, democratic governance and public sector management.

Table 4.5: Summary of Governance Theme

Sub-theme	Goal	Medium Term Expected Outcomes
1. Economic Governance	Sustain and accelerate the positive economic growth within a stable macroeconomic environment.	 Strengthened evidence-based planning and macroeconomic policy formulation; Improved resource mobilization, allocation, and use of public resources; Strengthened aid management systems; and Improved access to financial services.
2. Corporate Governance	Ensure well regulated, transparent, accountable and efficient business systems.	 Improved and effective regulatory framework for the corporate world; Improved investors' perception of the country; Improved efficiency in service delivery; Reduced corruption and fraud; and Increased corporate social responsibility.
3. Democratic Govern	nance	
3.1. Justice and Rule of Law	Ensure access to justice and entrenched rule of law.	 Improved and effective judicial system; Enhanced transparency, accountability and efficiency of legal institutions.
3.2. Human Rights	Promote and protect rights and freedoms as enshrined in the constitution of Malawi.	 Enhanced awareness and practice of human rights and responsibilities; Improved respect for human dignity and choice; and Enhanced equitable access to opportunities.

3.3. Elections	Promote free and fair elections	 Transparent and democratic electoral process; and Political parties with clear ideologies and functional internal democracy.
3.4. Peace and Security	Make a secure and peaceful nation.	 Improved methods of promoting national security and public order; and Improved partnership and participation of all members of the public on issues of peace and security.
4. Public Sector Management	Deliver services to the public in an efficient, demand driven and effective manner.	 Enhanced public service leadership; Improved performance and service delivery in the public service; Harmonized and evidence based policies developed; and Enhance implementation of Public Sector Reform

Sub-Theme 1: Economic Governance

A stable macroeconomic environment is vital for economic growth and is a catalyst for investment and industrial development. In the past five years, Malawi experienced a stable macroeconomic environment characterized by a high GDP growth rate, low inflation rate, a stable exchange rate, and sustainable levels of both domestic and foreign debt. This is partly attributed to the Public Finance and Economic Management (PFEM) reforms that were undertaken to ensure financial prudence. However, the economy is still facing a number of challenges including high interest rate, limited coverage of banking services and low access to credit especially in the rural areas.

Government will endeavour to sustain and accelerate the positive economic growth and continue with a stable macroeconomic environment as well as continue to support reforms under PFEM programmes.

Goal

The goal is to sustain and accelerate the positive economic growth within a stable macroeconomic environment.

Medium-Term Expected Outcomes

In the medium term, it is expected that there will be:

- Strengthened evidence-based planning and macroeconomic policy formulation;
- Improved resource mobilization, allocation, and use of public resources;
- Strengthened aid management systems; and
- Improved access to financial services.

Key Strategies

The key strategies include:

• Harmonizing the national budget and priorities in the national development strategy;

- Diversifying sources of government revenue;
- Improving revenue collection and administration system at both national and local government levels:
- Pursuing sound macroeconomic policies;
- Ensuring that external support is aligned to the national development strategy;
- Ensuring that sectoral and local plans are aligned to the national development strategy;
- Improving management of financial and non financial assets;
- Expanding and improving financial services to MSMEs;
- Strengthening monitoring and evaluation of the implementation of national development strategies and programmes;
- Enhancing evidence based public policy formulation;
- Improving national procurement, audit and reporting systems at all levels;
- Enhancing international cooperation and development diplomacy;
- Developing capacity for negotiating bilateral and multilateral agreements; and
- Improving legal and regulatory framework of the financial sector.

Sub-Theme 2: Corporate Governance

Good corporate governance is an important element in the creation of an enabling environment for rapid and sustainable private sector development. Strengthening good corporate governance and implementation of the code of best practices is expected to enhance private sector performance through reduced corruption and fraud within the public and private sector and improve investors' perception of Malawi. This in turn will lead to increased levels of domestic and foreign direct investment.

Goal

The goal is to ensure well regulated, transparent, accountable and efficient business systems.

Medium-Term Expected Outcomes

The expected outcomes include:

- Improved and effective regulatory framework for the corporate world;
- Improved investors' perception of the country;
- Improved efficiency in service delivery;
- Reduced corruption and fraud; and
- Increased corporate social responsibility.

Key Strategies

The key strategies include:

- Improving and strengthening business regulatory framework and developing a clear regulatory regime for parastatals;
- Promoting the adoption of good corporate governance code of conduct;
- Strengthening the Institute of Directors; and
- Promoting zero tolerance to corruption.

Sub-Theme 3: Democratic Governance

Malawi Government recognizes that broad based growth and improvement in the quality of life and social wellbeing can take place if good democratic governance prevails at all levels. Good governance can therefore foster economic growth and aid the attainment of the National and Millennium Development Goals. Equally important in the attainment of national development goals is good governance at local level. Good governance at local level entails creation of a democratic environment and institutions at district and community levels, promotion of accountability, encouraging local participation in decision making and mobilizing masses for socio-economic development in their respective areas. Decentralization is one of the implementing tools for local governance.

In the past five years, democratic governance has improved in Malawi. The country experienced positive developments that included successful presidential and parliamentary elections, growing civil society and non-governmental organizations, and deepening constitutionalism.

5.3.1 Justice and Rule of Law

Malawi Government recognizes that adherence to a strong justice system and rule of law is an important factor that guarantees an enabling legal and regulatory framework and encourages the achievement of sustainable economic growth and development. The Malawi constitution also reaffirms Malawi's commitment to the rule of law. To enhance this, the Government of Malawi established oversight institutions to promote transparency, accountability and integrity.

In the past five years, a number of positive developments were registered. These included legal and policy reforms, and the strengthening of some of the key institutions of governance that resulted in an increased access to legal system.

Despite the above achievements, a number of challenges remain. These include low institutional capacity, inadequate infrastructure, poor protection of vulnerable groups like women and children, high costs of legal services and shortage of legal experts. In addition, the vulnerable and marginalized are not fully empowered to seek and demand their rights.

Goal

The goal is to ensure access to justice and entrenched rule of law.

Medium-Term Expected Outcomes

In the medium term it is expected that there will be:

- Improved and effective judicial system; and
- Enhanced transparency, accountability and efficiency of oversight institutions.

Key Strategies

The key strategies include:

- Fostering independence and credibility of the judicial system;
- Promoting supremacy and respect for the constitution;

- Strengthening capacity of sector institutions;
- Promoting law reforms to consolidate democracy and human rights;
- Increasing citizen awareness of the country's laws, procedures and institutions;
- Enhancing consistency of domestic laws with international standards;
- Promoting a justice and legal system that is responsive to marginalized groups; and
- Promoting a people-centred, accessible, affordable, and expeditious justice system.

5.3.2 Human Rights

The Malawi Government recognizes that good governance hinges on the respect for human rights. The observance of human rights allows for equity in terms of participation in the development process and a fair distribution of development gains by all.

In the past five years a number of achievements were made including the development of a legislative framework for protection of the human rights, and increased awareness of basic human rights.

However, there are a number of challenges facing the subsector. These include limited coverage of human rights messages especially to the most vulnerable, low capacity of government institutions that deal with human rights, poor conditions in the country's prisons and a rise in domestic violence and rape.

Goal

The goal is to promote and protect human rights and freedoms as enshrined in the constitution of Malawi.

Medium-Term Expected Outcomes

In the medium term it is expected that there will be:

- Enhanced awareness and practice of human rights and responsibilities;
- Improved respect for human dignity and choice; and
- Enhanced equitable access to opportunities.

Key Strategies

Main strategies include:

- Enhancing human rights awareness and education;
- Promoting equitable access to economic, political and social opportunities;
- Strengthening legal protection and equitable treatment for marginalized populations, women and children;
- Ensuring respect for prisoners' rights;
- Eliminating all forms of discrimination; and
- Strengthening capacity of human rights institutions.

5.3.3 Elections

The Malawi Government recognizes the importance of free and fair elections to allow the people to freely choose public office holders. In the recent past, Malawi has progressed in ensuring free and fair elections, especially for the president and parliamentarians. The successful 2009 Presidential and Parliamentary Elections were a manifestation of maturing democracy in the country. However, inadequate public awareness of the electoral processes and logistical problems remain some of the main challenges.

Goal

The goal is to promote free and fair elections.

Medium-Term Expected Outcomes

In the medium term it is expected that there will be:

- Transparent and democratic electoral processes; and
- Political parties with clear ideologies and functioning internal democracy.

Key Strategies

Main strategies include:

- Enhancing credibility, management and accountability of electoral processes;
- Improving governance in political parties;
- Enhancing implementation of law reforms to facilitate free and fair elections at national and local levels;
- Enhancing independence of elections governing bodies; and
- Fostering informed and active participation in local governance.

5.3.4 Peace and Security

Peace and security are essential preconditions which must be guarded for the nation to achieve social, economic and political prosperity. Furthermore, common experience has shown that nations in conflict always tend to lose their grip and fail to concentrate on national growth and development policies.

To this end, peace and security arrangements need to address a wide range of issues aimed at safeguarding the nation's sovereignty, territorial integrity and national interests. This entails ensuring efficient and effective security mechanisms for defence, public and state sectors all of which must be coordinated in a manner that reflects Government's growth and development strategies. Consequently, there is need for adequate personnel, equipment and infrastructure to address all cross-cutting issues affecting peace and security.

Goal

The goal is to continue to make Malawi a secure and peaceful nation

Medium-Term Expected Outcomes

Medium term expected outcomes include:

- Improved methods of promoting national security and public order; and
- Improved partnership and participation of all members of the public on issues of peace and security.

Key Strategies

Main strategies include:

- Improving the responsiveness of all security sectors to communities' security needs;
- Strengthening partnership for risk management between the private and security sectors;
- Enhancing community integration and participation in promoting a secure, peaceful and crime free environment:
- Ensuring safe and secure borders;
- Rehabilitating and expanding security establishments; and
- Improving infrastructure for development and expansion of security establishments.

5.3.5 Corruption

Government realizes that corruption is cross cutting in nature and affects all elements of governance and that it retards growth and development activities, increases the gap between the rich and the poor, and discourages investments.

In the past five years, Malawi registered a number of achievements including a rise in corruption perceptions index, reduced average time taken to complete and prosecute corruption cases and increased public awareness. According to a report from the Transparency International, corruption in Malawi is on the decline.

In this respect, it will continue pursuing strategies aimed at promoting integrity, transparency and accountability with the ultimate goal of curbing corruption and fraud at all levels.

Goal

The Goal is to curb corruption and fraud at all levels.

Medium Term Expected outcomes

The medium term expected outcome is reduced levels of corruption and fraud

Key Strategies

Main strategies include:

- Mainstreaming anti-corruption strategies in all institutions; promoting prevention of corruption;
- Enhancing investigation of all suspected corrupt practices; promoting prosecution of all

- offenders;
- Fostering public support in the fight against corruption;
 promoting IEC on corruption; strengthening capacity and partnerships for all institutions dealing with corruption;
- Implementing National Anti Corruption Strategy; and Promoting independence of all institutions dealing with corruption.

Sub-Theme 4: Public Sector Management

Effective public sector management is necessary for the creation of a conducive environment for efficient delivery of public goods and services at central and local levels. The Malawi public sector has generally been disciplined and hard working. This is attributed to a number of factors, including an upward salary adjustment in the past five years and an improvement in conditions of service especially in some of the strategic sectors of the civil service.

The public sector, however, is faced with a number of challenges that include salary levels that do not meet basic living conditions especially for the lower grades. This, compounded by slow promotion, slow recruitment and insufficient resources and equipment leads to low morale in the civil service.

Goal

The goal is to deliver services to the public in an efficient, demand driven and effective manner.

Medium-Term Expected Outcomes

In the medium term, it is expected that the following will be achieved:

- Enhanced public service leadership;
- Improved performance and service delivery in the public service;
- Harmonized and evidence based policies developed; and
- Enhanced implementation of Public Sector Reform programmes.

Key Strategies

- Developing and strengthening leadership capacities for effective management of the public service;
- Ensuring an effective and functional public service commission;
- Improving conditions of service for public service employees;
- Enhancing evidence-based policy making;
- Promoting participatory public policy formulation;
- Strengthening mechanisms for coordination and utilization of resources;
- Developing capacity to implement public sector reforms; and
- Strengthening equal participation of women and men in leadership and management positions.

THEME 6: GENDER AND CAPACITY DEVELOPMENT

Gender, capacity development, and research and development, HIV and AIDS, nutrition, environment, climate change, population and science and technology are critical issues that cut across and impact all sectors of the economy. This thematic area will, however, focus on gender and capacity development as the other issues are discussed in the key priority areas.

In terms of gender, there has been little success in the systematic mainstreaming in sector programs. In the area of capacity development there have been improvements, but there is still a lot that needs to be done across the public and private sectors.

Table 4.6: Summary of Gender and Capacity Development Theme

Sub-theme		Goal	Medium Term Expected Outcomes
1.	Gender	Reduce gender inequalities and enhance participation of all gender groups in socio-economic development.	 Increased meaningful participation of all gender groups in decision making, wealth creation and poverty reduction; Reduced gender based violence at all levels; and Enhanced gender mainstreaming across all sectors.
2.	Capacity Development	Develop a productive and efficient workforce with necessary supporting equipment and infrastructure.	 Enhanced workforce capacities and supportive systems; Improved functioning of local training institutions; and Improved administration, management and performance across all sectors.

Sub-Theme 1: Gender

Gender implies attributes, roles, activities, responsibilities and potentialities associated with men and women, girls and boys. In Malawi boys and girls, men and women assume culturally different identities and traits. The status is worse among females as compared to their male counterparts. For instance, a female headed household has 14 percent less consumption per capita than a male headed household mainly due to gender based differences in access and control over resources (UN Malawi, 2010).

In addition, girls and boys experience some form of GBV during their life time. For example, Burton (2005) showed that 65 percent of girls and 35 percent of boys were subjected to GBV. The experience of violence increases the risk of HIV and other sexually transmitted diseases. This could probably explain the fact that HIV prevalence among women and girls is still disproportionately higher at 12.9 percent than the national average of 10.6 percent while that of their male counterparts is at 8.1 percent (DHS, 2010).

Evidence has shown that the MDGs targets that are lagging behind have very pronounced gender connotations. This could be evidence of a policy and implementation gap in gender that a number of consecutive National Plans of Action have not been able to address effectively (UN Malawi, 2010).

Most sector plans are not clear on strategies to address gender disparities although this is recognized as being critical. Lack of gender disaggregated data, poor commitment to resource allocation towards gender mainstreaming and institutional capacity to analyze and systematically mainstream gender in all sectors remain the major challenges. In addition, other challenges include high incidences of HIV and AIDS prevalence and poverty among women and girls, increased GBV including intimate partner violence, sexual violence, human trafficking and harmful traditional and cultural practices.

Despite these challenges, a number of achievements were made during implementation of the MGDS which this development strategy will sustain and improve upon. The achievements include: increase in the proportion of women in the National Assembly from 14 percent in 2004 to 22 percent in 2009, increased number of women in decision making position in public service, establishment of victim support units, and achievement of gender parity at primary school.

Goal

To reduce gender inequalities and enhance participation of all gender groups in socio-economic development.

Medium-Term Expected Outcomes

Expected medium outcomes include:

- Increased meaningful participation of all gender groups in decision making; wealth creation and poverty reduction;
- Reduced gender based violence at all levels; and
- Enhanced gender mainstreaming across all sectors.

Key Strategies

The main strategies include:

- Promoting women entrepreneurship and involvement in cooperatives;
- Promoting equal access to appropriate technologies and micro-finance schemes;
- Advocating for affirmative action to increase representation of women in politics and decision making positions;
- Enhancing awareness on GBV;
- Strengthening GBV service delivery systems;
- Strengthening legal and regulatory framework;
- Mainstreaming gender at all levels;
- Promoting access to quality education for girls; and
- Strengthening gender disaggregated research and documentation.

Sub-Theme 2: Capacity Development

For any country to develop it requires skilled and knowledgeable work force with the appropriate supporting infrastructure and equipment, and proper institutional arrangement. Government recognizes the need to develop capacity at all levels for a successful implementation of its development programmes. This entails change of mind set, orientation of skills, work processes re-engineering, improvement of institutional set up and provision of appropriate supporting equipment.

Initiatives implemented in the public sector have had a number of positive results. These include an increased number of trained personnel in key sectors including health and education, institutional development of ministries and departments, establishment of Leadership Development Framework and implementation of the Public Sector Reform Program.

Despite these achievements, there has been lack of an enabling policy framework to co-ordinate various capacity development initiatives. There are also concerns that the country's local institutions of higher

learning do not adequately support the needs of the economy. Furthermore, there is inadequate investment in supporting infrastructure and equipment by both the public and private sectors.

Government will therefore reorient and expand existing investment in infrastructure and equipment through, among other initiatives, PPPs. It will also provide a conducive environment for the development of skills and knowledge to respond to the needs of the economy.

Goal

The goal is to develop a productive and efficient workforce with necessary supporting equipment and infrastructure.

Medium-Term Expected Outcomes

The sector's overall medium term expected outcomes include the following:

- Enhanced workforce capacities and supportive systems;
- Improved functioning of local training institutions; and
- Improved administration, management and performance across all sectors.

Key Strategies

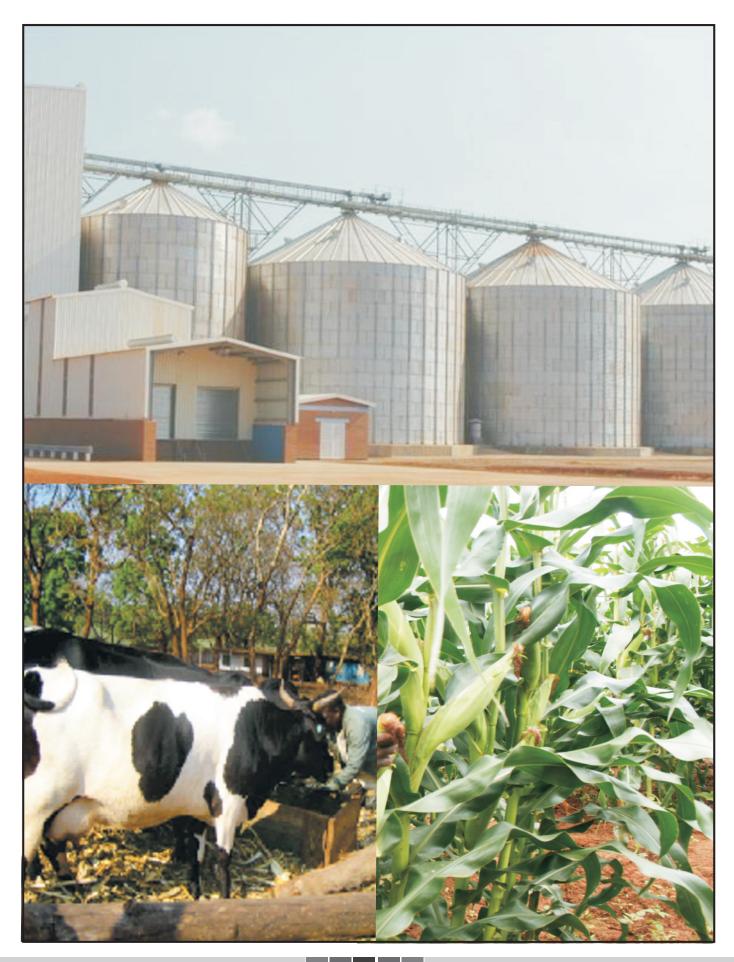

The key strategies include:

- Developing and strengthening human and institutional capacities;
- Mainstreaming capacity development in all sectors;
- Promoting effective performance management systems;
- Promoting capacity development at all levels;
- Enhancing coordination in resource mobilization and utilization;
- Promoting and establishing professional and skills development centres;
- Enhancing investments in infrastructure and equipment;
- Promoting PPPs; and
- Strengthening academic institutions to respond to the needs of the economy.

CHAPTER 5 KEY PRIORITY AREAS

MGDS II identifies nine Key Priority Areas (KPAs) which have been drawn from the six thematic areas discussed in the previous chapter. The (KPAs) have been isolated with the view to accelerate the development that has been achieved over the years. In this respect, Government will concentrate its efforts on these key priority areas in the medium-term in order to achieve its overall policy objective of economic growth as a means of reducing poverty in the country. The Key Priority Areas are: Agriculture and Food Security; Transport Infrastructure; Energy, Industrial Development, Mining and Tourism; Education, Science and Technology; Public Health, Sanitation, Malaria and HIV and AIDS Management; Integrated Rural Development; Green Belt Irrigation and Water Development; Child Development, Youth Development and Empowerment; and Climate Change, Natural Resources and Environmental Management. Table 5.1 at the end of this chapter summarizes these key priority areas.

AGRICULTURE AND FOOD SECURITY

1.0 Agriculture and Food Security

Agriculture is key to food security, economic growth and wealth creation. However, the sector faces a number of challenges including over-dependence on rain-fed farming, low absorption of improved technologies, poor support infrastructure, inadequate markets, weak private sector participation, low level of irrigation development, and lack of investment in mechanization.

As a key priority area, the main focus is to increase agricultural productivity and diversification for sustainable economic growth. Furthermore, the strategic link between agriculture and other sectors will be strengthened to ensure accelerated growth and development.

1.1 Agricultural Productivity and Diversification

The agriculture sector has been experiencing growth in productivity of maize and tobacco. However, this growth has been slow and below the expected potential. The sector therefore is still characterized by low productivity levels. The major contributing factors affecting productivity in the smallholder farming sub-sector in Malawi is low input use, over-reliance on rain-fed agriculture, inadequate access to agricultural credit, inadequate access to output and input markets, and limitations in technology development and transfer. This is further exacerbated by climate change effects such as erratic rains and droughts.

The dominance of tobacco and maize in the agriculture sector has limited the potential of other crops, hence the need for the country to develop an agricultural diversification policy. The policy will intensify diversification of traditional and non traditional crops and animals for both domestic and export markets. Efforts will therefore focus on improving access to credit, land, markets and research and development among others. The diversification policy will, among other things, endeavour to move away from tobacco.

Goal

The goal is to increase agriculture productivity and diversification.

Medium-Term Expected Outcomes

The medium-term expected outcomes include:

- Increased smallholder farmers' output per unit area;
- Increased agricultural diversification;
- Increased production of high value agricultural commodities including cotton, wheat and macadamia nuts for exports;
- Improved agricultural research, technology generation and dissemination;
- Increased livestock and fish production; and
- Reduced land degradation.

Key Strategies

- Providing effective extension services;
- Strengthening linkages of farmers to input and output markets;
- Enhancing livestock and fisheries productivity;

- Promoting appropriate technology development, transfer and absorption;
- Improving access to inputs;
- Promoting contract farming arrangements;
- Promoting irrigation farming;
- Promoting production of non traditional crops;
- Improving agricultural production for both domestic and export markets;
- Strengthening farmer institutions; and
- Promoting soil and water conservation techniques.

1.2 Food Security

Maize has remained the main staple food for Malawians hence national food security has mainly been defined in terms of access to maize. The country's self sufficiency in food has been premised on the implementation of the Farm Inputs Subsidy Programme (FISP). Other food crops such as rice, cassava, sorghum, and potatoes are alternatives to maize in many parts of the country. Furthermore, these are complemented by livestock and fish products. Therefore, this strategy will have a holistic approach to food security taking into account access to a diversified range of food products.

Goal

The goal is to ensure sustained availability and accessibility of food to all Malawians at all times at affordable prices.

Medium-Term Expected Outcomes

The medium term expected outcomes include:

- Food self-sufficiency at household and national levels;
- Increased and sustained food availability and accessibility;
- Enhanced agricultural risk management; and
- Improved agricultural market systems.

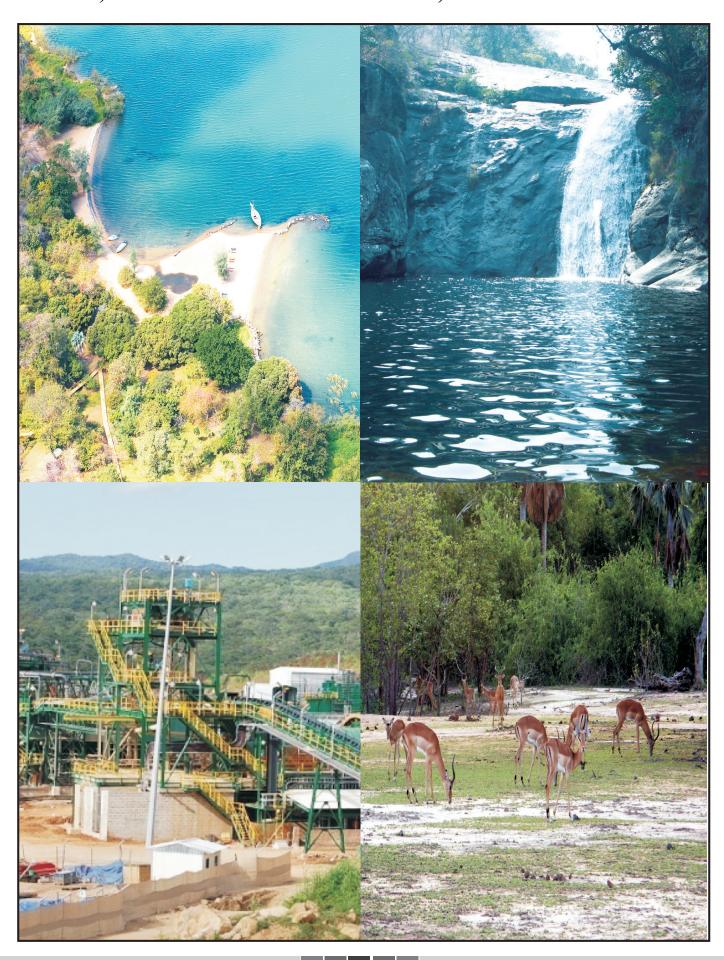

Key Strategies

Key strategies include:

- Improving the functioning of agricultural markets;
- Ensuring an effective early warning system;
- Promoting income generating activities;
- Increasing national food storage capacity;
- Promoting dietary diversification;
- Improving coordination and management of food aid and imports;
- Implementing policies to reduce dependency on food aid;
- Strengthening and scaling-up market based risk management initiatives;
- Reducing post harvest losses;
- Strengthening PPPs in agriculture;
- Providing technical and regulatory services; and
- Strengthening farmer-led extension and training services.

The agriculture sector is dominated by tobacco, tea and sugar as the major foreign exchange earners. During the implementation of this development strategy, the country will diversify by promoting

ENERGY, INDUSTRIAL DEVELOPMENT, MINING AND TOURISM

2.0 Energy, Industrial Development, Mining and Tourism

Energy, industrial development, mining and tourism have the potential to contribute towards wealth creation, foreign exchange generation, and job creation thereby improving living standards and accelerating national economic growth and development. A well-developed and efficient energy system is vital for industrial, mining, tourism and integrated rural development. Increasing generation, transmission and distribution of electricity and other energy sources will lead to improved service delivery and increased output in the economy. However, the country's energy generation and supply is inadequate to meet the current industrial, mining and tourism demands. This therefore calls for investment in the energy sector to realize full potential in the industrial, mining and tourism sectors among other areas.

Besides inadequate energy, there are a number of other constraints that negatively affect industrial development, mining and tourism. These include low compliance to standards, low investment, high transport costs and poor access to both domestic and foreign markets. Government will therefore work with the private sector to address these constraints.

2.1 Energy

Malawi continues to face a number of challenges in the energy sector including inadequate capacity to generate electricity which results in frequent blackouts and brownouts. This lack of reliable power is a key constraint to development in Malawi. The current installed capacity of 283 Megawatts is far much less than the estimated demand of 334 Megawatts. Unavailability of access to modern energy services contributes to low economic activity and productivity, lower quality of life and deters new investments across the country, in particular affecting key sectors of mining and manufacturing.

The country is currently experiencing shortages of liquid and gas fuels due to logistical problems. Government will, therefore, continue to emphasize on improving and expanding electricity generation, supply and distribution systems. In addition, government will improve supply of liquid and gas fuels to meet the increasing demand.

Goal

The goal is to generate and distribute sufficient amount of energy to meet national socio-economic demands.

Medium-Term Expected Outcomes

In the medium term it is expected that there will be:

- Improved capacity and efficiency in energy generation, transmission and distribution; and
- Increased availability and access to energy.

Key Strategies

- Developing additional power stations;
- Promoting the use of renewable sources of energy;
- Improving management of energy generation, transmission, distribution and supply;
- Enhancing urban and rural electrification;

- Increasing liquid fuel stock-holding and distribution capacity;
- Developing long-term systems of tapping and delivering liquid fuel;
- Promoting public-private partnerships in energy generation and distribution; and
- Improving regulatory environment.

2.2 Industrial Development

The development of industries is an integral part of a nation's economic growth and development. It is key to attainment of the country's aspiration of transforming from predominantly importing and consuming to producing and exporting. Currently, manufacturing sector contributes about 11 percent to the GDP but has potential of contributing more. An increase in industrial activities contributes to job creation which in turn expands the market base of the economy. Malawi's industry is facing a number of challenges such as lack of incentives, high interest rates, high transport costs, and unreliable energy supply. Consequently, there are low investments in the sub sector leading to low industrialization and exports of unprocessed products.

Considering that Malawi's population is rural based and dependent on agriculture, special attention will be given to rural industrialization and agro-processing.

Goal

The goal is to develop and expand the industrial sector with emphasis on value addition and employment creation.

Medium-Term Expected Outcomes

Medium term expected outcomes include:

- Expanded industrial base;
- Increased employment;
- Increased industrial output; and
- Increased value addition.

Key Strategies

Key strategies include:

- Promoting the use of modern environmentally friendly technologies in manufacturing;
- Facilitating accreditation of quality assurance institutions and enhancing quality standards;
- Enhancing backward and forward linkages in the industrial sector;
- Undertaking industrial reforms;
- Encouraging provision of infrastructure and support services for industrial development;
- Promoting efficient safety management practices; and
- Promoting value addition in existing and potential products.

2.2.1 Trade

Trade plays an important role in economic growth and development. For a country like Malawi, trade is of particular significance in employment creation and poverty reduction. Trade encourages technology transfer, economies of scale and competition thereby enhancing productivity and welfare gains. Malawi is undertaking a number of trade reforms such as simplified trade regime, and one stop border posts.

These reforms are aimed at improving both domestic and foreign trade.

The country's major trading partners include EU, COMESA, SADC and other emerging economies. Over the years, the country has been involved in a number of bilateral and multilateral negotiations and agreements with the view to promote market access and expand the number of its trading partners.

The sub-sector faces a number of challenges such as high transportation cost, lack of market information, inadequate energy supply, narrow market base, lack of adherence to international standards and low levels of trade expertise. On the export market, the sub-sector is currently dominated by tobacco which is facing problems due to anti-smoking lobby. It is therefore important for the country to diversify its export base away from tobacco. To address these challenges the country intends to pursue the following goal, outcomes and strategies.

Goal

The goal is to increase supply of value-added goods and services for domestic and international markets while sustaining competitive advantage.

Medium-Term Expected Outcomes

- Enhanced production, diversification and competitiveness of tradable commodities;
- Improved legal, regulatory and institutional framework; and
- Increased domestic and international market share.

Key Strategies

- Simplifying and streamlining trade and customs procedures;
- Promoting trade integration;
- Promoting consumer loyalty to domestically produced goods;
- Improving fair trading and intellectual property rights;
- Promoting efficient and modernized boarder infrastructure to facilitate trade;
- Promoting adherence to standards in tradable products;
- Promoting exports;
- Promoting trade in services;
- Promoting product and market diversification;
- Strengthening investment and export promoting institutions;
- Improving coordination amongst private sector trade institutions; and
- Improving trade network and information for exports.

2.2.2 Agro-Processing

Agro-processing in Malawi has potential to contribute effectively to the country's economic growth. However, most of Malawi's agricultural products are mainly traded as primary commodities. This is partly due to poor and inadequate supportive infrastructure, low level of vocational skills, weak marketing and distribution systems and low investment in agro-processing.

Considering that Malawi's economy is agro-based, Government has in the past five years implemented a number of initiatives including the One Village One Product (OVOP) to add value to agricultural products. Government, therefore, will continue prioritizing industries that add value to agricultural products. Focus is on sugar, tea, cotton, wheat, coffee, honey, cassava, macadamia nuts, cashew nuts, soya beans, groundnuts and chillies.

Goal

The goal is to move up the value chain in key crops, and increase agro-processed products for both domestic and export markets.

Medium-Term Expected Outcomes

- Increased value addition to agricultural products; and
- Diversified agro-processed products.

Key Strategies

Key strategies include:

- Improving supporting infrastructure for agro-processing;
- Promoting investment in agro-processing with special focus on private sector participation;
- Improving policy and regulatory frameworks impacting on agro-processing;
- Promoting OVOP on agricultural products; and
- Strengthening capacity for small and medium scale agro-processing enterprises.

2.3 Mining

Malawi has abundant mineral resources that can be exploited. These resources include bauxite, heavy mineral sands, monazite, coal, uranium, precious and semi-precious stones, limestone, niobium, dimension stones and rock aggregates. Government recognises that the development of the mining industry can significantly improve the country's foreign exchange earnings and contribute to economic growth and development. To derive maximum potential of the mining industry, Government will pursue the following goal, expected outcomes and key strategies.

Goal

The goal is to increase production and value addition of mineral resources.

Medium-Term Expected Outcomes

The medium-term expected outcomes include the following:

- Updated geological information system;
- Increased exploration and mining;
- Increased participation by small and medium miners; and
- Improved legal and institutional framework.

Key Strategies

The following are the key strategies for realizing the sector's objectives:

- Producing detailed geological map of Malawi;
- Strengthening institutional capacity of the sector;
- Developing an integrated data management system;
- Strengthening seismic monitoring;
- Promoting both local and foreign investment;

- Enforcing environmental, occupational health and safety in the mining sector; and
- Enforcing legislations on sustainable use and management of mineral resources.

2.4 Tourism

Tourism is one of the emerging sectors in Malawi. It has potential to generate revenue, employment, improve infrastructure, and promote MSMEs as well as conservation of wildlife and culture. The sector has direct linkages with other sectors of the economy.

To improve tourism, Government has undertaken a number of development projects that have transformed the tourism landscape. These include construction of access roads to tourist sites, improvement of airports and airstrips and construction of Mpale Cultural Village. In addition, Government has constructed a 1500-seater International Conference Centre which is expected to boost the tourism potential of the country.

However, a number of challenges such as poor supporting infrastructure, poor service delivery, uncoordinated and insufficient marketing of tourism products and inadequate purpose-built cultural infrastructure impede attainment of the sector's full potential.

To ensure a vibrant tourism industry, Government will pursue the following goal, outcomes and strategies.

Goal

The goal is to develop and promote a vibrant tourism industry.

Medium-Term Expected Outcomes

- Increased contribution of the tourism industry to GDP;
- Improved environment for doing business in tourism;
- Increased number of tourists; and
- Increased local participation in the tourism industry.

Key Strategies

- Providing infrastructure that is supportive to tourism development;
- Promoting the development of high-quality tourism facilities in designated areas including Lake Malawi;
- Enforcing tourism industry standards and planning controls;
- Strengthening institutional capacity at all levels;
- Promoting eco-tourism;
- Promoting participation of local investors in the tourism industry; and
- Enhancing marketing of Malawi's tourism products.

TRANSPORT INFRASTRUCTURE

3.0 Transport Infrastructure

An integrated transport system is a catalyst for development. Improved road, rail and inland water transport infrastructure is central for better domestic and international connectivity. A well developed transport infrastructure reduces lead time on imports and exports, costs of goods and services and improves access to markets and social services.

Government embarked on transport infrastructure maintenance, rehabilitation and upgrading programme during MGDS implementation. However, major focus was on road infrastructure as a result, other modes of transport infrastructure remain underdeveloped in the country. Government, therefore, will develop the other modes of transport along side road infrastructure. In this respect, Government will focus its attention on rail and water transport infrastructure while continuing with the improvement of road infrastructure. This is expected to reduce transportation costs and facilitate export-led growth.

3.1 Road Infrastructure

Road transport is the dominant mode of transport in Malawi. In this respect, the country has over the years been constructing, rehabilitating, and upgrading road infrastructure. However, most feeder roads still remain in poor condition especially in rural areas. This has been compounded by the enormous backlog road maintenance that has led to high transportation costs in most parts of the country.

Goal

The goal is to ensure provision of a safe, affordable, accessible and high quality road transport system.

Expected-Medium Term Outcomes

In the medium-term improved road transportation is expected to contribute to:

- Reduced lead times and cost on exports and imports; and
- Improved domestic and cross border mobility and connectivity.

Key Strategies

Key strategies include:

- Ensuring comprehensive and coordinating planning of road and other modes of transport;
- Providing adequate network of roads based on appropriate standards;
- Enhancing routine road maintenance and upgrading;
- Building technical and institutional capacity at all levels;
- Promoting competition in the construction industry;
- Improving management of road network throughout the country;
- Enhancing axle load control;
- Promoting high road safety standards and traffic management; and
- Enhancing PPPs in the transport system.

3.2 Rail Transport

Malawi recognizes that an efficient rail transport is relatively cheaper than road and air transport. Rail transport has potential to significantly reduce transport costs of goods and services because of its predominance in the transportation of bulk freight over long distances.

The railway infrastructure in the country is in poor condition due to lack of maintenance and inadequate investment. A study commissioned to ascertain the investment required to revamp the rail transport sub sector revealed that there is need for an urgent financial injection into this sub-sector for emergency works before overhaul rehabilitation works can commerce. The poor state of the infrastructure has greatly compromised railway safety and efficiency. The sub-sector is greatly uncompetitive despite the fact that the rail freight cost is cheaper than road and air transport.

Goal

The goal is to develop an efficient and effective rail network.

Medium-Term Expected-Outcomes

- Improved regional and international connectivity;
- Improved regulatory and institutional framework; and
- Improved rail infrastructure and reliability.

Key Strategies

Key strategies include:

- Rehabilitating and expanding the railway line and related infrastructure;
- Creating linkages to ports, industrial sites and regional and international markets;
- Promoting railway safety and environmental protection; and
- Improving operational efficiency and commercial viability of the existing railway infrastructure and levels of service.

3.3 Inland Water Transport Infrastructure

Water transport is relatively cheaper than any other mode of transport. It provides a better and cheaper alternative for transporting bulky and heavy goods domestically and internationally. Malawi has an advantage in water transport as it is endowed with lakes and navigable rivers. However, the country's water transport system is not fully developed and faces a number of challenges including dilapidated port infrastructure; ageing fleet of vessels; and capacity problems. Given the current transport constraints, this mode of transport has been prioritized to compliment other transport modes. Focus will be on the development of Nsanje world inland port and Shire-Zambezi Waterway, construction and rehabilitation of ports along Lake Malawi and acquisition of vessels.

Goal

The goal is to promote inland water transport system and improve access to the sea.

Medium-Term Expected-Outcomes

The medium term expected outcomes are:

- Improved inland water transportation system;
- Improved interface with rail; and road transport; and
- Reduced transport costs.

Key Strategies

Key strategies include:

- Developing an efficient and productive maritime transport system;
- Improving port infrastructure;
- Opening up navigable rivers;
- Promoting affordable and safe water transport system; and
- Promoting Public Private Partnerships in the industry.

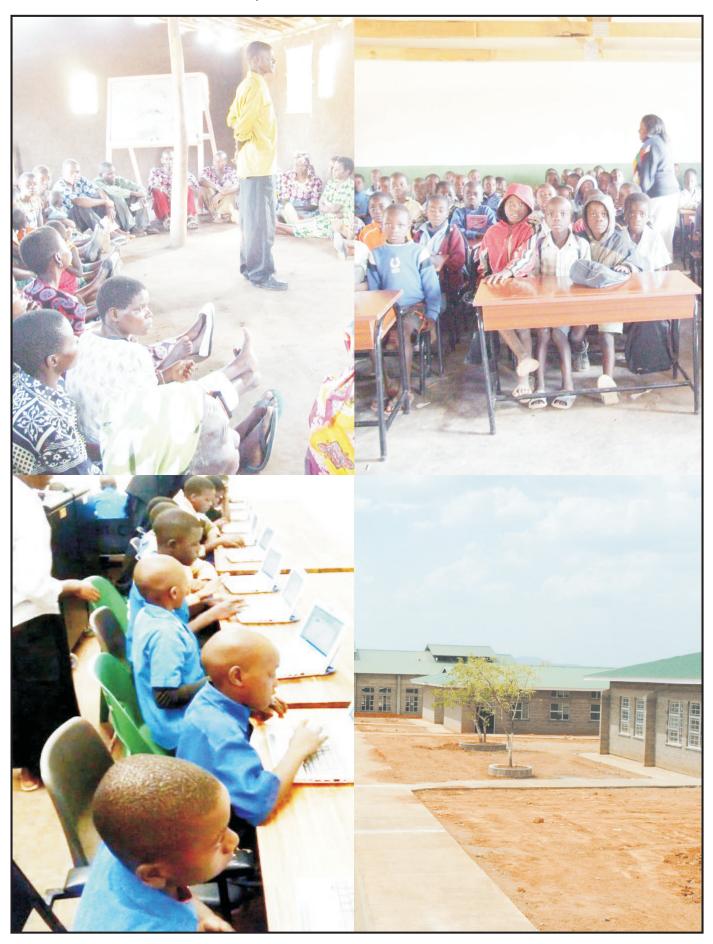

3.3.1 Nsanje World Inland Port

During MGDS implementation, the country completed the initial phase of the Nsanje World Inland Port which included construction of port berth and formal demarcation of land for development. When fully developed, the Port will integrate the four modes of transportation of road, rail, air and water into a multimodal transport system that will connect Malawi to other regional sea ports. The second phase will include construction and provision of related infrastructure and services which will eventually turn Nsanje District into a city. The port will have additional infrastructure such as an international airport that will connect the Shire Zambezi waterway to other domestic and regional airports. It will also have improved road and railway networks which will link the port to other markets and cities domestically and regionally.

The goal is to open up the country to ports along the Indian Ocean and reduce costs of goods. The medium term expected outcomes will include reduced transport costs; reduced lead times on exports; and decreased cost of shipping, low costs of cross-border and transit trade, and lower cost to reach domestic, regional and international markets.

Key activities will include dredging, acquiring vessels; constructing an international airport; maintaining and rehabilitating the railway network from Nsanje to other parts of the country; rehabilitating and constructing the road network to and from Nsanje; establishing port regulation and regulatory system; and developing social infrastructures such as schools, hospitals and markets.

EDUCATION, SCIENCE AND TECHNOLOGY

4.0 Education, Science and Technology

Education, science and technology are some of the major catalysts for socio-economic development. An educated and highly skilled population will help in accelerating economic growth and development. In addition, further developments in all sectors of the economy will require highly skilled and educated workforce and application of science and technologies. Government will continue to undertake reforms and strengthen education system, science, technology and innovation to enhance their contribution to the socio-economic development of the country.

4.1 Education

The Government recognizes the role of an educated population as a necessity for sustainable development. It is through the provision of education that people acquire relevant knowledge, skills, expertise and competencies to actively participate in socio-economic activities.

The education system in Malawi comprises three broad categories namely basic education; secondary education; and tertiary and vocational education. Basic education includes Early Childhood Development (ECD) mainly implemented in Gender and Child Development and Community Development Ministry, Primary and Out-of-School Youth and Adult Literacy. Tertiary and vocational education encompasses Teacher Education, Higher Education, and Technical and Vocational Training. Government through this strategy will continue improving quality, equity, relevance, access and efficiency in education.

In basic education, the aim will be to develop the child's full cognitive, emotional and physical potential through increased retention and completion rates. In complementing this, enrolment in secondary education will be increased, while focusing on upgrading quality, and on retention of girls. The main aim will be to provide the student with an enriched academic basis for gainful employment in the informal, private and public sectors.

Tertiary and vocational education will play a vital role in complementing basic and secondary school education. The main focus at this level will be to produce high quality professionals with relevant knowledge and skills that meet demands of the economy. Access to higher education, technical and vocational training, teacher, and university education will be increased, and universities/colleges will be expanded and rehabilitated, among other initiatives.

The education sector has embarked on a Sector Wide Approach (SWAp) to accelerate the achievement of sector outcomes. This approach aims at pulling together all stakeholders within the sector to work towards achieving similar goals and objectives. To enhance quality, equity, relevance, access, and efficiency of education at all levels, Government will pursue the following goal, outcomes and strategies.

Goal

The goal is to improve access to quality and relevant education.

Medium-Term Expected Outcomes

- Expanded equitable access to education;
- Improved quality and relevance of education; and
- Improved management and governance of the education system.

Key Strategies

Key strategies include:

- Accelerating rehabilitation of existing learning institutions and construction of additional education infrastructure at all levels;
- Establishing new universities and colleges;
- Training and recruiting additional teaching staff;
- Scaling up school meals program;
- Introducing standardized testing to measure and monitor quality of learning and teaching;
- Reviewing and reforming school and college curricula to address national needs at all levels;
- Providing adequate and relevant teaching and learning materials;
- Strengthening the provision of technical and vocational training;
- Providing a conducive environment for girls education including boarding facilities;
- Providing a conducive environment for students with special education needs;
- Promoting systematic and regular inspection of all learning institutions;
- Decentralizing the management and financing of the education system;
- Scaling up school health and nutrition, and HIV and AIDS programmes;
- Strengthening coordination and provision of ECD and CBE;
- Promoting the role of private sector and private financing in education system;
- Promoting Public Private Partnerships in the provision of education infrastructure and services;
- Strengthening education management and information systems;
- Scaling up child friendly schools programmes; and
- Increasing number of girls opting for mathematics and science subjects at all levels.

4.2 Science and Technology

Science and technology is vital for national socio-economic development. Technology is generated through continuous research, hence a well-coordinated research and development is a basis for increasing the stock of knowledge to devise and apply new technologies. In addition, increased application of technology and innovation is the main route for the creation of additional wealth through increased productivity. Government recognizes the importance of this sub-sector and will continue implementing reforms aimed at enhancing contribution of research, science and technology to economic development.

During implementation of MGDS, Government carried out a number of reforms aimed at improving research and development and application of science and technology in the country. These reforms include establishment of the National Commission for Science and Technology as an apex body in all matters of research, science and technology; introduction of science and technology as a subject at primary school level; review of the National Science, Technology and Innovation policy; and the development of the National Intellectual Property Policy.

However, the country continues to face a number of challenges and these include weak scientific and technological development and utilization; weak institutional capacity; weak linkages between research, science and technology institutions and users; limited number of institutions undertaking research and development; inadequate research and development infrastructure; lack of commercialization of results and information systems; and poor utilization of research results.

To address these challenges, Government will therefore seek to create a conducive environment for research, science and technology development by pursuing the following goal, outcomes and

strategies.

Goal

The goal is to enhance the contribution of research, science and technology to national productivity and competitiveness.

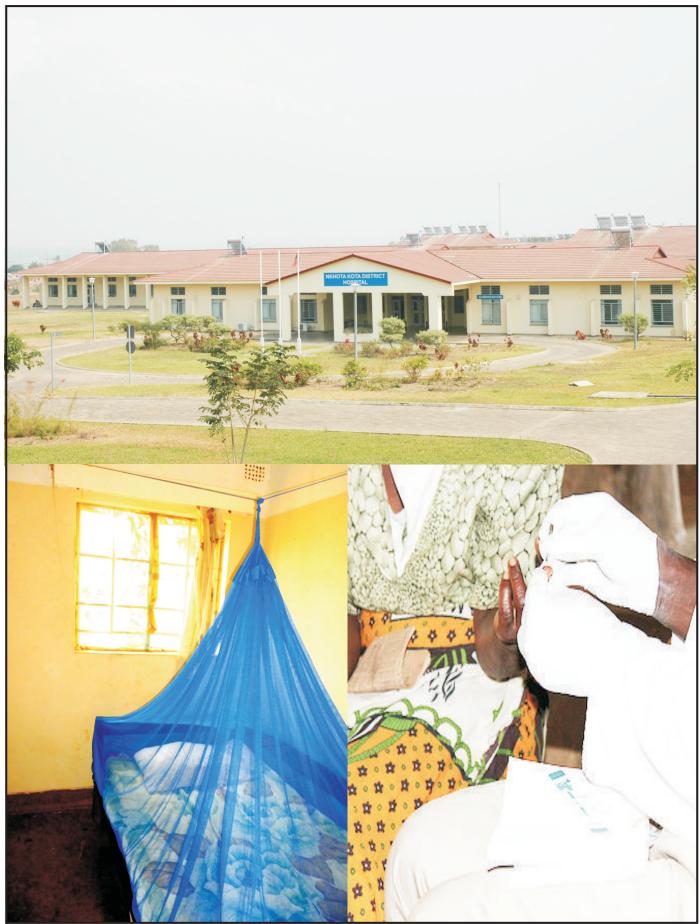

Medium-Term Expected Outcomes

- Well coordinated science and technology generation and dissemination;
- Improved operation of research and development institutions; and
- Increased adoption of appropriate technologies.

Key Strategies

- Promoting adoption, transfer and utilization of appropriate technologies;
- Promoting prioritized, focused and multi-disciplinary research and development;
- Mainstreaming research, science and technology development across all sectors;
- Enhancing linkages between research, science and technology institutions and users;
- Strengthening institutional and regulatory framework including protection of intellectual property rights;
- Strengthening capacity for research, science and technology institutions;
- Promoting IEC on research, science and technology development;
- Promoting PPPs in generating and disseminating appropriate technology; and
- Improving scientific and technological infrastructure for research and development and innovation.

PUBLIC HEALTH, SANITATION, MALARIA AND HIV AND AIDS MANAGEMENT

5.0 Public Health, Sanitation, Malaria and HIV and AIDS Management

Malawi Government recognizes that a healthy population is necessary to achieve sustainable economic growth and development. In 2004, the Government established a plan of action covering the period between 2004 and 2010, which was implemented using the Sector Wide Approach (SWAp).

In the MGDS II, Government will introduce and implement the Malawi Health Sector Strategic Plan (MHSSP) which will focus attention on the provision of quality health services using cost effective strategies to reduce mortality and morbidity. Special focus will be given to health related Millennium Development Goals (MDGs) which are not on course for achievement. The 2010 Malawi MDG Report indicates that the country is likely to reduce child mortality (MDG 4) and reduce the spread of HIV and AIDS, Malaria and TB (MDG 6) while targets for improving maternal health (MDG 5) are not on course. Malawi has relatively reduced maternal mortality from 984 deaths per 100,000 live births in 2004 to 675 in 2010. During the implementation of the MGDS II, efforts will be directed towards maternal health to meet the MDG target of 155 deaths per 100,000 live births by 2015. The disease burden due to malaria and HIV and AIDS is still high and special attention will also be directed to them.

The strategy includes most cost-effective interventions for non-communicable diseases such as cardiovascular diseases, diabetes, mental health interventions, and provision of surgical services in rural and district hospitals. To support this, the sector will direct its efforts in implementing programmes that target public health (including maternal and child health), sanitation, malaria, and HIV and AIDS management.

5.1 Public Health

Public health in Malawi mainly focuses on prevention of diseases to prolong life. It constitutes promoting good health practices and life styles through information, education and communication; controlling and preventing diseases; tackling hygiene and the broader determinants of health; and screening for diseases. Since public health interventions target communities, their delivery maximizes benefits and yield significant positive externalities in terms of individuals who do not fall sick as a result of others receiving primary and secondary prevention interventions. This reduces the burden on curative health.

Although Malawi has made progress in a number of areas in the health sector, the country continues to face a number of challenges in public health. These include high prevalence of HIV and AIDS, high incidence of malaria, Neglected Tropical Diseases (NTDs), and relatively high maternal and child mortality rates. Other challenges include emerging public health concerns such as lifestyle related diseases, and Multi Drug Resistant (MDR) tuberculosis and TB/HIV co-infection.

Government will, therefore, continue to promote and support public health programmes in the country.

Goal

The goal is to control and prevent occurrence and spread of diseases.

Medium-Term Expected Outcomes

The medium term outcomes will include:-

- Reduced incidence and prevalence of diseases;
- Improved maternal and child health;
- Increased and sustained coverage of high quality EHP services;

- Reduced health risk factors among the population; and
- Strengthened performance of health support systems.

Key Strategies

Effective delivery of quality public health service requires multi-dimensional approach including the provision, strengthening and coordination of the various health care service institutions. Main strategies will include:-

- Improving availability of essential drugs and medical supplies;
- Strengthening health support system;
- Strengthening community health service delivery system
- Improving the quality of diagnosis and treatment of communicable and non communicable diseases
- Promoting water and food safety
- Strengthening and promoting initiatives to improve prevention, diagnosis and treatment of emerging diseases such as cancer, and high blood pressure
- Strengthening availability and utilization of quality integrated family planning services
- Improving availability and access to quality integrated maternal and child care services
- Increasing geographical access to EHP services
- Increasing availability of health technologies for prevention, screening, diagnosis, treatment
- and rehabilitation
- Promoting health enhancing behaviour and life styles.
- Implementing integrated vector control management;
- Building human resource capacity at all levels
- Exploring and implementing alternative health financing mechanisms

5.2 Sanitation

Sanitation and good hygiene practices contribute to the reduction of water borne and other related diseases. A clean and healthy environment is not only essential, but also a prerequisite for a healthy and productive society. Compared to many other sub-Saharan countries, Malawi has made tremendous progress in achieving universal access to basic sanitation. Overall access to improved latrine is estimated at 46 percent; with 43 percent in rural areas and 65 percent in urban areas.

During the implementation of MGDS, the country made progress in the area of sanitation and hygiene. These include improved access to potable water from 73 percent in 2005 to 84 percent in 2009 and improved access to basic sanitation from 84 percent in 2005 to 93 percent in 2009 (WMS, 2009).

Malawi still faces a number of challenges in the area of sanitation and hygiene. These include relatively low access to improved sanitation, low access to running water, inadequate sewer facilities, unsystematic disposal of liquid, solid and other forms of waste, inadequate capacity to manage sewer facilities and inability to separate organic and inorganic components of waste to facilitate composting.

Considering the above challenges and the role sanitation plays to improve the health of the population, Government through this strategy will pursue the following goal, outcomes and strategies.

Goal

The goal is to ensure use of improved sanitation facilities and adoption of safe hygiene practices.

Medium-Term Expected Outcome

In the medium term, it is expected that there will be:

- Improved hygiene practices;
- Increased access and usage of improved sanitation facilities; and
- Improved management and disposal of waste.

Key Strategies

The key strategies include:

- Promoting utilization of improved sanitation facilities;
- Providing improved sanitation facilities in schools, health care centres, community based child care centres, markets and all other public places;
- Promoting adoption of safe hygiene practices;
- Improving management and disposal of both liquid and solid waste;
- Enhancing information, education and communication on sanitation and hygiene;
- Promoting research waste management;
- Promoting private sector participation in the provision of sanitation and hygiene services;
- Enhancing institutional capacity; and
- Strengthening regulatory frameworks.

5.3 Malaria

Malaria is endemic and continues to be a major public health problem in Malawi. It is the leading cause of morbidity and mortality in under-five children and pregnant women. It is estimated that the number of presumptive cases of malaria increased from 3.7 million in 2005 to 6.1 million in 2009. Therefore, Government has prioritized reduction of malaria cases in line with MDG commitment.

During the implementation of MGDS Government undertook a number of initiatives to combat malaria. These included distributions of insecticide treated mosquito nets (ITNs), piloted indoor residual spraying and changed the primary anti-malaria treatment from Sulphadoxine-pyremethamine (SP) to Artemether-lumefantrine (LA).

Consequently, health facility in-patient death rates due to malaria have decreased from 5.6 percent to 3.4 percent in 2004 and 2009, respectively. ITNs ownership improved from 38 percent in 2006 to 60 percent in 2010. In addition, it is estimated that in 2010, 56 percent of children under five years of age sleep under an ITN up from the 25 percent in 2006.

Realizing that Malaria is still a challenge in Malawi, Government will pursue the following goal, medium term expected outcomes and strategies.

Goal

The goal is to reduce malaria-related morbidity and mortality.

 $^{^{\}rm 7}$ Lifestyle diseases include some types of cancer , diabetes and cardiovascular.

Medium Term Expected Outcomes

- Increased coverage of malaria prevention; and
- Increased access to appropriate malaria treatment.

Key Strategies

Key strategies include:

- Promoting directly observed treatment;
- Developing capacity of community health workers in malaria case management;
- Scaling up distribution of Long Lasting Insecticide Nets (LLINs);
- Promoting draining of mosquito breeding sites and larviciding;
- Scaling up the delivery of Indoor Residual Spraying (IRS) services to other high malaria transmission districts; and
- Increasing the number of health facilities providing parasitological diagnosis of malaria.

5.4 HIV/AIDS Management

Malawi has been negatively affected by the spread of HIV and AIDS pandemic. The pandemic has increased the incidence of other opportunistic diseases such as Tuberculosis and cancer. HIV and AIDS and the resulting opportunistic diseases have affected the quality of human capital, and have increased the burden on health service delivery system.

There is a strong correlation between HIV and AIDS and nutrition status of individuals.

Good nutrition is crucial for building and maintaining the immune system to enable it fight infections. In the absence of good nutrition, the body's immune system is weak and vulnerable to attack by various infections which affect ones quality of life. One such infection is HIV and AIDS. When the body is malnourished, an individual's immune system is compromised. In addition, Anti-retroviral drug's effectiveness in undernourished HIV and AIDS patient is decreased and toxicity increased. Malnutrition also accelerates the onset of AIDS and gives rise to other related illnesses. The HIV and AIDS pandemic has worsened the dual burden of malnutrition and disease.

Adult HIV prevalence decreased slightly between 2004 and 2010, from 11.8 to 10.6 percent, respectively. Factors contributing to this positive development include increased awareness programmes in HIV prevention and behavioural change, increased access to a number of preventive interventions, increased access to HIV and AIDS Testing and Counselling (HTC) sites, and the Prevention of Mother to Child Transmission (PMTCT) programme.

Despite the successes registered, combating HIV and AIDS remains a major challenge for Malawi. For instance, the disease has rendered 12 percent of children aged 0-17 orphaned and 7 percent vulnerable, according to the 2006 Multiple Indicator Cluster Survey (MICS). In addition, there is still low uptake of PMTCT services among pregnant women and low uptake of Anti-Retroviral Therapy (ART) among children and continued prevalence of cultural practices that enhance HIV transmission. In this regard, Government will implement strategies that are aimed at promoting prevention of new infections.

Goal

The goal is to prevent spread of HIV infection and mitigate the health, socio-economic and psychosocial impact of HIV and AIDS.

Medium-Term Expected Outcomes

The expected outcomes include:

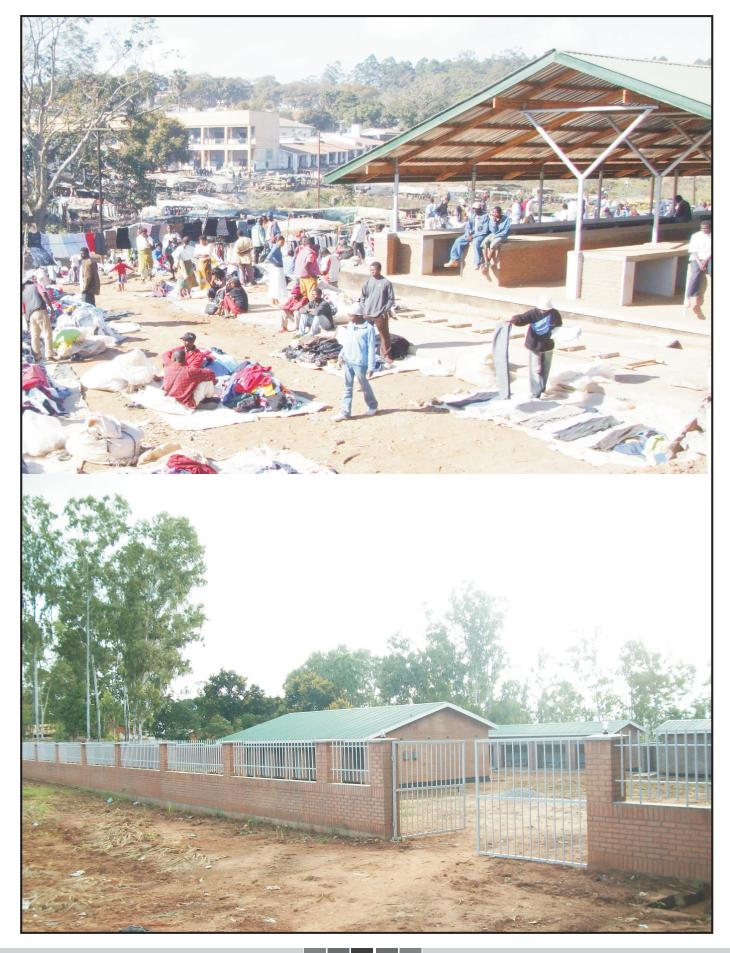

- Reduced HIV infection and transmission rate;
- Improved quality of lives of People Living with HIV (PLHIVs), OVCs and affected individuals and households; and
- Improved dietary practices of PLHIVs, OVCs and affected individuals and households.

Key Strategies

The expected outcomes above will be achieved through implementation of the following key strategies:

- Promoting interventions that reduce HIV transmission;
- Promoting HIV Testing and Counselling;
- Promoting Prevention of Mother-to-Child Transmission of HIV;
- Enhancing capacity of health care delivery system to manage HIV and related illnesses;
- Promoting access to continuum of HIV treatment and care services;
- Promoting access to quality Community Home Based Care (CHBC), palliative care and other support services;
- Promoting support to PLHIVs, OVCs and affected individuals and households;
- Promoting mainstreaming of HIV and AIDS;
- Promoting effective coordination and management of the national HIV and AIDS response;
- Promoting food and nutrition security among HIV and AIDS affected households;
- Promoting reintegration of eligible PLHIV into economic activities; and
- Promoting HIV and AIDS advocacy and awareness campaigns.

INTEGRATED RURAL DEVELOPMENT

6.0 Integrated Rural Development

Malawi's population is rural-based, with the majority depending on rain-fed agriculture and lacking access to basic amenities such as roads, health facilities, schools, markets, power supply, and water and communication infrastructure. Thus improving access to basic amenities is critical to improving living standards of rural communities and national development. Considering the need to improve the livelihoods of the rural communities, government will use an IRD approach. In this regard, initiatives like One Village One Product (OVOP), Malawi Rural Development Fund (MARDEF), Youth Enterprise Development Fund (YEDEF) and Local Development Fund (LDF) will play a crucial role in improving rural livelihoods.

IRD aims at resuscitating rural economies and transforming them into potential drivers of economic growth and development. Furthermore, it sets a platform for empowering rural people to exploit socioeconomic opportunities and tackle challenges for securing their livelihoods. Poverty in Malawi is pervasive in rural areas with the latest Welfare Monitoring Survey putting the national poverty incidence at 39 percent in 2009. The persistence of rural poverty has moved government to a new consensus on addressing poverty reduction with the aim of leading rural areas to more efficient ways of tapping into development potential to improve their livelihood.

Efforts made to assist the poorest citizens of the country include community development programmes, FISP and a nationwide public works programme for 'cash transfer safety net activities'. Development projects included the construction of school buildings; teacher's houses and clinics; water supply schemes; subsidy programmes and the improvement of other rural social infrastructure. However, these programmes alone cannot achieve sustainable improvements in the livelihoods of the poor, nor generate sustainable long term economic growth due to lack of coordination, harmonization, resources and weak financial management systems.

Government, therefore, through this strategy will pursue the following goal, expected outcomes, and strategies.

Goal

The goal is to improve rural livelihoods.

Medium Term Expected Outcomes

- Improved local governance systems and structures;
- Well coordinated local development planning;
- Improved investment in rural areas;
- Increased rural incomes;
- Strengthened rural participation in development programmes; and
- Reduced rural-urban migration.

Key Strategies

- Promoting income generating programmes;
- Improving access to basic amenities;
- Ensuring equal access to socio-economic opportunities;

- Strengthening local institutional capacity;
- Strengthening capacity of rural households to exploit income generating opportunities;
- Promoting local economic development;
- Promoting conducive environment for private sector investment;
- Promoting the establishment of rural growth centres and satellite model villages; and
- Promoting rural electrification programme.

GREEN BELT IRRIGATION AND WATER DEVELOPMENT

7.0 Green Belt Irrigation and Water Development

Malawi depends on rain-fed agriculture to achieve food security, increased incomes and sustainable economic growth. Over-dependence on rain fed agriculture has led to low agricultural production and productivity due to weather shocks and natural disasters. Conversely, Malawi is endowed with vast water resources covering about 30 percent of the country. A well developed water system is therefore critical for irrigation intensification, potable water accessibility and sanitation. Government, through this strategy, will therefore prioritise Green Belt Irrigation (GBI) and water development.

7.1 Green Belt Irrigation

Green Belt Irrigation has the potential to increase agricultural production and productivity through intensified farming. Green Belt Irrigation will utilize the available abundant water resources in the country and increase area under irrigation from 90, 000 hectares to 400,000 hectares out of the potential 1,000,000 hectares. This will improve food security and rural livelihoods; promote agricultural diversification and value addition; reduce rural-urban migration; and contribute to sustainable economic growth and development. Government through this strategy has prioritized Green Belt Irrigation by pursuing the following goal, expected outcomes, and key strategies.

Goal

The goal is to increase agricultural production and productivity through intensification of irrigation.

Expected-Medium Term Outcome

The expected medium term outcomes include:

- Increased land under irrigation;
- Reduced dependence on rain-fed agriculture;
- Increased agricultural production and productivity; and
- Increased household income levels.

Key Strategies

The following are the key strategies to be pursued:

- Promoting development of areas with irrigation potential;
- Promoting rehabilitation of irrigation infrastructure;
- Promoting research and use of appropriate technologies in irrigation;
- Enhancing IEC on irrigation;
- Enhancing technical and administrative capacities in irrigated agriculture; and
- Promoting the establishment of a well coordinated marketing system for products from irrigation farming.

7.2 Water Development

Water is an important resource for life, agriculture and industrial development. Recent economic developments and population growth in Malawi have increased the demand for water in both rural and urban areas. Government has, therefore, put high priority on water resources management and development.

In recent years, access to potable water has improved throughout the country. Statistics show that total water supply coverage has increased from 58 percent in 2004 to 76 percent in 2009. In 2008 water supply coverage in rural areas of Malawi was at 64 percent from 58 percent in 2004. Despite these achievements, there are considerable challenges facing the country in the water sector. These include relatively low access to potable water, aging infrastructure, inadequate maintenance capacity, theft and vandalism resulting in more than 30 percent non-functionality of the infrastructure.

In this respect, Government will continue developing the water sector. Focus will include construction of dams, establishment of piped water systems and drilling of boreholes where gravity fed systems cannot work.

Goal

The goal is to improve access to water through an integrated water management system.

Expected-Medium Term Outcome

- Well developed and managed water resources; and
- Increased access to safe water points within 500m distance.

Key Strategies

- Promoting development of potential multi-purpose dam sites and groundwater resources;
- Improving existing water infrastructure;
- Enhancing water resources monitoring, preservation, development and management;
- Promoting user friendly technologies for water resources conservation and utilization;
- Promoting the empowerment of local communities in water resources development and management;
- Strengthening research in water resources development and management;
- Increasing number of people connected to piped water supply systems in both urban and rural areas:
- Strengthening institutionalization of practical operations and maintenance framework at all levels;
- Strengthening and institutionalizing monitoring and evaluation system for water services;
- Enhancing information, education and communication;
- Promoting private sector participation in the provision of water services;
- Promoting equitable distribution of water points to rural areas through GPS mapping; and
- Enhancing institutional capacity at all levels.

CHILD DEVELOPMENT, YOUTH DEVELOPMENT AND EMPOWERMENT

8.0 Child Development, Youth Development and Empowerment

About 54 percent of the total population in Malawi is younger than 18 years (PHC, 2008). With such a young population, dependence ratio in the country is high. This places heavy economic burden on the working population and puts pressure on the provision of basic needs and social services. The country's young population is characterized by high incidences of poverty, violence, HIV and AIDS, malnutrition, abuse, poor health, high illiteracy rates and psychological disorders.

In order to protect and harness potential of young people, Government has included Child Development and Youth Development and Empowerment as a priority in this development strategy. Focus will be on the following social support; early childhood development; child protection; child survival and development; child and youth participation; economic empowerment; youth health; HIV prevention among youth and adolescents; institutional capacity development and infrastructure development.

8.1 Child Development

In Malawi, children aged 0 to 9 years constitute the majority of the total population. According to the 2008 Population and Housing Census, approximately 4.3 million persons of the total population of 13.1 million were children. Children are directly affected by problems stemming from poverty. This is manifested through child labour, high illiteracy rates, poor health, high incidence of malnutrition, high levels of child abuse and neglect.

To address these challenges, Government will establish a National Plan of Action for children and will pursue the following goal, outcomes and strategies.

Goal

The Goal is to ensure that children grow into productive and responsible citizens.

Medium-Term Expected Outcomes

In the medium term, it is expected that Malawi will have attained:

- Improved equitable access to quality child development services;
- Reduced number of children living below the poverty line; and
- Strengthened national child protection systems to reduce children's vulnerability to violence, abuse, and exploitation.

Key Strategies

In responding to the challenges being faced, government will implement the following strategies:

- Protecting children against abuse, exploitation, neglect and violence;
- Eliminating harmful cultural practices;
- Promoting access to education, nutrition, health, counselling and HIV prevention services;
- Reducing the adverse effects of poverty on children;
- Promoting early childhood development and pre-primary education;
- Establishing a legal and institutional framework for the promotion of early childhood development services;
- Promoting the integration of child issues in sectoral policies and strategies;
- Strengthening inter-sectoral coordination and capacity of all stakeholders;

- Strengthening support to children infected and/or affected by HIV and AIDS;
- Strengthening advocacy and awareness on child issues;
- Establishing a system for timely birth registration for children;
- Promoting exclusive breastfeeding practices for children aged 0-6 months;
- Promoting optimal feeding practices for children aged 6-24 months and beyond; and
- Promoting alternative care systems for vulnerable children.

8.2 Youth Development and Empowerment

The youth constitute a significant proportion of Malawi's population. The 2008 Population and Housing Census reports that 40 percent of the population is young aged 10 to 29 years. With time, the youth population has been growing and this has implications on the socio-economic development of the country. Investments in the current generation of young people will among other things improve productivity, reduce health costs and enhance social capital. The youth constitute a growing labour force of the country; failure to respond to their needs further aggravates poverty levels. Therefore Government, through this strategy, will pursue the following goal, outcomes and strategies.

Goal

The goal is to enhance effective youth participation in economic activities.

Medium-Term Expected Outcomes

In the medium term, it is expected that Malawi will have attained:

- Increased absorption of skills, technology and innovations by the youth;
- Increased youth participation in decision making processes; and
- Improved coordination of youth programs.

Key Strategies

The expected outcomes above will be achieved through implementation of the following key strategies:

- Improving youth's technical, vocational, entrepreneurial and life skills;
- Improving youth's access to credit facilities for entrepreneurship;
- Promoting youth participation in the decision making processes;
- Constructing and rehabilitating sports infrastructure;
- Building and strengthening the capacity of institutions that are responsible for coordination and delivery of youth development and sports services;
- Strengthening and establishing youth development centres; and
- Improving access to Youth Friendly SRH, HIV and AIDS services; and
- Eliminating GBV, harmful cultural practices, abuse and trafficking.

CLIMATE CHANGE, NATURAL RESOURCES AND ENVIRONMENTAL MANAGEMENT

9.0 Climate Change, Natural Resources and Environmental Management

Natural resources form a principal source of social well being and economic development in Malawi. However, these resources are under constant stress from unprecedented human, industrial and other developmental activities which if not curbed might generate serious long-term impacts. The Malawi UNCA Report (2010) estimates that unsustainable natural resource use cost Malawi about US\$ 191 million, or 5.3 percent of GDP in 2010. These activities have resulted into a reduction in the proportion of land under forest cover from 41 percent in 1990 to 34.5 percent in 2010 (MDGs Annual Report, 2010). This is compounded by increased climate variations experienced in the form of prolonged dry spells, droughts, intense rainfall, floods and temperature variability. This has in turn negatively affected the performance of sectors such as agriculture, natural resources, forestry, water and irrigation, energy, infrastructure, manufacturing, transport, tourism, and trade, among others.

During the implementation of the MGDS, various achievements were realized including enhanced early warning and improved weather information systems; increased land area under industrial plantations from 1,609 ha in 2005 to 5,784 ha in 2010; reduction in tonnage of ozone depleting substances such as CFC from 5.9 tonnes in 2005 to almost zero in 2009 and increased public awareness on environment and natural resources management.

Despite the achievements highlighted above, a number of challenges still exist which include: accelerated deforestation and poor land use and management practices; depletion and degradation of land and water based resources; weak information management systems; weak regulation enforcement mechanism; and inadequate mainstreaming of climate change issues in government policies and programs. The focus will be in the areas of climate change, natural resources and environment.

9.1 Climate Change Management

Malawi experiences a number of adverse climatic hazards such as prolonged dry spells, droughts, unpredictable rainfall patterns, floods and increased temperatures. Recently, these have increased in frequency, intensity and magnitude. This is partly attributed to effects of climate change and in all likelihood will worsen in the future.

Climate change effects also result in loss of human and animal life; compromised water quality leading to diseases such as diarrhoea, cholera and malaria and infrastructure loss. In addition, effects of climate change have adverse impacts on agriculture, fisheries, wildlife, gender, energy, education, health, and forestry sectors. Numerous reports on Climate change indicate that disasters related to climate change have escalated with time. Between 1970 and 2006, Malawi experienced over 40 weather related disasters most of which occurred in the late 1990s. It is estimated that the 1992 drought reduced the country's maize production by 60 percent of its normal year production bringing about a 10 percent reduction in the country's GDP (NAPA, 2006). It is therefore, necessary for the country to mainstream climate change mitigation and adaptation measures in all sectors for improved resilience and sustainable development.

Malawi, just like many developing countries, is vulnerable to effects of climate change. In recognition of this, Government has accorded special attention to climate change in this national development strategy. On its path towards climate resilient growth, Malawi, therefore aims at pursuing the following goal, outcomes and strategies.

Goal

The goal is to enhance resilience to climate change risks and impacts.

Medium-Term Expected Outcome

The medium term expected outcome is improved climate change mitigation and adaptation measures.

Key Strategies

Key strategies include:

- Improving weather and climate monitoring, prediction systems, and information and knowledge management systems;
- Promoting dissemination of climate change information for early warning, preparedness and response;
- Developing and harmonizing climate change related strategies, policies and legislation;
- Mainstreaming climate change issues in sectoral policies, plans and programmes;
- Promoting climate change related education, training, awareness and capacity building;
- Enhancing implementation of climate change mitigation and adaptation programmes;
- Implementing a comprehensive national climate change investment plan;
- Enhancing cross sectoral co-ordination of climate change programmes;
- Enhancing legal and regulatory framework on climate change; and
- Developing and implementing appropriate green house gas mitigation programmes and actions.

9.2 Natural Resources and Environmental Management

Malawi is endowed with a diversity of natural resources including fertile soils, forests, abundant water, diverse flora and fauna. Approximately 80 percent of the country's population depends on natural resources for their subsistence and household income. Natural resources and environment play a significant role in influencing social and economic development in Malawi. However, increasing population growth coupled with high poverty levels have led to an increase in exploitation of natural resources. Inadequate alternative livelihoods, unaffordable energy technologies and uncoordinated policies have exacerbated environmental degradation leading to social and economic consequences.

Government will therefore implement the following goal, outcomes and strategies to address the above challenges.

Goal

The goal is to ensure sustainable management and utilization of the environment and natural resources.

Medium-Term Expected Outcomes

- Improved regulatory framework for harmonized environmental and natural resource management; and
- Improved environmental and natural resource management; and
- Reduced environmental pollution and degradation.

Key Strategies

Key strategies include:

• Improving coordination of environment and natural resource programmes;

- Developing capacity for Environment and Natural Resource Management (ENRM);
- Enforcing compliance to environmental and natural resource management legislation;
- Enhancing mainstreaming of environment and natural resource management issues in sectoral policies and programmes at national and local levels;
- Promoting biodiversity conservation programs;
- Promoting development and implementation of Clean Development Mechanism (CDM),
- voluntary carbon markets and Reduced Emissions from Deforestation and Degradation of Forest (REDD) projects;
- Promoting projects on waste management;
- Harmonizing environment and natural resources management policies and legislation;
- Strengthening education and public awareness programmes on environment and natural resources management;
- Promoting use of environmentally friendly technologies and practices; and
- Enhancing environmental protection, restoration and rehabilitation.

The following Table 5.1 shows the key priority areas, goals and medium term expected outcomes.

Table 5.1: Summary of Key Priority Areas

Key Priority Area	Goal	Medium Term Expected Outcomes
1.Agriculture and Food	Security	
1.1 Agricultural Productivity and Diversification	Increase agricultural productivity and diversification.	 Increased smallholder farmers' output per unit area; Increased agricultural diversification; Increased production of high value agricultural commodities for exports; Improved agricultural research, technology generation and dissemination; Increased livestock and fish production; and Reduced land degradation.
1.2 Food Security	Ensure sustained availability of food to all Malawians at all times at affordable prices.	 Food self – sufficiency at household and national levels; Increased and sustained food accessibility; and Enhanced agricultural risk management.
	velopment, Mining and Touris	
2.1 Energy 2.2 Industrial Development	Generate and distribute sufficient amount of energy to meet national socio economic demands Develop and expand industrial sector with emphasis on value addition	 Improved capacity and efficiency in energy generation, transmission and distribution; and Increased availability and access to energy. Expanded industrial base; Increased employment; Increased industrial output; and
	and employment creation	Increased value addition.
2.2.1 Trade	Increase supply of value- added goods and services for domestic and international market while sustaining competitive advantage.	 Enhanced production, diversification and competitiveness of tradable commodities; Enhanced access to both traditional and emerging export markets; Improved legal, regulatory and institutional framework, and Increased domestic and international market share.
2.2.2 Agro-Processing	Move up the value chain in key crops, and increase agro-processed products for both domestic and export markets.	 Increased value addition to agricultural products; and Diversified agro-processed products.

2.2 7/2:	Turner 1 22	
2.3 Mining	Increase production and value addition of mineral	Updated geological information system; Leading and explanation and explanation.
	resources.	Increased exploration and mining; Increased participation by small and medium.
	resources.	• Increased participation by small and medium miners; and
		Improved legal and institutional framework.
2.4 Tourism	Develop and promote a	Increased contribution of the tourism industry to
	vibrant tourism industry.	GDP;
		• Improved environment for doing business in
		tourism;
		 Increased number of tourists; and
		• Increased local participation in the tourism

5.2 Sanitation	Ensure use of improved sanitation facilities and	• Improved hygiene practices;
	adoption of safe hygiene	Increased access and usage of improved sanitation facilities and
	practices.	facilities; and Improved management and disposal of waste.
5.3 Malaria	Reduce malaria-related	 Improved management and disposal of waste. Reduced incidence of malaria;
S.S IVIAIAI IA	morbidity and mortality.	 Reduced incidence of malaria; Increased coverage of malaria prevention; and
	moroidity and mortanty.	 Increased coverage of malaria prevention; and Increased access to appropriate malaria treatment.

5.4 HIV and AIDS Management	Prevent spread of HIV infection and mitigate the health, socio-economic and psychosocial impact of HIV and AIDS.	 Reduced HIV infection and transmission rate; Improved quality of lives of People Living with HIV (PLHIVs), OVCs and affected individuals and households; and Improved dietary practices of PLHIVs, OVCs and affected individuals and households.
6.0 Integrated Rural Development	Improve rural livelihoods.	 Improved local governance systems and structures; Well coordinated local development planning; Improved investment in rural areas; Increased rural incomes; Strengthened rural participation in development programmes; and Reduced rural-urban migration.
	and Water Development	
7.1 Green Belt Irrigation	Increase agricultural production and productivity through intensification of irrigation	 Increased land under irrigation; Reduced dependence on rain-fed agriculture; Increased agricultural production and productivity; and Increased household income levels.
7.2 Water Development	Improve access to water through an integrated water management system	 Well developed and managed water resources; and Increased access to safe water points within 500m distance.
	Youth Development and Empo	
8.1 Child Development	Ensure that children grow into productive and responsible citizens.	 Improved equitable access to quality child development services; Reduced number of children living below the poverty line; and Strengthened national child protection systems to reduce children's vulnerability to violence, abuse, and exploitation.
8.2 Youth Development and Empowerment	Enhance effective youth participation in economic activities.	 Increased absorption of skills, technology and innovations by the youth; Increased youth participation in decision making processes; and Improved coordination of youth programs.
9.0 Climate Change, Nat	ural Resources and Environm	ental Management
9.1 Climate Change Management	Enhance resilience to climate change risks and impacts.	Improved climate change mitigation and adaptation measures.
9.2 Natural Resources and Environmental Management	Ensure sustainable management and utilization of the environment and natural resources.	 Improved environmental and natural resource management; Improved regulatory framework for harmonized environmental and natural resource management; Reduced environmental pollution and degradation.

CHAPTER 6 IMPLEMENTATION FRAMEWORK

6.1 Implementation Modalities

The MGDS II has been developed to allow all stakeholders to participate in the development of the country. Its implementation will, therefore, involve all stakeholders, including the three arms of Government: the Executive, Parliament, and Judiciary; and civil society and Faith Based Organizations (FBOs); private sector and the general public. Government will lead the implementation process through technical coordination and its consolidated national budget. It is expected that all stakeholder institutions including donors, development and co-operating partners will continue to align their activities and support to this national development agenda, MGDS II.

The alignment to the budget will be critical for its successful implementation. The Ministry of Economic Planning and Development and the Ministry of Finance will facilitate and ensure that all ministries and departments align their sectoral plans, activities and budgets to the development strategy. Wherever sectoral plans do not exist, efforts should be made to develop them. Budget submissions, therefore, will be expected to include only activities that are aligned to this national strategy.

To ensure that the MGDS II is formulated, implemented and monitored with full participation of all stakeholders, Government instituted Sector Working Groups (SWGs). Membership of the SWGs is diverse and includes line Ministry clusters, civil society, private sector, non-government organizations, donors and cooperating partners. The private sector was included as an active partner in all the Sector Working Groups to enhance dialogue between Government and the private sector led growth.

A summary operational table is presented in Annex 1 to guide the implementation of the MGDS II. This table represents strategies, actions and expected outcomes of the MGDS II. As conditions change during implementation, progress made against the activities, outputs and medium term expected outcomes will be assessed to make necessary adjustments. Such assessment will be made based on information coming from sector ministries as well as other stakeholders.

MGDS II has identified six thematic areas from which the nine key priority areas have been isolated. The following have been identified as critical issues that must be pursued to achieve the set goals and targets of the MGDS II:

- Political will and change of the mind set;
- Government and Parliament will play their constitutional roles in ensuring that the ultimate objective of MGDS II is achieved thereby taking the country towards achieving the long-term goals;
- Government will continue to improve donor coordination through the development and adherence to the Development Assistance Strategies (DAS);
- Donors and co-operating partners will align their support and activities to the MGDS II. Government will lead the dialogue with donors on this alignment and seek to ensure that aid flows are predictable. On its part, Government will seek to ensure that resources are disbursed in a timely manner;
- There is need to develop a strong, motivated and committed civil service that will ensure that Government remains committed to its policies, targets and obligations; and
- There is need to put in place mechanisms and modalities for implementing activities that require heavy financial investments. These include development of PPPs; and build, operate and transfer initiatives.

6.2 Roles of Key Stakeholders in the Implementation of the MGDS II

Government: The main responsibility of Government shall be to provide public goods and services as well as regulatory framework. These include roads, railways, airports, education, health services, and social services among others. It shall also provide the necessary environment and incentives to promote private sector activities. Government shall safeguard the interests of all Malawians by correcting market failures through policy, legal and regulatory framework reviews.

Parliament: The Parliament will continue to enhance Parliamentary oversight, transparency and accountability in the implementation of the MGDS II. This will be done through members of parliament involvement in the scrutinisation, consideration and approval of Government budgets, reviewing and making laws. It shall ensure that the budget is being used to provide resources for the prioritised activities in the MGDS II. In this regard, the interests and priorities of Malawians shall be protected.

Private Sector: The role of the private sector is to invest in both economic and social sectors to generate economic growth and create wealth. In this context, the private sector is expected to take up opportunities outlined in the MGDS II during its implementation. The scope of the private sector participation will be widened to involve them in the provision of other public goods and services through PPPs.

Civil Society: The role of the civil society in the implementation of the MGDS II is to implement some specific activities in various sectors and to complement government's oversight and accountability functions to safeguard the interests of Malawians.

Donors, Development and Co-operating Partners: The role of donors, development and co-operating partners shall be to assist across the board with financial and technical resources to implement the activities outline in the MGDS II. In doing so, they will be expected to support and align their activities with the MGDS II priorities.

Community: The role of the community will be to ensure smooth implementation of development activities through participatory planning, implementation, monitoring and evaluation. In addition, the community will contribute in kind towards some development activities.

6.3 Monitoring and Evaluation

Effective monitoring and evaluation of the activities of the MGDS II are critical for realization of set goals and outcomes. First, the process provides essential data and insights for drawing lessons, priority setting and informed review of the MGDS II implementation processes. Second, the process offers the assurance that resources, including donor funds, are used for agreed purposes. Financial monitoring, through PETS, will track the financial information that relate to the strategy's resources with a view to maintaining an account of how and where these are applied. Good quality financial monitoring is critical to the effective implementation of the MGDS II and to accountability in the use of resources. Equally noteworthy, the integrity of the Government's financial monitoring and reporting has a bearing on the degree to which stakeholders may have faith in the system before they can consider providing increased support.

During the implementation of MGDS, the M & E system was strengthened through the district and community level monitoring mechanism. This development strategy incorporates a system to monitor inputs, outcomes and impacts so that resources can be strategically managed and progress tracked. This process helps to distinguish the MGDS II monitoring from traditional project monitoring. The

monitoring system will feed information back into the processes of governing and decision-making, making it a vital public management tool. To enable regular and quality reporting, key performance indicators have been identified for each sector. These indicators will help to focus efforts and resources for evaluating sector performance. To strengthen this, outcome and output indicators have clearly been separated to track every level of progress in the implementation process.

The monitoring of MGDS II will be in accordance with Monitoring and Evaluation Master Plan developed by the Ministry of Economic Planning and Development, the Ministry of Finance, the Ministry of Local Government and Rural Development and the NSO. The stakeholders will align indicators in accordance with the MGDS II themes and key priority areas. A set of impact level monitoring indicators has been developed and is presented in Annexes.

The summary operational matrix provides a summary of objectives that can also be monitored by line ministries. This will be used in the budget discussion processes and reviews of the MGDS II to track progress toward the impact indicators during implementation.

6.4 National M&E Framework

The implementation framework for MGDS II has taken into account all players who participate in the decision making for the development of the country (Figure 2).

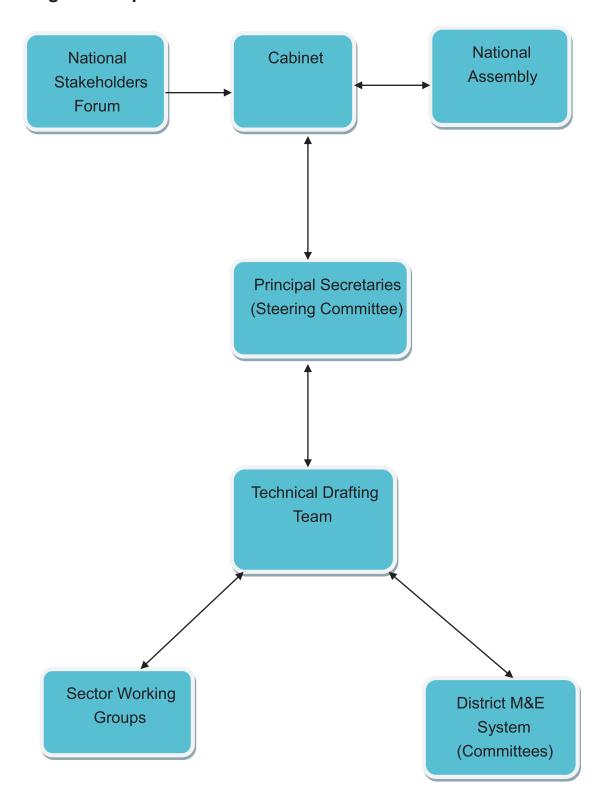

Figure 2: Implementation Framework for MGDS II

At the Cabinet level the MGDS II will be chaired by the President. The Cabinet will review the annual progress in the implementation of the MGDS II. It is expected that various ministries will brief the Cabinet based on reports on the actual outputs and outcomes of the implementation of the strategy. Meanwhile the Minister of Economic Planning and Development will have a detailed report on the progress of the implementation that will act as a back up to sectoral presentations.

Prior to the budget session of Parliament, all parliamentarians will comment on the progress of the implementation of the strategy. The Parliament will base their debates from the mid-year development

reports as well as annual development reports produced by Ministry of Economic Planning and Development. The development report will articulate all issues outlined in the budget that are in line with the MGDS II.

The Secretary for Economic Planning and Development will present the progress report of the implementation to the entire meeting of the Principal Secretaries chaired by Chief Secretary. The Principal Secretaries as Controlling Officers are supposed to take necessary measures regarding issues raised in the mid-year and annual development reports.

There will be a technical drafting team in place and it will consist of development partners, senior civil servants, civil society and private sector. The committee will be chaired by Director of Monitoring and Evaluation in the Ministry of Economic Planning and Development. The Chair will prepare documentation for the Principal Secretaries' meetings.

In order to improve monitoring of the implementation of the MGDS II, Government will develop a vibrant monitoring and evaluation system with a view to producing brief quarterly monitoring and evaluation reports. The Government will continue to develop capacity at both sector and district levels to monitor the implementation process. The Government will also strengthen monitoring and evaluation capacity at the local authority levels. All monitoring and evaluation activities of the MGDS II will be coordinated by Ministry of Economic Planning and Development.

The monitoring reports will be circulated widely for information sharing and advocacy. Ministry of Information and Civic Education will disseminate some of the information using different methods including the government website.

6.5 Financing and Budgetary Allocations

The MGDS II will largely be financed through three sources, namely: domestic revenues; external grants; and borrowing (both internally and externally). Additionally, PPPs for infrastructure programmes shall be encouraged. Other likely sources of financing are regional and international financing initiatives. A summary of the estimated national budgetary allocations to the key priorities and thematic areas is presented in table 6.1 below.

Table 6.1: Estimated Budgetary Allocations to Themes and Key Priority Areas (Percentage of Planned Fiscal Expenditures)

	Themes	2010/11	2011/12	2012/13	2013/14	2014/15	2015/16
1	Sustainable Economic Growth	18.9	22.6	22.4	20.2	19.0	18.5
2	Social Support and Disaster Risk Management	0.2	0.2	1.0	1.0	1.0	2.0
3	Social Development	37.1	37.4	37.8	38.1	38.6	39.1
4	Infrastructure Development	19.5	16.0	17.8	18.5	19.2	19.3
5	Improving Governance	24.1	23.5	21.0	22.0	22.0	21.0
6	Gender and Capacity Development	0.2	0.2	0.3	0.2	0.2	0.1
	Total	100	100	100	100	100	100

Note: Out of the total for the Themes, an allocation of an average of 77 percent will be directed towards the KPAs over the Strategy period.

	Key Priority Areas (KPAs)	2010/11	2011/12	2012/13	2013/14	2014/15	2015/16
1	Agriculture and Food Security	13.8	14.5	14.3	13.0	11.6	10.9
2	Energy, Industrial Development, Mining and Tourism	1.7	2.8	4.0	4.3	4.8	4.4
3	Transport Infrastructure	16.8	12.0	12.6	13.0	13.2	13.8
4	Education, Science and Technology	19.1	21.1	21.2	21.3	21.8	21.9
5	Public Health, Sanitation, Malaria and HIV/AIDS Management	17.9	16.1	16.3	16.5	16.3	16.5
6	Integrated Rural Development	1.8	4.8	3.9	4.0	4.1	4.6
7	Green Belt Irrigation and Water Development	2.0	2.8	3.6	2.7	2.8	2.4
8	Child Development, Youth Development and Empowerment	0.8	1.2	1.1	1.1	1.4	1.6
9	Climate Change, Natural Resources and Environmental Management	1.8	1.1	1.0	1.2	1.3	1.1
	Total	75.7	76.3	78.2	77.1	77.2	77.2

Note:

- 1. Expenditure proportion towards Agriculture will be not less than 10% as stipulated in the CAADP Agenda and shall gradually stabilize around the same as the country attains its self sufficiency levels and resources will be diverted to other KPAs.
- 2. Energy has been isolated as a major constraint in development in the country. As such, expenditure towards the sector is expected to rise (for instance starting from 2011/12 budget where the 2.8% proportion includes the major investment of MK7bn meant for Kapichira Hydro Station Turbines, Lower Fufu Station etc). Thereafter, the allocation includes investment in industrialization, mining and tourism (promoting a conducive environment). Increased investment in the liquid fuels through strategic fuel storage facilities in the country.
- 3. Increased infrastructure development with more resources going towards road networks in country. New road constructions are expected throughout the Strategy period. Similarly major investment will be in rail transport. From 2011/12 to 2012/13, resources towards Nsanje World In-Land port will be for the EIA (funded by AfDB through SADC regional program).
- 4. Education expenditure proportion shall be about 20% of the national budget based on the UNESCO Education for All (EFA) Dakar Declaration Framework for Action, 2000.
- 5. Expenditure allocation in Public Health shall be around 15% as stipulated in the Paris Declaration and Accra Agenda of Action (AAA).
- 6. Integrated Rural Development will be enhanced with expenditure levels around 4% throughout the strategy period to achieve rural centres development.
- 7. Increased investment in GBI as a national priority. This involves development of new areas for irrigation and rehabilitation of existing schemes in the country.
- 8. Social expenditure shall continue on the same trend as Government's policy objective of balancing economic development with reasonable spending in social services to the population.
- 9. Issues of climate change are mainly addressed in key sectors like agriculture, energy, mining, industrial development as well as tourism hence focus is on policy related matters in this KPA.

ANNEXES

- 1: OPERATIONAL MATRIX BY THEME
- 2: OPERATIONAL MATRIX BY KEY PRIORITY AREAS
- 3: MGDS II NEEDS BASED COSTING
- 4: MGDS II MONITORING AND EVALUATION MATRIX

ANNEX 1: OPERATIONAL MATRIX BY THEME

THEME 1: SUSTAINABLE ECONOMIC GROWTH

Sub-Theme 2: Natural Resources and Environmental Management⁹
2.1 Forestry

Goal	Medium Term Outcome	Expected	Strategies	Constraints	Focus Actions and Activities
The goal is to enhance sustainable management of forest resources and their contribution to national economy	Increased	forest	Developing, conserving and protecting forest plantations, customary estates and natural woodlands	-Inadequate human resource, equipment and infrastructure - Inadequate investment in human resources and technologies	-Replant and rehabilitate forest plantations - Rehabilitate bare and degraded areas on customary estate - Undertake natural woodland regeneration activities on customary estate -Undertake fire management activities in plantations and forest reserves - Undertake forest patrols - Implement forestry legislation - Undertake various silvicultural operations in plantations and forest reserves - Develop appropriate plans to conserve biodiversity - Conserve and protect all riverine vegetation
			Strengthening institutional capacity of the sector	-Inadequate technical and professional staff -Delays in issuing letters of authority to recruit -Inadequate resources -Weak management systems	-Recruit human resource -Procure infrastructural development services -Undertake various trainings - Operationalise the Natural Resources Sector and Technical Working groups - Undertake strategic planning -Produce, implement, monitor and evaluate forestry operational plans -Undertake human resource activities

⁹ Sub Theme 1 in Key Priority Areas

				-Undertake administrative activities -Undertake financial management activities
		Improving forestry extension services,	te resources te specialised hu	-Undertake tree planting campaigns -Undertake fire control campaigns
		research, and information management	resource, equipment and infrastructure	-Undertake shviculture operation campaigns -Train communities in tree management and silviculture operations
		managomont		-Produce brochures and leaflets on forestry management
				-Conduct forestry research -Collect and store tree germplasm
				-Establish a forestry database -Establish forestry information channels
		Enforcing and	-Delays in funding approved	-Review policies for the forestry sub sector
		ensuring	annual work plan	-Produce forestry products standards
		compliance with	-Weak enforcement capacity	-Review Forestry legislation
		natio		-Develop forestry regulation strategy
		regional, and		-Disseminate forestry policy guidelines to stakeholders
		T.		-Sensitize stakeholders on forestry plans, policies and regulations
		obligations and		-Monitor compliance to forestry plans, policies and regulations
		legislation		-Facilitate legal action for non compliance to the set standards and
				Act
				-Participate in appeals tribunal
Incre	Increased incomes from forestry	Promoting large, medium and small	-Delays in approving and enforcing royalties and fees	-Review forest royalties and fees - Gazette and implement revised royalties and fees
products	icts			-Undertake co-management in forest reserves
services	ces	enterprises		-Facilitate formation of cooperatives and associations
				- Monitor implementation of concessions
				-Provide technical support to entrepreneurs

Sub-Theme 4: Private Sector Development, Industry and Trade 10

Goal	Medium Term Expected Outcome	Strategies	Constraints	Focus Actions and Activities
To develop and promote a conducive environment that will enhance inclusive private sector growth and competitiveness	An enabling environment for domestic and foreign investments created	Fostering probusiness legal and regulatory reforms	-Poor regulatory environment for businesses -Cumbersome and overlapping business licensing regimes -Weak contract enforcement and limited access to commercial justice	-Review and formulation of business friendly laws and regulations -Develop new competition policies and legislation -Promote public private dialogue -Facilitate the negotiations of Investment Promotion and Protection Agreements and Double Taxation Agreements -Strengthen law enforcement and dispute resolution mechanisms
		Providing support infrastructure and services for both start-ups and expanding enterprises		-Automation and interconnection of business and administrative processes - Training of staff and knowledge management - Attachment of staff to similar institutions in other countries -Study tours -Provision of enabling finances, resources and equipment
	Increased investments by both of local local and foreign Small and entrepreneurs (MSMEs)	Promoting growth of local Micro, Small and Medium Enterprises (MSMEs)	-Limited access to finance for MSMEs -Lack of information on MSMEs -Lack of appropriate technologies for MSMEs -Poor access to markets	-Providing entrepreneurial development skills, and human resource development - Promotion of small enterprise and entrepreneurship in schools - Promotion of private sector investment in the SME sector - Promotion and development of co-operatives - Development of an information base and network on trade and industry that includes the MSME sector

¹⁰ Sub Theme 3 in key Priority Areas

Sub-Theme 5: Rural Development

.1 Decentralisation

Goal	Medium Term Expected Outcome	Strategies	Constraints	Focus Actions and Activities
To enhance decision- making and participation of local communities in development planning and implementation.	Empowered local government structures	Enhancing implementation of the decentralization process	-Lack of capacity at local level -Inadequate funding -Lack of coordination among stakeholders	-Build institutional capacity at the district level -Harmonize decentralization policy and national policy frameworks -Increase financial allocation to local authorities -Enhance stakeholder coordination at local levels
	Enhanced participation and ownership of the development programmes by local communities	Strengthening community participation in development	-Low literacy levels -Inadequate local level institutional structures	-Train communities for active participation in development activities at the district levelConduct awareness campaigns -Define clear roles of all groups of stakeholders at the district level.
	Improved coordination at district level	Strengthening coordination of local government systems	-Lack of coordination among stakeholders	-Enhance stakeholder coordination at local levels
		Strengthening capacity of local government structures and stakeholders	-Inadequate resources -High staff turnover	-Conduct needs assessment -Train stakeholders, -Procure equipment -Improve infrastructure -Promote women participation in decision-making positions in local government structures
		Strengthening the M&E system	-High staff turnover -Lack of career path -Inadequate financial resources	-Create career path -Recruit and train personnel -Strengthen community monitoring and evaluation

5.2 Rural Industrialization

Goal	Medium Term Expected Outcome	Strategies	Constraints	Focus Actions and Activities
To improve living standards of rural communities through enhanced rural industrialization.	Enhanced product diversification	Building capacity in product diversification, business management, and production processes.	-Limited technical capacity in product diversification and management -Limited technology use -Low literacy levels	-Identify alternative products -Undertake research in appropriate technologies -Develop technical capacity in product diversification and management -Conduct market research
		Strengthening and expanding OVOP initiatives in rural areas	-Inadequate financial and human resources -Inadequate expertise and equipment -Donor dependence	-Procure and install equipment -Facilitate access to both local and international markets -Build capacity for cooperatives and SMEs -Conduct awareness campaigns on OVOP initiatives
	Reduced rural- urban migration	Promoting development of supportive infrastructure	-Inadequate financial resources, -Inadequate capacity of service providers	-Develop infrastructure in rural areas -Encourage public private partnerships -Develop secondary development centres -Establish rural skill development centres -Provide social amenities
	Reduced poverty among rural communities	Promoting equal access to credit; Promoting industrial projects in rural areas	-Limited coverage of financial institutions -High interest rates -Low literacy level	-Establish links between cooperatives and rural financiers -Conduct business development training -Encourage financial institutions to open service centres in rural areas -Improve macroeconomic environment

Sub-Theme 6: Tourism, Wildlife and Culture

	Medium Term Expected Outcome	Strategies	Constraints	Focus Actions and Activities
To conserve and manage wildlife in both protected areas and natural habitats	Improved wildlife management	Reducing human animal conflicts	-Inadequate human and financial resources -Inadequate research and monitoring capacity - Low population of animals in protected areas -Inadequate publicity on the value of wildlife	-Scale up capacity to deal with problematic animals -Construct and maintain game proof solar powered electric fences -Conduct public awareness campaigns
		Promoting alternative livelihood sources for communities living around protected areas	-Inadequate human and financial resources	-Develop standards and guidelines for wildlife farming, ranching and utilisation -Promote IGAs and implement benefit sharing in the other PAs
		Promoting community wildlife conservation and monitoring	-Inadequate human and financial resources -Low literacy levels	-Support wildlife community conservation efforts -Develop and implement a collaborative tsetse fly and trypanosomiasis control and monitoring programme in the affected areas -Facilitate formation of legally constituted CBOs & build capacity in existing CBOs -Review co-management agreements -Conduct awareness campaigns
		Developing a database to monitor wildlife population trends	-Inadequate human and financial resources -Inadequate equipment	-Develop a monitoring and evaluation system -Conduct wildlife survey to feed into the database -Operationalise a data archival system -Recruit and train personnel -Procure equipment
		Improving law enforcement and effectiveness	-Inadequate human and financial resources -Inadequate equipment -Inadequate infrastructure -Lack of awareness	-Build capacity in law enforcement -Construct and maintain solar powered electric fences -Construct and rehabilitate infrastructure -Procure equipment -Recruit and train personnel -Conduct awareness campaigns

	Promoting and regulating wildlife farming, utilization and trade	-Inadequate human and financial resources -Inadequate awareness	-Promote IGAs and implement benefit sharing in PAs -Conduct awareness campaigns -Construct and rehabilitate lodges in protected areas -Identify new eco-lodge sites and procure new concessionaires -Translocate and introduce new animals to increase sightings -Monitor wildlife population trends -Conduct economic analysis including product prices for wildlife -Promote community eco-lodges and joint ventures -Identify inventories -Map out eco-tourism attractions inside and outside PAs
	Enhancing wildlife IEC programmes	-Inadequate human and financial resources -Low literacy levels	-Carry out mass awareness campaigns -Develop a PA marketing and communication plan
Improved institutional and regulatory framework	Strengthening institutional capacity to manage protected areas and ecosystems	-Inadequate funding -Inadequate human resources	-Plan and implement human resource development programmes - Recruit and train personnel -Finalize and implement DNPW training plan and guidelines -Accredit MCFW

6.3 Culture

Gosl	Medium	Strateoies	Constraints	Focus Actions and Activities
	Term Expected			
	Outcome			
To uphold and promote	Improved	-Preserving historical	-Inadequate financial and	- Conduct trainings in indigenous skills;
ilational ilcitiage 101	pieservanon or	מותומכוז מוות	inaman resources,	Control and submit project proposats,
identity, posterity and	Malawi's cultural	upgrading retrieval	-Inadequate trained personnel	-Carry out conservation and preservation programmes
development	heritage and values	system;	-Lack of purpose built	-Install smoke detectors and fire extinguishers, dehumidifiers and
	•	-Preserving and	museum storage	hygrometers
		constructing national	-Unavailability/ inadequate	-Construct and rehabilitate monuments
		monuments;	information	-Develop Electronic data base and website
		-Promoting		-Revive the Monument Advisory Council and declare monuments as
		establishment of		protected national treasure
		cultural centres		-Carry out research in archaeology, anthropology, ethnography, geo-
		-Promoting and		archaeology, paleontology, history and rock art
		preserving local		-Carry out exhibitions
		cultural diversity		-Rehabilitate museum buildings
	Increased	-Creating public	-Inadequate financial, human	-Formulate management and marketing plans
	promotion and	awareness on national	resources, equipment and	-Revive the Arts and Crafts Advisory Council
	development of	heritage programs;	appropriate vehicles	-Carry out research on the indigenous musical instruments, fine arts,
	Malawi's culture	-Promoting research	-Unwillingness and lack of	performing arts and crafts
		and documentation of	commitment from	-Children Traditional Games, Songs and Dance
		Malawi's cultural and	stakeholders	-Train artists and arts managers
		natural heritage	-Poor record management	-Procure costumes, props and protective clothes
		and	practices and absence of	-Develop a directory of artists and works.
		-Enhancing the sub-	proper updated schedules	
		sector's institutional	-Lack of purpose-built	
		capacity	ıntrastructure	
		1		

Sub-Theme 7: Labour and Employment

Goal	Medium Term	Strategies	Constraints	Focus Actions and Activities
	Expected Outcome			
To stimulate and	Improved labour	Promoting	-Lack of knowledge on OSH	-Develop National OSH Policy, Programmes and guidelines
ensure productive and	productivity	occupational safety	-Non compliance	-Review OSH Act and its supporting regulations
for better standards of		allu llealul (OSD)	-Ellinged munian and imanoian resources	-build technical and institutional capacity -Enforce OSH standards
living			-Weak institutional policy and	-Conduct OSH awareness campaigns
			legislation	-Enhance information documentation and dissemination
			-Inadequate equipment for OSH	-Mainstream OSH in workplaces -Construct OSH laboratory
		Promoting skills	-Limited technical expertise	-Review curricula in line with the current labour market demand
		development, testing	-Inadequate training institutions	-Construct and rehabilitate training and testing institutions
		and certification	- Limited financial resources	-Acquire modern training and testing equipment
			-Lack of trade testing policy and	-Raise awareness on trade testing
			law	-Recruit and train technical specialists in trade testing
	Increased gainful	Fetablishing an	-I imited technical capacity	-Develop and adopt made resums round and daw -Train key stakeholders in data collection storage and analysis
	and decent	offorting and officient	Incleanate equipment	Then have standingfully in data concentrations stonged and analysis Build concentry of officers on I MI anatom
	and decenit	labour market	-madequate equipment	- Build capacity of officers off Eight system - Strenothen institutional canacity
	all	information (I MI)		Drong administration of the contract of the co
	all	System		-r rocure equipment -Conduct labour market research
		Reducing all forms of	-Culture of silence	-Conduct awareness campaigns on labour laws
		discrimination in the		- Introduce anonymous reporting system
		labour market		
		Promoting labour	-Lack of clear policy - Weak institutional and	-Establish Labour Inspections Service Central Unit
			regulatory framework	-Build technical and institutional capacity
			-Inadequate financial resources	-Develop Labour Inspection Guidelines
				-Review Labour policy and laws
				-Establish an independent mediation and conciliation system - Enhance coordination
	-Eliminated worst	Reviewing,	-Inadequate human and financial	- Review and harmonize the existing legislation
	forms of child	harmonizing and	resources	- Enforce legislation
	labour	enforcing existing		- Conduct awareness campaigns
	-Strengthened	legislation on child		
	legal, regulatory	labour		
	and institutional			
	1 CLOSTAND			

	Integrating child labour issues into	-Inadequate financial resources -Poor coordination	-Inadequate financial resources -Develop and disseminate child labour policy and national action -Poor coordination plan
	development initiatives and interventions	-Weak institutional capacity	-Mainstream child labour issues in sectoral plans - Strengthen institutional capacity - Develop and implement child labour monitoring system - Develop prevention and rehabilitation programmes and facilities - Conduct a national child labour survey
	Integrating gender specific issues in all labour initiatives and interventions	-Inadequate financial resources -Poor coordination -Weak institutional capacity	-Inadequate financial resources -Conduct a survey and develop a periodic report on the share of women in wage employment in the non agriculture sector; -Conduct gender audit in the labour market -Train officers in the Ministry of Labour in Gender analysis and mainstreaming -Engender Labour laws

Sub-theme 8: Land

Goal	Medium Term Expected Outcome	Strategies	Constraints	Focus Actions and Activities
To ensure equitable access to land and tenure security; efficient management and administration system; and ecologically balanced use of land and landbased resources.	Improved equitable access to land and tenure security	Raising public awareness on land related laws, policies, and procedures	-Lack of communication strategy -Poor stakeholder coordination	-Develop a communication strategy -Develop IEC materials -Conduct public awareness campaigns - Conduct research and studies on land issues
	Improved provision of geospatial information	Developing mechanism for widespread dissemination of geographic information and digital mapping services	- Inadequate dissemination channels -Inadequate financial and human resources	-Develop a communication strategy -Develop IEC materials - Create website - Establish customer service centre
	Improved land planning, ecologically balanced land use and management	Promoting land ownership and title registration	-Weak institutional capacity - Land speculation - Encroachment and squatting	-Acquire land for redistribution - Register acquired land -Conduct awareness campaigns -Establish computerized land registration systems -Train personnel

Pro	Providing physical	-Inadequate human and	-Review physical development standards and management
dev	development planning	financial capacity	guidelines
star	standards, management	- High rural-urban	-Review and harmonize land legislation and policies
gui	guidelines and legal	migration	-Allocate serviced plots in urban and semi-urban areas
frar	framework		
Dec	Decentralizing land	-Lack of transparency	- Strengthen institutional capacity at local authority levels
adn	administration and	and accountability in	- Transfer land related documents to local authorities
maı	management functions	land administration	-Devolve land administration and management functions
		-Weak institutional	- Undertake fiscal decentralization
		structures	

THEME 2: SOCIAL DEVELOPMENT

Sub-Theme 1: Population

					r
	Medium Term	Strategies	Constraints	Focus Actions and Activities	
	Expected Outcomes				
To manage population	Reduced fertility	-Enhancing the	-Inadequate human and	-Increase community- based distribution programmes of	
growth for sustainable	rate	provision, access,	financial resource	contraceptives;	
socio-economic		delivery and utilization	-Low literacy levels	- Conduct advocacy forums with various stakeholders	
development		of sexual and	-Inadequate youth	-Train more family planning service providers	
		reproductive health	friendly RHS	-Expand coverage of youth friendly RHS institutions	
		services to all including	-Insufficient institutions	-Conduct awareness campaigns	
		the vulnerable and	and outreach services		
		disadvantaged groups			
		-Advocating girls'	-Inadequate financial and	-Advocate for girl retention in schools at all levels	
		education and delayed	human resources	-Provide bursaries for needy girls	
		marriage	-Prohibitive cultural and	-Advocate for delayed marriage	
			traditional practices	-Train more women in professional skills	
			-Girl-child unfriendly	-Advocate for affirmative action in recruiting women in senior	
			infrastructure	positions	
			-High poverty levels	-Establish income generating activities in rural areas	
				-Provide girl-child friendly infrastructure	

		Promoting the small family concept	-Inadequate human resource to undertake	-Train community workers on small family concept -Support IEC and advocacy campaigns on the importance of
			advocacy	having small family size
			-Individual perception	-Advocate for male participation in family planning
			-Low literacy levels	-Encourage use of modern family planning methods
			-High poverty levels	-Provide modern family planning services
			-Lack of community	
			awareness	
		Providing sexual and	-Low human capacity	-Provide more reproductive health commodities
		reproductive health	-Lack of coordination	-Recruit and train advocacy personnel
		education for both in-and	among stakeholders	-Encourage youth friendly SRH services
		out-of-school sexually	-Individual perception	-Conduct awareness campaigns
		active population		
		Addressing the	-Inadequate human and	-Provide adequate socio-economic services
		vulnerabilities caused by	financial capacities	-Produce advocacy materials on rights of elderly persons
		population ageing,	-Lack of opportunities in	-Provide social security for the elderly
		migration and rapid	rural areas	-Strengthen boarder control systems
		urbanization, and the	-Weak migration control	-Provide social support programmes
		interdependence of	systems,	-Increase economic opportunities in rural areas
		population and the	-Uncontrolled rural-urban	-Promote environmental friendly technologies
		environment.	migration	
Wel	Well managed	Strengthening migration	-Inadequate human and	-Provide support infrastructure for vital registration system
gim	migration	and national vital	financial resources	-Procure equipment
		registration systems	-Inadequate awareness	-Support the strengthening of the capacity of national statistical
			-Inadequate equipment	system
				-Conduct awareness campaigns
				-Review progress on vital registration system

Sub-Theme 6: Nutrition

Goal	Medium Term Expected Outcome	Strategies	Constraints	Focus Functions and Activities
A well nourished population that effectively contributes to development of the country	Reduced prevalence of nutrition disorders	Promoting exclusive breast-feeding practices for children aged 0-6 months;	-Inadequate funding -Low uptake of messages on optimal breast feeding practices -Low literacy levels	-Conduct assessment of health facilities for Baby Friendly Hospital Initiative (BFHI) status and re- assessment of baby friendly hospitals - Conduct sensitization and awareness campaigns - Conduct orientation meetings for key stakeholders on the need for maternity protection and support to lactating mothers - Disseminate the revised Infant and Young Child Nutrition Policy, guidelines and job aides - Review and update infant and young child feeding counselling programs - Integrate counselling services on the feeding and management of a sick child, in PMTCT
		Promoting optimal feeding practices for children aged 6-24 months and beyond	-Inadequate human and financial resources -High poverty levels	- Develop and disseminate job aides for the integration of ENAs in the nutrition interventions - Conduct training and orientation for the service providers and other stakeholders - Develop and implement a comprehensive nutrition education and communication strategy on infant and young child feeding - Provide technical support to health facilities to maintain or attain the BFHI status - Promote dietary diversification
		Promoting optimal feeding of a sick child during and after illness	-Inadequate resources at household and community level -Limited knowledge -Inadequate uptake of micronutrient supplementation	-Trainserviceproviders and caregivers - Integrate counselling services on the feeding and management of a sick child -Promote dietary diversification -Conduct sensitization and awareness campaigns - Provide micro nutrient supplementation according to guidelines
		Promoting the prevention, control and treatment of micronutrient deficiency disorders particularly those caused by vitamin	-Inadequate human resource capacity -Inadequate resources at household and community levels -Inadequate awareness	-Scale up the provision of micro nutrient supplementation - Review and update infant and young child feeding counselling -Conduct advocacy and awareness campaigns -Conduct school campaigns for micronutrient supplementation, de-worming and other public health interventions; - Disseminate guidelines for management of malnutrition,

A, Iodine and Iron, including food fortification		- Align food standards for centrally processed food items with regional guidelines and international best practices - Intensify food monitoring activities
Improving access to nutrition supplements for malnourished children, expectant and lactating mothers, the elderly and physically challenged	-Inadequate human and financial resources -Inadequate equipment	-Train district and community based service providers and support groups - Provide food supplements - Provide equipment - Conduct sensitization and awareness campaigns - Orient stakeholders on prevention and management of moderate, severe and acute malnutrition - Review guidelines and accompanying materials for Nutrition - Review guidelines and accompanying materials for Nutrition Care, Support and Treatment (NCST) of PLWHIV, TB and chronically ill - Strengthen and scale up CTC services, NRU and supplementary sites
Promoting access to at least one nutritious meal and related health and nutrition services for the school-going children	-Inadequate financial and human resources -Inadequate resources at household and community levels to facilitate sustainable adoption; -Slow adoption of healthy eating habits and life styles;	- Integrate nutrition education, communication and growth monitoring to the school feeding programme - Conduct trainings for service providers on food processing, preparation, storage and participatory recipe development -Review code of marketing infant and young child foods -Promote dietary diversification - Conduct sensitization and awareness campaigns - Build capacity of schools to manage nutrition issues - Provide appropriate water and sanitation facilities in public schools for prevention of infectious diseases - Scale up innovative ways of providing school meals
Strengthening capacities for households and communities to attain adequate nutrition	-Inadequate financial and human resources -Inadequate resources at household and community levels to facilitate sustainable adoption	-Develop and disseminate nutrition information - Train child-bearing age women on food diversification -Recruit and train personnel -Engage community based service providers and support groups in regular follow-up and support to pregnant and lactating mothers at all levels -Facilitate the formation of economic empowerment groups -Provide credit and business management support to the households and communities
Preventing and controlling nutrition	-Inadequate human and financial capacity;	-Review guidelines, protocols and counselling tools for IMCI, PMTCT and growth monitoring

related non- communicable and othe diseases diseases Scaling up innovative interventions in management of malnutrition among the various population groups Strengthening institutional and human capacities for the effective delivery of nutrition services nutrition services Promoting healthy life styles	ole and other	-Inadequate resources at household and community levels	-Update and disseminate messages on child feeding, management of NCDs and adequate nutrition
communicab diseases diseases Scaling up in interventions management malnutrition various popu groups Strengthenin, institutional.capacities fo effective deli nutrition servention serventions and the styles	other	ld and nity levels	of NCDs and adequate nutrition

effective deli nutrition serv		- Poor coordination	-Train service providers, counsellors and extension workers
nutrition serv		amongst nutrition service	-Develop and advocate legislation for fortification
Promoting h	rvices providers and	s and	- Train extension workers in post-harvest food management and
Promoting h	implementers	enters	nutrition support programmes
Promoting h			-Integrate nutrition education, communication and growth
Promoting h			monitoring to the school feeding programme
Promoting h			- Conduct training of trainers in CTC services, NRU sites and
Promoting h			supplementary site
Promoting h			-Recruit, train and deploy Nutrition, and HIV and AIDS Officers
Promoting h			-Build capacity of schools to conduct regular nutrition assessment,
Promoting h			health and nutrition education in schools and surrounding
Promoting h			communities
Promoting h			- Strengthen nutrition information systems
Promoting h ₁ styles			- Harmonize nutrition sectoral policies
Promoting he styles			-Strengthen coordination at all levels
Promoting he styles			- Strengthen the National Fortification Alliance
Promoting he styles			 Build capacity of frontline workers on dietary diversification
styles	life	-Inadequate financial and	-Develop and disseminate a set of recipes and guidelines
	human r	human resources	-Develop information education and communication (IEC) materials
	d High bc	-High poverty levels	-Review Curricula in all learning and training institutions to
	-Low lit	-Low literacy levels	include nutrition issues
			-Train service providers on food processing, preparation,

			storage and participatory recipe development
			-Monitor food processing technologies and standards
	Promoting production	-Inadequate financial and	-Scale up sustainable economic and social protection interventions
	and access of high	human resources	-Conduct advocacy and awareness campaigns
	nutritive value foods for	-High poverty levels	- Build capacity of households and communities to increase
	diversified and nutritious	-Low literacy levels	agricultural production and diversification
	diets		- Scale up interventions that promote production and access to
			high nutritive value foods
			-Mobilize households affected by nutrition disorders to demand
			food and nutrition security programs

THEME 3: SOCIAL SUPPORT AND DISASTER RISK MANAGEMENT

Sub-Theme 1: Supporting the Vulnerable

Sub-ineme it supporting the vulnerable	ig tile vulliefable			
Goal	Medium Term	Strategies	Constraints	Focus Actions and Activities
	Expected			
	Outcomes			
To improve resilience	Improved social	Enhancing and	-Weak coordination of	-Provide supplementary feeding to malnourished pregnant,
and quality of life for	security	promoting predictable	social support programs	lactating mothers and under five children
the poor to move out	interventions	transfers to the most	and projects	-Sustain and scale-up the targeted School Feeding Program
of poverty and		vulnerable and the ultra	- Uncoordinated targeting	- Implement HIV and AIDS impact mitigation programmes
vulnerability		poor households	-Insufficient scientific	-Scale up the school bursary system
			information	-Implement public works program with components of national
			-Inadequate resources	employment guarantee scheme
			-Growing number of the	-Continue implementation of the Farm Input Subsidy Program
			vulnerable	
			-Limited integration of	
			Public Works Program	
		Establishing coherent	-Weak coordination of	-Review the National Social Support Program
		and progressive social	social support programs	-Undertake a comprehensive targeting study to analyze existing
		support synergies	and projects	and potential targeting mechanisms
				-Develop a comprehensive social support database
				-Strengthen synergies and complementarities among social support
				programmes

Improved asset base and productive capacity of the poor	Promoting existing livelihood activities for the poor	- Weak coordination among programs -Inadequate resources -Entrenched dependence culture - Weak targeting mechanism	-Scale up small stock and grain mills programs for the most vulnerable -Facilitate establishment and training of social support committees -Facilitate implementation of village savings and loans programme - Facilitate involvement of women and other vulnerable groups in livelihood enhancing activities
	Promoting village savings and loans programmes	-Lack of saving culture among the rural poor -Limited coverage of financial institutions to support the programmes	-Scale-up existing village savings and loan programs -Link village savings and loan program with other social support programmes -Train stakeholders on village savings and loans -Link village groups to financial institutions
	Promoting longer term, skills oriented and asset enhancing interventions	-Inadequate resources -Lack of sustainability mechanisms -High illiteracy levels	-Create dedicated fund for microcredit to provide more affordable capital to MFIs -Develop microfinance policy -Facilitate provision of loans to vulnerable groups -Train vulnerable groups on business management and asset enhancing skills
	Improving and scaling up the Social Cash Transfer (SCT) Programme	-Inadequate human and financial resources	-Conduct sensitization meetings with key development structures at district level -Identify additional beneficiary districts and households - Introduce the e-payment mechanism - Conduct training of trainers - Establish SCT district secretariats - Procure office equipment and supplies - Provide cash transfers to both existing and new beneficiary households

Goal	Medium Term	Strategies	Constraints	Focus Actions and Activities
To rading the conjut	Strangthanad	Develoning and	Wool institutional	Daviolon DPM notion
10 reduce die social,	Sucingulation		- wear illstitutional	- Develop Divin policy
economic and	capacity for effective	strengthening DRM	capacity	- Review Disaster Preparedness and Relief Act, 1991
environmental impact	preparedness,	policy and institutional	-Low awareness of	-Develop and implement DRM communication strategy
of disasters	response and	frameworks	disaster risk reduction	-Invest in knowledge and education for DRM
	recovery		among stakeholders at all levels	
		Mainstreaming DRM	-Insufficient institutional	-Develop guidelines for DRM mainstreaming
		into policies, strategies	capacity and planning	-Train and sensitize stakeholders on mainstreaming DRM
		and programmes	process for DRM	-Build DRM and Climate Change Adaptation (CCA) capacity
		Strengthening DRM	-Inadequate human	-Establish and operationalize multi stakeholder forum for
		coordination	resources	coordination of DRM activities
		mechanisms among	-Non existence of a multi	
		stakeholders	stakeholder forum for	
			coordination	
		Enhancing capacity on	-Inadequate capacity in	-Train officers in use of space based information and technology
		the use of Geographical	using space based	-Develop risk assessment guidelines
		Information System	technology	-Conduct DRR and CCA risk assessment in disaster prone
		(GIS) and other remote	-Inadequate resources can	districts
		sensing technologies	impede the development	-Procure GIS equipment and software
			of maps	
		Developing an integrated	-Inadequate and outdated	-Establish an integrated early warning system
		national Early Warning	equipment	-Develop hazard maps
		System (EWS)	-Inadequate personnel in	-Conduct survey to identify potential national and cross border
			relevant institutions	risks
			-Lack of linkages among	-Develop risk monitoring system and database of potential risks
			existing EWS and	-Upgrade EWS to international standards
			stakeholders	-Conduct capacity building for EWS

Implementing mitigation measures in disaster prone areas	-Inadequate funding mechanism for contingency planning and response -Inadequate expertise in disaster recovery	-Develop contingency plans in all districts -Network disaster prone districts (internet website/ communication) -Sensitize local authorities on contingency plans - Incorporate risk reduction approaches in the design implementation of DRM programs -Build capacity of stakeholders in risk and disaster preparedness, response and recovery -Conduct DRR and CCA risk assessment in disaster prone districts -Conduct a comprehensive analysis of the documented best practices -Construct DoDMA Warehouses in strategic places
Incorporating DRM in all school curricula	-Limited research and skills in DRM -Limited resources	-Engage learning institutions on incorporation of DRM into the existing education and training curriculum -Develop short and long-term DRM courses -Conduct research on locally appropriate DRM technologies and approaches
Promoting awareness, access, distribution and utilization of reliable and relevant DRM information	-Insufficient DRM knowledge by the media	-Develop DRM website and information centre -Sensitize the media on DRM issues -Disseminate operational guidelines, policy, DRM Handbook and DRR framework to all stakeholders

THEME FOUR: INFRASTRUCTURE DEVELOPMENT Sub Theme 2: Transport-Air Transport

Goal	Medium Term	Strategies	Constraints	Focus Actions and Activities
	Expected Outcomes			
To ensure a safe,	Improved safety and	Promoting and	Limited financial and	- Construct and upgrade airports
efficient and	management in	facilitating a competitive,	human resources	- Automate airport administration systems
competitive aviation	accordance with	and efficient air transport		-Formulate/adopt policies that promote competition
industry	international	industry		-Review aviation policies
	standards			
		Providing safe, efficient,	-Inadequate financial	- Acquire fire-fighting and airport navigation equipment
		and reliable aviation	resources	- Upgrade geodetic and Air Transport Management (ATM)
		infrastructure and		systems
		services		
	Improved regulatory	Establishing and	-Inadequate human	- Develop civil aviation master plan
	and institutional	maintaining legislative	capacity	-Establish civil aviation regulator
	framework	and regulatory	-Non existence of an	-Review bilateral air services agreements
		framework	independent aviation	
			regulator	
			-Outdated aviation	
			agreements	
	Improved security in	Promoting effective	-Lack of modern security	- Adopt regional and international cooperative arrangements to
	airports	safety and security	equipment	enhance safety and efficiency
		oversight systems	-Lack of secure airport	-Procure modern security equipment
			perimeter fence	-Construct and rehabilitate airport infrastructures
			-Lack of paved runways	
	Improved reliability	Undertaking reforms in	Inadequate financial and	- Review of legislation regulations, rules and procedures
	and competitiveness	the aviation sector	human capacity	- Encourage technical and commercial joint venture
				- Encourage local participation in equity and technical partnerships
				of airlines
		Strengthening	-Inadequate financial	- Develop capacity of the sector
		institutional capacity	resources	- Rehabilitate the School of Aviation
			-Lack of motivation	-Improve conditions of service in the aviation sector
		Implementing	-Lack of required	-Implement environmentally friendly technologies in the aviation
		environmental protection	knowledge	sector
		measures		
		Promoting Public Private	-Lack of investment	-Create conducive environment for investment
		Partnerships to facilitate	capital	-Encourage private sector participation in the provision and
		private investment	-High cost of borrowing	maintenance of aviation infrastructure

THEME FOUR: INFRASTRUCTURE DEVELOPMENT Sub Theme 2: Transport-Air Transport

Goal Medium Terr	Medium Term Expected Outcomes	Strategies	Constraints	Focus Actions and Activities	
To ensure a safe, efficient and competitive aviation industry	Improved safety and management in accordance with international standards	Promoting and facilitating a competitive, and efficient air transport industry	Limited financial and human resources	- Construct and upgrade airports - Automate airport administration systems -Formulate/adopt policies that promote competition -Review aviation policies	1
		Providing safe, efficient, and reliable aviation infrastructure and services	-Inadequate financial resources	- Acquire fire-fighting and airport navigation equipment - Upgrade geodetic and Air Transport Management (ATM) systems	
	Improved regulatory and institutional framework	Establishing and maintaining legislative and regulatory framework	-Inadequate human capacity -Non existence of an independent aviation regulator -Outdated aviation agreements	- Develop civil aviation master plan -Establish civil aviation regulator -Review bilateral air services agreements	1
	Improved security in airports	Promoting effective safety and security oversight systems	-Lack of modern security equipment -Lack of secure airport perimeter fence -Lack of paved runways	- Adopt regional and international cooperative arrangements to enhance safety and efficiency -Procure modern security equipment -Construct and rehabilitate airport infrastructures	

Improved reliability and competitiveness	Undertaking reforms in the aviation sector	Inadequate financial and human capacity	- Review of legislation regulations, rules and procedures - Encourage technical and commercial joint venture - Encourage local participation in equity and technical partnerships of airlines
	Strengthening institutional capacity	-Inadequate financial resources -Lack of motivation	- Develop capacity of the sector - Rehabilitate the School of Aviation -Improve conditions of service in the aviation sector
	Implementing environmental protection measures	-Lack of required knowledge	-Implement environmentally friendly technologies in the aviation sector
	Promoting Public Private Partnerships to facilitate private investment	-Lack of investment capital -High cost of borrowing	-Create conducive environment for investment -Encourage private sector participation in the provision and maintenance of aviation infrastructure

Sub Theme 4: Information and Communication
4.1 Information and Communication Technology (ICT)

ı	60 -	(= 0=) /S = 0=		
Goal	Medium Term	Strategies	Constraints	Focus Actions and Activities
	Expected Outcomes			
To increase utilization	Improved ICT	Developing a reliable,	-Inadequate human	-Establish broadband networks for tertiary education and research
of ICT, ensure	broadband	fast, adaptive and robust	resource capacity	institutions
universal access to	infrastructure	national ICT	-Poor and underdeveloped	-Connect Malawi to the undersea fiber optic cable through
ICT products and		infrastructure that feeds	infrastructure	Tanzania
services to improve		into international		-Expand and enhance GWAN
service delivery in		networks		-Establish local assembly networks
both public and				-Establish fiber links connecting local assemblies
private sectors				-Rollout infrastructure for the public postal operator.
	Increased usage and	Mainstreaming ICT into	-Inadequate financial	-Review DISTMS strategic plans
	access to information	sector policies,	resources	-Advocate for review of sectoral policies
	and communication	strategies and		
	services	operations		
		Improving rural and	-Low literacy levels; and	-Establish tele-centres and rural libraries
		underserved	unavailability of	-Provide ICT services to rural and underserved communities
		communities' access to	electricity	-Implement universal access initiatives
		ICT services		-Provide internet connectivity to public institutions
		Promoting the participation of private	-Inadequate incentives	-Provide incentives to private ICT service providers
		ICT service providers		
		Promoting information,	-Low literacy levels	-Conduct ICT awareness campaigns
		education and communication on ICT	-Brain drain	
	Improved postal and	Improving efficiency in		-Implement hybrid mail
	broadcasting services;	delivering postal	-Inadequate capacity in	-Establish postal physical addressing system
		services	postal service delivery	- I rain personnel
				-Automate postal services
				-Rehabilitate postal infrastructure
				-Establish rural banking services; and
				-Establish mulipurpose miormanon centres

	Migrating from analogue to digital	-Limited period for transition	-Replace analogue transmitters -Provide subsidies
	television broadcasting		 -Conduct poverty and social impact analysis study -Establish signal distributor
Improved ICT governance	Improving the regulatory framework for the sector		-Review Communication Act 1998 -Conduct MACRA institutional review -Develop ICT regulations, standards and guidelines -Enforce ICT regulations, standards and guidelines -Develop information society bill -Enforce information society regulations
Enhanced ICT capacity for the general public	Developing public online services	-Absence of legal framework; -Lack of awareness	-Train application developers -Develop interactive ICT applications -Conduct user training -Implement electronic records management system -Establish and operationalise Government data centre -Manage and coordinate existing government wide systems

SUB THEME 5: HOUSING AND URBAN DEVELOPMENT

5.1 Housing

SIIISMOLI I.C				
Goal	Medium Term Expected Outcomes	Term Strategies	Constraints	Focus Actions and Activities
To increase access to	Increased availability of	Strengthening	-Inadequate capacity, i.e.	-Inadequate capacity, i.e. - Adopt the revised National Housing Policy
decent housing with	affordable and decent	institutional, legal and	both human and	-Formulate and adopt a Housing Act
particular attention to	houses	regulatory framework	financial;	-Review the MHC Act
low income				-Formulate and adopt Building Regulations and Standards
households			-Delays in Government	-Formulate and adopt a National Construction Policy
			procedures and	-Decentralise property management services
			inefficient processes	-Create additional posts at District level

		-Develop and manage Government owned properties -Manage Government properties in foreign missions -Develop a legal framework for management of properties -Value properties -Produce valuation rolls
Strengthening capacity for decentralized housing delivery	-Inappropriate decentralising structures -High vacancy rates -Inadequate and inappropriate capacity at all levels -Lengthy Government procedures in filling vacant posts	-Conduct functional review to include decentralised functions -Fill vacant positions -Develop capacity at all levels
Scaling up the provision of basic infrastructure and services particularly in informal settlements Promoting national housing financing mechanisms	-High costs of infrastructure -High rates of vandalism -Limited number of players in infrastructure provision -Limited number of financing institutions; -High cost of borrowing; -Prohibitive conditions of borrowing; -Lack of housing finance for the poor and low income groups	-Encourage community participation in infrastructure development -Advocate incremental infrastructure (Slum) upgrading -Strengthen informal settlements focal points in Local Authorities -Encourage private sector participation -Lobby for the establishment of National Housing Fund; -Encourage a savings culture; -Encourage financial institutions to support housing development -Recapitalize the Public Home Ownership Scheme -Encourage private sector to establish home ownership schemes for their employees -Lobby micro-finance institutions to support housing development -Promote housing financing mechanisms that are easily accessible to low income housing financing mechanisms that are easily accessible to women
Promoting Public and Private Partnerships in housing delivery	Inadequate incentives Limited collaboration between public and private sectors -High incidences of poverty	-Implement PPP policy -Develop and establish more housing development programmes/projects -Lobby financial institutions to support SME in housing industry -Lobby private sector to collaborate with public in housing delivery

	Promoting planning to	-Limited access to land	-Adhere to land-use plan
	improve quality of	-Land tenure insecurity	-Create awareness on proper land use
	rural and urban	-Cumbersome	-Enhance decentralisation of rural housing delivery
	housing and settlement	procedures in approving	-Recapitalize the rural housing credit fund
	patterns	development plans	-Develop information kits on good housing
		-high cost of building	-Sensitize rural households on Safer Construction Guidelines
		materials	
	Developing and	-Absence of beneficial	-Encourage research in the use of local building materials
	promoting the use of	technologies	-Promote use of local building materials
	local building	-Lack of research in the	
	materials	building industry	
	Providing safe and	-Inadequate financial	-Construct additional Government offices and houses
	adequate space to	resources	-Rationalize office space in existing Government offices
	public institutions and	-High rental charges	
	officers	-Lack of capacity of	
		contractors

Goal	Medium Term	Strategies	Constraints	Focus Actions and Activities
	Expected Outcomes			
To reduce gender inequalities and enhance participation of all gender groups in socio-economic development	Increased meaningful participation of all gender groups in decision making, wealth creation and poverty reduction	Promoting women entrepreneurship and involvement in cooperatives	-Shortage of human and financial resources -Low literacy levels	-Train women in basic business skills -Formulate cooperatives -Provide micro-finance loans
		Advocating for	- Inadequate resources	-Lobby political parties, public and private institutions for appointment of 50
		affirmative action to	- Aggression and	percent women into decision making positions.
		increase	intimidation perpetuated	-Conduct media campaigns to advance women empowerment agenda
		representation of	by men	-Conduct targeted sensitization meetings
		women in politics	- Slow legal reform	
		and decision making	process	

	positions	-Low literacy levels among women -Discriminatory cultural values and laws	
,		expertise support	
Reduced gender based	Enhancing awareness	-Lack of empowerment	-Conduct targeted sensitization meetings on GBV
(GBV) violence at all	on GBV	of women	-Conduct media campaigns on GBV and violence against women
Icvels		-Low literacy levels	-11aiii Victiiiis 01 OB V III IIIcoliie Oelielauoli Acuviues (10As) 101 uleii aconomic amagarmant
		Onnressive cultural	-Provide psychosocial support/counselling program for victims/surxivors of
		values	GBV
			-Develop and provide psychosocial support/counselling programmes for GBV
			perpetrators
			-Conduct targeted trainings on Gender, GBV, Human Trafficking, Gender
	-	;	related legal instruments and other emerging GBV related issues
	Strengthening GBV	-Lack of understanding	 Support one stop service centres in hospitals for comprehensive support to viorime of abuse/ GBV
	service derivery	of GBV.	VICTILITY OF ACROSS OF THE STATE OF THE STAT
	systems		-Establish new and revamp existing GBV counselling centres for alternative
			dispute resolution
			- Provide support to all Victim Support Units (VSUs) in police and community
			-Conduct review and lesson learning meetings of GBV
			- Strengthen referral systems among the police, hospitals and courts
	Strengthening legal	- Limited human	-Undertake the analysis of legal frameworks with gender lens
	and regulatory	resources	-Review the legal frameworks based on the recommendations
	framework	-Lengthy legal processes	-Enact gender related laws
		-Limited infrastructure	-Establish community based paralegal programmes
		for justice delivery	-Translate, simplify and disseminate gender related laws
		-Entrenched cultural	-Establish family courts
		attitudes	-Conduct legal literacy education
		-Low legal literacy	-Ensure compliance with international conventions and treaties on women's
		among communities	rights
Enhanced gender	Mainstreaming	-Lack of specialized	-Develop, roll out and implement a training plan
mainstreaming across	gender at all levels	training in gender	-Develop mechanisms to strategically position the gender machinery
all sectors		-Lack of coordination in	-Develop guidelines for gender coordination
		gender mainstreaming	-Conduct joint gender planning and review meetings
		-Limited commitment to	-Establish sectoral gender working groups
		mainstream gender	-Undertake monitoring and evaluation of gender mainstreaming in all sectors

		issues	-Train public and private sectors on gender analysis and mainstreaming
			strategies
			-Develop sector specific gender analysis and mainstreaming tools
			-Develop guidelines for gender responsive policy formulation and review
	Strengthening gender	Limited capacity to	-Conduct research/survey in GBV
	disaggregated	generate and disseminate	-Document and disseminate lessons learnt including best practices and fact
	research and	gender disaggregated	sheets on GBV
	documentation	information	-Disseminate the mapping report of services providers in GBV
			-Develop a national GBV data base

Sub-Theme 2: Capacity Development	icity Development			
Long Term Goal	Medium Term Expected Outcomes	Term Strategies	Constraints	Focus Actions And Activities
To develop a productive and efficient workforce with necessary supporting equipment and infrastructure	Enhanced workforce capacities and supportive systems	Developing and strengthening human and institutional capacities	-High staff turnover -Bureaucratic rigidities -Recruitment problems -Poor public service conditions	-Provide appropriate training for effective service delivery
		Mainstreaming capacity development in all sectors	-Inadequate funds -Inadequate capacity to handle capacity development	-Raise awareness on capacity development -Standardize training across all sectors
		Promoting capacity development at all levels	-Inadequate human and financial resources -Low literacy levels -High staff turn over -Poor coordination	-Develop and implement a capacity development program for national, district and local levels -Train stakeholders at district and local levels -Strengthen stakeholder coordination

-Develop capacity of trainers in training institutions -Provide supporting infrastructure in training institutions	-Inculcate positive performance culture among employees - Conduct annual performance appraisals - Integrate result based management in all programmes of work in all sectors - Develop and promote the use of RBM guidelines in all sectors - Harmonize pay in public sectors	- build Capacity in resource mobilization	-Develop and rehabilitate professional and skills development centres -Review curriculum -Procure equipment -Develop human resource capacity in those centres	-Develop skills in various trades -Streamline procurement procedures -Review and enforce standards	-Develop PPP policy -Amend the privatization act to incorporate PPPs -Promote a conducive environment for private sector investment -Train personnel -Promote PPP dialogue
-Inadequate funds -Inadequate trained personnel -Inadequate infrastructure	-Poor conditions which are not conducive for performance -poor management	-Lack of capacity to mobilize and use resources	-Inadequate human and financial resources -Inadequate skills	-Inadequate funds -Stringent procurement procedures -Lack of skills	-Underdeveloped private sector -Lack of policy -Lack of skills -Information asymmetry
Strengthening academic institutions to respond to the needs of the economy	Promoting effective performance management systems	Enhancing coordination in resource mobilization and utilization	Promoting and establishing professional and skills development centres	Enhancing investments in infrastructure and equipment	Promoting public private partnerships
Improved functioning of local training institutions	Improved administration, management and performance across all sectors				

ANNEX 2: OPERATIONAL MATRIX

AGRICULTURE AND FOOD SECURITY

l Agricultural Productivity and Diversification

Expected Outcome crease Increased smallholder inputs access to Increased smallholder inputs access to Indequate financial arming access to infrastructure and infrastructure and infrastructure and distribution systems. Promoting irrigation Inadequate technical capacity Inadequate integration of irrigation initiatives Inadequate Ina	ا ا	Modium Toum	Ctuatorios	Constantinto	Trans A officer and A officialisa
Increased smallholder Improving access to Inadequate financial farmers' output per inputs resources - Unavailability of a contract farming policy - Underdeveloped private sector - Underdeveloped private sector - Underdeveloped infrastructure and distribution systems - Inadequate technology - Inadequate technical capacity - Inadequate technical capacity - Inadequate irrigation - Promoting irrigation research - Inadequate irrigation	2021	Expected Outcome	Suategies	Constraints	FOCUS ACTIONS AND ACTIVITIES
farmers' output per inputs resources - Unavailability of a - Underdeveloped private - Underdeveloped private - Sector - Underdeveloped infrastructure and distribution systems - Inadequate technology - Land tenure system, - Inadequate technical - Capacity - Inadequate technical - Capacity - Inadequate irrigation - Promoting irrigation research - Promoting contract - Lack of policy - Inadequate integration - Capacity - Inadequate integration - Lack of policy - Capacity - Lack of policy - Capacity - Capacity - Lack of policy - Capacity - C	To increase	Increased smallholder	Improving access to	-Inadequate financial	-Implement the input subsidy program (seed and fertilizer)
ontract farming policy - Underdeveloped private - Sector - Underdeveloped private - Sector - Underdeveloped private - Sector - Underdeveloped infrastructure and distribution systems - Inadequate technology - Land tenure system, - Inadequate technical - Inadequate technical - Inadequate technical - Inadequate irrigation - Inadequate integration of irrigation initiatives - Inadequate integration of irrigation initiatives - Inadequate integration - I	agricultural	farmers' output per	inputs	resources	- Implement contract farming arrangements
Contract farming policy -Underdeveloped private assector -Underdeveloped infrastructure and distribution systems -Inadequate technology -Inadequate technical capacity -Inadequate technical capacity -Inadequate irrigation research -Poor protection of water catchment areas -Inadequate integration of irrigation initiatives -Inadequate integration of irrigatives -Inadequate integration of irrigatives -Inadequate integration of irrigation initiatives -Inadequate integration of irrigatives -Inadequate irrigativ	productivity and	unit area		-Unavailability of a	- Improve access to credit
-Underdeveloped private sector -Underdeveloped infrastructure and distribution systems -Inadequate technology -Land tenure system, -Inadequate technical capacity -Inadequate technical landequate irrigation research -Poor protection of water catchment areas - Inadequate integration of irrigation initiatives - Lack of policy -Exploitative behaviour -Low levels of literacy funderstanding	diversification			contract farming policy	
sector -Underdeveloped infrastructure and distribution systems -Inadequate technical capacity -Inadequate water management capacity -Inadequate irrigation research -Poor protection of water catchment areas - Inadequate integration of irrigation initiatives -Lack of policy framework si-Side-selling -Exploitative behaviour -Lack of Lack of understanding and awareness				-Underdeveloped private	-Enhance PPPs in the input market
-Underdeveloped infrastructure and distribution systems -Inadequate technology -Land tenure system, -Inadequate technical capacity -Inadequate water management capacity -Inadequate irrigation research -Poor protection of water catchment areas - Inadequate integration of irrigation initiatives -Lack of policy framework s-Side-selling -Exploitative behaviour -Lack of understanding and awareness				sector	
infrastructure and distribution systems -Inadequate technology -Land tenure system, -Inadequate technical capacity -Inadequate water management capacity -Inadequate irrigation research -Poor protection of water catchment areas - Inadequate integration of irrigation initiatives -Lack of policy framework services of irrigation initiative behaviour -Lack of policy framework services behaviour -Lack of understanding and awareness				-Underdeveloped	
- Inadequate technology - Land tenure system, - Inadequate technical - capacity - Inadequate water - management capacity - Inadequate irrigation - Poor protection of water catchment areas - Inadequate integration of irrigation initiatives - Lack of policy framework - Exploitative - behaviour - Lack of				infrastructure and	
Land tenure system, Inadequate technical capacity Inadequate water management capacity Inadequate irrigation research Poor protection of water catchment areas Inadequate integration of irrigation initiatives Lack of policy framework Side-selling Exploitative behaviour Lack of Lack of understanding and awareness			Promoting irrigation	-Inadequate technology	-Develop and rehabilitate irrigation schemes
-Inadequate technical capacity -Inadequate water management capacity -Inadequate irrigation research -Poor protection of water catchment areas - Inadequate integration of irrigation initiatives -Lack of policy framework -Side-selling -Exploitative behaviour -Low levels of literacy funderstanding			farming	-Land tenure system,	-Strengthen technical capacity for irrigation management
capacity -Inadequate water management capacity -Inadequate irrigation research -Poor protection of water catchment areas - Inadequate integration of irrigation initiatives -Lack of policy framework Side-selling -Exploitative behaviour -Low levels of literacy -Lack of understanding and awareness)	-Inadequate technical	-Promote establishment of water users associations
-Inadequate water management capacity -Inadequate irrigation research -Poor protection of water catchment areas - Inadequate integration of irrigation initiatives -Lack of policy framework Side-selling -Exploitative behaviour -Low levels of literacy understanding and awareness				capacity	-Improve the technical & management capacities of WUA
management capacity Inadequate irrigation research Poor protection of water catchment areas Inadequate integration of irrigation initiatives Lack of policy framework Side-selling -Exploitative behaviour Low levels of literacy understanding and awareness				-Inadequate water	-Conduct irrigation research
-Inadequate irrigation research -Poor protection of water catchment areas - Inadequate integration of irrigation initiatives -Lack of policy framework -Side-selling -Side-selling -Lexploitative behaviour -Low levels of literacy -Lack of understanding and awareness				management capacity	-Establish rainwater harvesting systems
research -Poor protection of water catchment areas - Inadequate integration of irrigation initiatives -Lack of policy framework -Side-selling -Exploitative behaviour -Low levels of literacy -Lack of understanding and awareness				-Inadequate irrigation	-Promote effective management of water catchment areas
-Poor protection of water catchment areas - Inadequate integration of irrigation initiatives -Lack of policy framework -Side-selling -Exploitative behaviour -Low levels of literacy -Lack of understanding				research	- Promote integration of irrigation initiatives with other livelihood activities
catchment areas - Inadequate integration of irrigation initiatives -Lack of policy framework -Side-selling -Exploitative behaviour -Low levels of literacy -Lack of understanding				-Poor protection of water	
- Inadequate integration of irrigation initiatives -Lack of policy framework -Side-selling -Exploitative behaviour -Low levels of literacy -Lack of understanding				catchment areas	
Lack of policy framework -Side-selling -Exploitative behaviour -Low levels of literacy -Lack of understanding				- Inadequate integration	
framework -Side-selling -Exploitative behaviour -Low levels of literacy -Lack of understanding			Dromoting contract	Uningation initiatives	Ringlize contract forming
nents -Side-selling -Exploitative behaviour -Low levels of literacy -Lack of understanding			farming connact	-rack of policy framework	-1 mande contract farming stratemy and notice.
-Exploitative behaviour -Low levels of literacy -Lack of understanding			arrangements	-Side-selling	strategy and points -Implement the contract farming strategy and policy
of literacy)	-Exploitative	-Conduct awareness campaigns
literacy				behaviour	-Encourage contracts with
-Lack of understanding				-Low levels of literacy	flexible pricing arrangements
understanding and awareness				-Lack of	
and awareness				understanding	
מוות מאמוכווכסס				and awareness	

	Strengthening farmer institutions	-Low literacy levels -Inadequate infrastructure -Poor coordination -Inadequate extension services	-Develop appropriate infrastructure -Enhance management and group dynamics capacity of farmer institutions -Strengthen extension services on formation and management of farmer institutions
Increased agricultural diversification	Promoting production of non traditional crops	-Inadequate registered varieties -Lack of innovations -Inadequate breeders and basic seeds -Low adoption of modern technologies -Migratory pests -Insufficient extension personnel -Insufficient farmer knowledge -Lack of policy, legislation and regulations governing the horticultural industry -Inadequate support services -High cost of input -Inadequate support infrastructure	-Develop an agriculture diversification policy -Undertake research on priority crops -Undertake research on priority crops -Increase production of pulses -Develop and register new improved varieties -Identify priority crops for diversification -Increase the number of breeders -Expand seed multiplication programmes -Expand seed multiplication programmes -Promote transfer and adoption of improved technologies -Increase the number of extension workers -Conduct staff and farmer training on diversification and productivity enhancing technologies -Increase production of horticultural crops -Increase production of horticultural crops -Increase production of votos and tubers -Increase production of vaccines/vaccination services for poultry diseases -Promote increased production of high quality feed including development of local feed formulations -Increase investment in livestock production -Interease investment in livestock personnel -Improve access to land
Increased production of high value agricultural commodities for exports	Promoting agricultural production for both domestic and export markets	-Poor coordination and organization -Inadequate improved seed -Lack of market information -High costs of certification	-Promote out-grower schemes, farmer associations and cooperatives for specific commodities -Strengthen managerial and technical capacity of producer organizations -Promote partnerships, dialogue and cooperation between value chain stakeholders -Promote production, distribution and utilization of improved seed, chemicals and fertilizersConduct market research

1.2 rood Security	L.Y			
Goal	Medium-Term	Strategies	Constraints	Focus Actions and Activities
	Expected Outcome			
To ensure sustained	Food self-sufficiency at Implementing	Implementing	-Poor management of	-Improve capacity and management of strategic grain reserves
availability of food	household and national	policies to sustain	grain reserves	-Provide post- harvest handling technologies
to all Malawians at	levels	food availability and	-Limited access to	- Promote village grain bank schemes including improved granaries and mini
all times at		accessibility	markets	silos
affordable prices			-Unreliable and	-Enhance food market information systems
			unpredictable markets	-Improve distribution system
		Ensuring an effective	-Inadequate financial and	-Improve collection, analysis and dissemination of agricultural statistics
		early warning system	human resources	-Procure equipment
			-Limited information	-Develop support infrastructure
			-Inadequate	
			equipment	
			-Lack of support	
			infrastructure	

	Strengthening farmer-led extension and training services	-Inadequate financial and human resources -Inadequate equipment -Low literacy Levels	-Recruit and train personnel -Procure equipment -Conduct sensitization Campaigns
	Reducing post harvest losses	-Poor storage technologies -Limited information -Poor management practices/ systems	-Promote improved on-farm storage technologies and facilities -Promote research development -Expand post harvest related extension services -Develop harvest and post harvest management practices/systems
Increased and sustained food availability and accessibility	Promoting income generating activities	-Low literacy levels -Limited opportunities -Hostile business environment	-Conduct entrepreneurship training -Improve income generating opportunities in both rural and urban areas -Create a conducive entrepreneurship environment -Improve access to affordable credit
	Improving agricultural market systems	-Limited market information -Poor distribution systems -Inadequate support infrastructure -Inadequate human and financial resources	-Improve distribution systems -Enhance food market information systems -Provide support infrastructure -Recruit and train personnel
	Promoting dietary diversification	-Conflicting messages -Insufficient knowledge on food budgeting, processing, utilization, and storage -Limited skills -Lack of emphasis on local recipes -Inadequate dietary monitoring and assessment -Low consumption of	-Develop standardized messages covering production to utilization -Develop local recipes with emphasis on the multi-mix approach -Conduct regular dietary monitoring and assessments -Promote consumption of enriched and fortified foods especially for vulnerable groups -Intensify IEC on budgeting, consumption, processing and preparation of enriched and fortified foods -Recruit and train extension workers on prevention of micronutrient deficiencies -Conduct staff and farmer training in food budgeting, processing, preservation, storage and utilization.

		enriched and fortified	
		-Inadequate human	
		resources	
	Improving	-Inadequate	-Strengthen food distribution systems
	coordination and	financial and	-Improve targeting mechanisms
	management of food	human resources	- Develop support infrastructure
	aid and imports	-Inadequate	-Promote a coordinated approach to planning and management of food aid and
		infrastructure	imports
		-Weak legislation	-Ensure that food aid conforms to the bio-safety and other related legislations
		entorcement mechanism	-Rectuit and train personnel -Procure appropriate equipment
Improved agricultural	Improving the	-Inadequate	-Develop support infrastructure
market systems	functioning of	infrastructure	-Intensify information generation, dissemination, and utilisation
	agricultural markets	-Inadequate information	-Recruit and train personnel
		generation and	-Procure equipment
		dissemination	
		-Inadequate financial and	
		numan resources	
Enhanced agricultural	Strengthening and	-Inadequate	-Establish a warehouse receipt system
risk management	scaling-up market	infrastructure	-Strengthen institutional and regulatory framework
	based risk	-Weak institutional and	-Employ supply/price hedging strategy
	management	regulatory framework	-Strengthen the framework and capacity for call options import contracts
	initiatives	-Inadequate awareness	-Establish a commodity market insurance system
			-Develop a weather related insurance product
	,		-Strengthen weather torecasting capability for agriculture
	Providing technical	-Inadequate financial and	-Recruit and train personnel
	and regulatory	human resources	-Provide support infrastructure
	services	-Inadequate	-Procure equipment
		infrastructure and	-Review and harmonize policies
		equipment	-Improve coordination mechanisms
		-Weak policy framework	
		-Lack of coolumation	

ENERGY, INDUSTRIAL DEVELO PMENT, MINING AND TOURISM

2.1 Energy

Goal	Medium-Term Expected Outcome	Strategies	Constraints	Focus Actions and Activities
To generate sufficient	Improved capacity	Developing	-Huge capital investment	-Construct additional power stations
meet the economic and	energy generation,	stations		-Promote private sector involvement
social demands	transmission and			-Mobilise resources
	distribution			-Develop coal fired power plants
				-Implement the Kapichira II power station project
				-Develop other hydro power projects such as Mpatamanga on Shire, Kayerekera
				station, Chisombo on Bua River, Lower Fufu, Songwe river basin, Chizuma and
				Chimgonda
		Promoting public-	-Cumbersome	-Facilitate implementation of independent power production
		private partnerships	procedures	-Conduct awareness campaigns
		in energy generation	-Inadequate resources	-Streamline procedures
		and distribution		-Mobilise resources
		Improving	-Obsolete machines	-Engage in regional Interconnection;
		management of	- Inadequate equipment	-Rehabilitate Nkula A and B hydropower stations
		energy generation,	- Corruption	-Conduct management reforms in the energy sector
		transmission,	-Vandalism and theft	-Facilitate implementation of Public Private Partnerships in power distribution
		distribution and	- Siltation and	-Review the Electricity Master Plan
		supply	proliferation of weeds	-Develop an Energy Development Master Plan
			-Poor coordination	-Install smart meters on distribution feeders
			among stakeholders	

Promoting the use of the grinding
-Inadequate fuel diversification in the production of liquid fuel -Outdated policy

2.2 Industrial Development

-Strengthen MIRTDC -Conduct capacity building -Analyse supply chain for cost reduction -Promote public private partnerships	-Strengthen the Malawi Bureau of Standards -Sub-contract external accredited quality assurance institutions -Build capacity for undertaking compliance programmes within MIRTDC; -Assist companies establish ISO compliant production systems -Run Quality Management Systems courses -Conduct awareness campaigns	-Promote use of technology - Conduct awareness campaigns -Undertake capacity building -Undertake research on potential products
-Low capacity -Uncoordinated planning -Inadequate financial resources -Fewer sources of capital	-Lack of an accredited ISO certified body -Low capacity -Weak enforcement of regulation -Corruption -Inadequate equipment - Lack of awareness	-Limited technical expertise -Limited technology use -Low literacy levels -Limited information
Encouraging provision of infrastructure and support services for industrial development	Facilitating accreditation of quality assurance institutions and enhance quality standards	Promoting value addition in existing and potential products
Increased industrial output	Increased value addition	

	٩	
	C	
	1.90	
4		

Goal	Medium Term Strategies Expected Outcome	Strategies	Constraints	Focus Actions and Activities
To increase supply of		Promoting adherence	-Weak Standards,	-Build capacity of MBS and other related institutions
services for domestic	production, diversification and	tradable products	and Metrology (SQAM)	standards
and international	competitiveness of	1	infrastructure	-Conduct awareness campaigns
market while	tradable		-High cost of	
sustaining competitive	commodities		certification	
advantage			-Weak enforcement	
			-High cost of production	

Promoting trade in	-Weak	-Improve the quality of telecommunication and support infrastructure
services	telecommunication	-Provide tailor-made training
	infrastructure	-Participate in bilateral and regional service trade events
	- Inadequate expertise	
	- Failure to meet	
	international service	
	standards	
Promoting product	-Tariffs and Non Tariff	-Participate in trade negotiations
and market	barriers to trade	-Undertake product and market promotion
diversification	-Lack of product and	-Improve support infrastructure
	market promotion	-Undertake research to explore potential export commodities and markets
	-Poor transport	
	infrastructure	
	-Inadequate information	
	-Narrow export base	
Enhancing access to	-Inadequate transport	-Promoting trade integration
both traditional and	infrastructure	
emerging export	-Lack of adherence to	
markets	standards	
	-Failure to effectively	
	implement trade	
	agreements	
	-Lack of analytical	
	capacity	
Promoting efficient	-High infrastructure cost	-Enhance the development of one stop border posts
and modernized	-Un-harmonised border	-Procure appropriate equipment
boarder infrastructure	operation systems	-Implement a simplified payment mechanism for all fees and charges
to facilitate trade	-Inadequate equipment	
	-Illaucquate skills	

-Train existing and potential exporters -Review policies and guidelines -Review policies and guidelines -Participate in international trade facilitation institutions - Develop support infrastructure -Facilitate accreditation of MBS -Promote adherence to international standards -Establish an export credit guarantee scheme	-Enhance coordination among stakeholders -Provide supportive infrastructure -Train personnel	-Establish appropriate institutions -Recruit and train personnel -Conduct awareness campaigns and training -Enhance enforcement of regulations - Strengthen investment and export promoting institutions - Improve coordination amongst private sector trade institutions	-Build capacity of investment and trade facilitation institutions -Encourage value addition, certification and quality assurance -Enhance awareness campaigns -Review and harmonise trade policies
-Inadequate capacity to market Malawi products -Poor coordination -Weak trade facilitation institutions -Inadequate human and financial resources -Inadequate support infrastructure (roads, rail, airports, ports, utilities, and telecommunication) -Weak certification mechanisms Unfavourable export policies -Unfavourable macroeconomic environment	-Inadequate financial resources -Inadequate skills -Poor coordination	-Lack of human and financial capacity -Lack of institutions -Lack of enforcement of regulations	-Low quality products - Poor information packaging and dissemination -Unfavourable trade policy obligations
Promoting exports	Simplifying and streamlining trade and custom procedures	Improving fair trading and intellectual property rights	Promoting consumer loyalty to domestically produced goods;
		Improved legal, regulatory and institutional framework	Increased domestic and international market share

_	1 - 1 1	D	P. 11 1 F
	mproving trade	-Poor stakeholder	-Build capacity of exporters
u	etwork and	coordination	-Strengthen trade facilitation institutions
<u> </u>	information for	-Weak trade facilitation	-Develop and rehabilitate support infrastructure
<u>e</u>	xports	-Weak support	-Develop information hub
		infrastructure	
		-Inadequate human and	
		financial resources	
		- Lack of an information	
		hub	
		-Low literacy levels	

2.2.2 Agro-r rocessing	20			
Goal	Medium Term Expected Outcomes	Term Strategies	Constraints	Focus Actions and Activities
To move up the value chain in key crops, and increase agroprocessed products for both domestic and export markets	Increased value addition to agricultural products	Improving supporting infrastructure for agro-processing of key industries	-Inadequate human and financial resources -Inadequate equipment	-Develop and rehabilitate support infrastructure (roads, rail ,airports, utilities and telecommunication) -Procure appropriate equipment -Train personnel
		Promoting investment in agro-processing with special focus on private sector participation	-Lack of incentives -Inadequate capacity -Inadequate raw materials -Lack of awareness -High cost of capital -Weak support institutions	-Build capacity for agro processing support institutions -Provide investment incentives -Develop and rehabilitate storage infrastructure -Encourage research, transfer and adoption of modern technologies -Promote public private partnerships -Conduct awareness campaigns

	Promoting OVOP on agricultural products	-Poor coordination -Low literacy levels	-Procure and install agro-processing equipment -Increase number of agro-processed products -Identify potential markets for agro-processing -Build capacity in supply chain management of agro-processed products
Diversified agro- processed products	Improving policy and regulatory frameworks impacting on agro-processing	-Poor coordination -Conflicting policies -Lack of awareness	-Review and disseminate policy and legislation -Develop institutional capacity
	Strengthening capacity for small and medium scale agro-processing enterprises	-Limited technical expertise -Limited access to credit facilities -Lack of efficient and effective productivity centres	-Train stakeholders -Promote linkages between cooperatives and rural financers -Promote access to credit -Build capacity for agro processing support institutions -Build capacity within MIRTDC to conduct productivity improvement training -Enhance coordination among stakeholders in agro processing -Expand production of key agricultural commodities -Link SMEs to markets -Establish SMEs associations and cooperatives

0				
Goal	Medium Term	Term Strategies	Constraints	Focus Action and Activities
	Expected Outcomes			
To increase production	Increased	Producing detailed	-Inadequate human and	-Conduct literature review
and value addition of	exploration and	geological map of	financial resources	-Undertake sampling and sample analysis
mineral resources	mining	Malawi	-Lack of modern	-Recruit and train personnel
			equipment	-Conduct geological, geochemical and geophysical mapping
				-Disseminate updated geological maps
				-Intensify drilling for mineral identification
				-Conduct sample analysis for mineral identification
				-Procure modern equipment
				-Produce mineral resources and occurrence map
				-Disseminate undated mineral resources and occurrence mans

-Recruit and train personnel -Review Mines and Minerals Act -Review Mines and Minerals Act - Facilitate formation of mining cooperatives and associations -Streamline procedures -Conduct stakeholder training in mineral production and value addition -Establish a mining investment and development company - Construct and equip a modern laboratory - Promote public private partnerships - Develop mining regulations	n and -Recruit and train personnel -Conduct sensitisation campaigns -Conduct field inspections on compliance ss	-Conduct sensitization campaigns on occupational health and safety -Conduct mining occupational health and safety (OHS) inspections ss -Undertake mining accident investigation rt -Enforce explosives regulations	- Realign mining policies to regional and international protocols -Develop standard mining agreements -Establish a transparent framework for managing mineral rights - Review mining royalties - Promote mineral research and development - Develop and rehabilitate infrastructure - Improve coordination among stakeholders - Train personnel - Provide incentives to small scale miners - Conduct sensitisation campaigns	n and -Procure equipment s -Train personnel c maps - Review existing seismic activities - Identify active seismic points - Update seismic maps - Monitor seismic activities
-Inadequate human and financial resources -Cumbersome procedures -Inadequate support infrastructure -Weak regulatory framework in environmental management	-Inadequate human and financial resources -Inadequate support equipment -Lack of awareness	-Inadequate human and financial resources -Lack of awareness -Inadequate support equipment -Corruption	-Limited expertise -Lack of information -Inadequate support infrastructure -Inadequate resources - Weak coordination -Inadequate incentives	-Inadequate human and financial resources - Outdated seismic maps -Inadequate equipment
Strengthening institutional capacity of the sector	Enforcing legislations on sustainable use and management of mineral resources	Enforcing environmental, occupational health and safety in the mining sector	Promoting both local and foreign investment	Strengthening seismic monitoring
Improved legal and institutional framework			Increased participation by small and medium scale miners	Updated geological information system;

2.4 Tourism		Developing an integrated data management system	-Inadequate human and financial resources - Outdated geological maps -Information gaps -Inadequate equipment	-Recruit and train personnel -Procure equipment -Intensify data collection, storage and utilization -Computerise all the existing geological data - Create an integrated management information system - Operationalize and maintain the integrated management information system
Goal	Medium Term Expected Outcomes	Strategies	Constraints	Focus Actions and Activities
To develop and promote a vibrant tourism industry	Increased contribution of the tourism industry to GDP	Enforcing tourism industry standards and planning controls	-Limited number of skilled personnel -Corruption -Inadequate equipment	-Conduct inspections, classifications and licensing of tourism enterprises -Recruit and train personnel -Procure relevant equipment -Implement zero tolerance on corruption
Strengthening		institutional capacity at all levels	-Bureaucratic procedures and inefficiencies -Limited number of skilled personnelLack of modern training facilities; -Inadequate support infrastructure -Limited financial capacity	- Establish an autonomous Marketing and Quality Assurance body; -Review and implement training programmes -Harmonize tourism and hospitality standards; -Construct hospitality training facilities; -Conduct Hospitality Enterprise Star Grading exercise in the country; -Conduct awareness campaigns on tourism regulations; -Introduce recognition awards of excellence; -Promote stakeholders' liaison and public relations; -Undertake a comprehensive review of tourism laws; -Harmonize industry standards with relevant authorities
		-Enhancing marketing of Malawi's tourism products	-Prohibitive rates (prices) for locals -Limited financial resources -Uncoordinated approach to tourism promotion	-Conduct awareness campaigns -Produce newsletters and electronic programmes -Facilitate establishment of tourism clubs in schools -Conduct stakeholder liaison meetings -Develop a tourism database -Participate at travel, trade and investment forums; -Improve tourism packaging and distribution -Provide incentives to local tourists

Improved environment for doing business in tourism stourism stourists control from the formula for doing business in tourists control for formula for doing business in the formula for doing for do	Providing 1-1 infrastructure that is resupportive to tourism development Promoting the 1-1 development of in high-quality 1-1-1 tourism facilities in findesignated areas including Lake Malawi 1-1 Promoting eco-1-1 tourism 1-1-1-1-1 In Promoting 1-1-1-1 In participation of relocal investors in the tourism industry 1-1 In participation of 1-1 In participation of 1-1 In participation of 1-1 In the tourism industry 1-1 In	-Limited financial resources -Inadequate equipment -Poor coordination -Inadequate support infrastructure -Inadequate human and financial resources -Limited financial resources -Lack of awareness -Inadequate incentives -Inadequate incentives -Inadequate incentives -Inadequate incentives -Inadequate incentives -Inadequate incentives -Lack of awareness -Lack of incentives -Lack of incentives -Lack of awareness -Limited stakeholder	-Up-grade access roads and airstrips to areas of tourist attractions; -Provide reliable utilities to tourist areas; -Maintain and improve tourism website; -Develop tourism database and e-library -Procure equipment -Improve coordination among stakeholders -Construct up-marker resorts; -Construct up-marker resorts; -Construct cultural villages; -Develop international conference and shopping facility; -Construct Cultural villages; -Develop international conference and distribution; -Improve tourism facilities on mountains and other areas of natural outstanding beauty -Improve tourism packaging and distribution; -Improve tourism packaging and distribution; -Improve tourism packaging and distribution; -Create tourist circuit (routes) and networking -Strengthen tourism information systems -Create tourist information systems -Conduct sensitization meetings and workshops -Create tourism promotion events -Conduct tourism promotion events -Provide co-tourism investment incentives -Provide environmentally friendly technologies -Protect and rehabilitate natural resources -Conduct awareness campaigns; -Provide investment incentives -Provide investment incentives -Provide investment incentives -Provide public private partnerships -Encourage participation of communities in managing and conserving tourism resource base
	15 I!!	support -Inadequate support infrastructure	-Provide support infrastructure

3.0 TRANSPORT INFRASTRUCTURE AND NSANJE WORLD INLAND PORT 3.1 Road Infrastructure

Goal	Medium Term Expected Outcomes	Strategies	Constraints	Focus Actions and Activities
To ensure provision of safe, affordable, accessible and high quality road transport system	Reduced lead times and cost on exports and imports	Ensuring comprehensive and coordinated planning of road and other modes of transport	-Inadequate financial and skilled human resources -Lack of sector investment plan	-Review the National Transport policy -Finalise and implement the Transport Sector Investment Programme (TSIP) -Strengthen sector coordination -Harmonise transport sub-sector strategies - Improve the National Transport Database -Improve on transport data collection, processing and utilisation -Mainstreaming cross cutting issues
		Enhancing Public Private Partnerships in the transport system	-Inadequate skills -Lack of information -High costs of capital -Inadequate financial resources -Costly investments -Underdeveloped private sector	-Promote private sector participation in service provision -Train personnel -Disseminate information on transport sector investment opportunities -Provide investment incentives -Enforce concessional agreements
		Enhancing axle load control	-Inadequate financial and skilled human resources -Inadequate infrastructure and equipment -Corruption -Weak enforcement	-Recruit and train personnel -Procure additional weighbridge equipment and software including cctv -Develop and rehabilitate support infrastructure -Strengthen anti-corruption drive -Strengthen enforcement of axle load control
	Improved domestic and cross border mobility and connectivity	Providing adequate network of roads based on appropriate standards	-Inadequate financial and skilled human resources -Inadequate equipment -Weak enforcement of standards -Low capacity of contractors	-Build capacity of contractors -Train personnel in various trades -Procure construction equipment -Strengthen anti-corruption drive -Improve on revenue collection -Procure, monitor and supervise civil works -Replace timber deck bridges with concrete decks -Improve rural road network -Replace single-lane bridges with double lane -Rehabilitate and upgrade roads to meet regional agreed standards
		Enhancing routine road maintenance and upgrading	-Inadequate financial and skilled human resources -Inadequate equipment	-Build capacity of contractors -Train personnel in various trades -Procure construction equipment

	-Low capacity of	-Improve on road levy collection -Procure monitor and supervise civil works
	-Weak enforcement of	-Prepare and implement annual roads maintenance programs
Building technical	-Inadequate financial and	-Recruit and train personnel
and institutional	human resources	-Procure office and construction equipment
capacity at all		-Improve on management systems and networks
levels		-Improve on revenue collection
		-Develop one stop border posts
Promoting	-Low capacity of	-Build capacity of local contractors
competition in the	contractors	-Train personnel in various trades
construction	-Inadequate skilled	-Procure construction equipment
industry	human resources	-Prepare annual roads programme
	-Inadequate equipment	-Open up the sector to contractors and consultants from the region and beyond
	-Weak enforcement of	
	regulations and standards	
Improving	-Inadequate human and	-Build capacity of contractors and consultants
management of	financial resources	-Promote private sector participation
road network	-Inadequate equipment	-Train personnel in various trades
throughout the	-Low capacity of	-Procure construction equipment
country	contractors and	-Prepare annual roads program
	consultants	 -Prepare and offer routine and periodic maintenance contracts -Monitor and supervise civil works
Promoting high	-Inadequate skilled	-Enforce road safety standards and traffic regulations
road safety	human resources	-Improve on road signage and markings
standards and	-Inadequate equipment	-Conduct safety audits
traffic management	and support	-Treat black spots
	infrastructure	-Implement non-motorised vehicle protection measures
	-Corruption	-Implement speed reduction measures
	-Vandalism	-Conduct safety education
	-Lack of awareness	
	regulations and standards	
	0	

3.2 Rail Transport

Goal	Medium-Term Expected Outcome	Strategies	Constraints	Focus Actions and Activities
The goal is to develop an efficient and effective rail network	Improved regional and international connectivity	Rehabilitating and expanding the railway line and related infrastructure	-Inadequate financial and skilled human resources -Low capacity of contractors -Inadequate equipment -Vandalism	-Carry out emergency track spot repairs -Carry out emergency bridge and culverts repairs -Carry out rail track and bridge maintenance
		Creating linkages to ports, industrial sites and regional and international markets	Inadequate financial and skilled human resources -Low capacity of contractors -Inadequate equipment -Low traffic volumes -Poor coordination	-Build capacity of the sector -Train personnel -Procure equipment -Improve on marketing of rail services -Implement the multi-modal approach to transportation -Rehabilitate infrastructure -Strengthen stakeholder coordination
	Improved regulatory and institutional framework	Promoting railway safety and environmental protection	-Inadequate financial and skilled human resources -Inadequate equipment -Obsolete locomotives -Vandalism	-Build capacity of contractors and consultants -Train personnel -Procure new locomotives and rail safety equipment -Enforce rail safety standards and traffic regulations -Improve on rail signage and markings -Explore the possibility of migrating from diesel powered to electric locomotives -Conduct awareness campaigns
	Improved rail infrastructure and reliability	Improving operational efficiency and commercial viability of the existing railway infrastructure and levels of service	-Inadequate financial and skilled human resources landequate rail coverage within the country -Poor asset management and maintenance by the concessionaire -Weak regulatory environment -Low traffic volumes -Poor marketing strategies -Lack of support from the private sector	-Expand rail coverage within the country -Improve on asset management and maintenance -Enforce adherence to concession agreements -Strengthen the regulatory framework -Encourage competition in the sub-sector -Conduct advocacy campaigns -Improve on marketing of rail services -Train personnel

EDUCATION, SCIENCE AND TECHNOLOGY Education Basic Education

Time and a control of the control of				
Goal	Medium Term	Strategies	Constraints	Focus Actions and Activities
	Expected Outcomes			
To improve access to	Expanded equitable	Accelerating	-Lack of capacity of	-Construct and rehabilitate classrooms, resource centres, libraries, laboratories,
education	access to caucation	existing learning	-Poor coordination	Basic Education (CBE) centres:
		institutions and	-Untimely disbursement	-Construct and rehabilitate school sanitary facilities
		construction of	of funds	-Improve coordination of community participation
			-Rigorous procurement	-Conduct M & E.
		infrastructure at all	processes	
		levels;	-Inadequate project	
			monitoring and	
			supervision	
			-Inadequate financial	
			resources.	
		Scaling up school	-Limited financial	-Provide school meals to all primary schools
		feeding	resources	-Procure and distribute seeds (Maize and Soya) to districts piloting Home-
		programmes	-Laborious management	Grown School Meals programme
			of school feeding	-Conduct awareness campaigns
			programme	-Provide kitchen facilities
			-Inadequate community	
			participation	
			I sole of annexate	
			-Lack of support infrastructure	
		Scaling up School	-Prohibitive cultural	-Provide life skills education, counselling, care and support to teachers and
		Health and	attitude	OVCs in schools
		Nutrition, and HIV	-Poor sanitary facilities	-Provide micro-nutrient supplements
		and AIDS	-Poor diet diversification	-Support and expand de-worming programme in schools
		programmes	of food preparation skills	-Scale up safe, healthy and productive school environments
			-Stigma and	-Provide girl friendly sanitary facilities
			discrimination	-Conduct awareness campaigns
			-Poor community	
			participation	
			-Shortage of health	
			personnel	
		Scaling up of child	- Harmful cultural	-Provide life skills education, counselling, care and support to teachers and
		friendly schools	practices	OVCs in schools
		programmes	-Lack of awareness	-Develop mechanisms for reporting forms of child abuse

		lines	-Disseminate and enforce policy against all forms of corporal punishment
		on school discipline -Inadequate financial	 -Implement measures to reduce violence against children in schools -Conduct awareness campaigns
		resources	
	Providing a	-Prohibitive cultural	-Provide supportive infrastructure/ facilities for girls
	conducive	practices to girls'	-Review policies related to girls
	environment for	education;	-Provide grants to schools to address equity issues
	girls education	-Lack of girl-friendly	-Roll out 'mother groups' in all schools
	including boarding	sanitation facilities	-Provide girl friendly sanitary facilities
	facilities	-Inadequate financial	-Recruit more female teachers
		resources	
	Providing a	-Inadequate SNE	-Provide supportive infrastructure/ facilities for special needs students
	conducive	teachers, teaching and	-Review policies related to special needs students.
	environment for	s and	- Establish more and rehabilitate resource centres for children with special
	students with	assistive devices	needs.
	special education	-Lack of appropriate	-Provide special needs teaching and learning materials such as Braille materials,
	needs		assistive devices and training on use.
		infrastructure	
		-Highly skewed	
		distribution of special	
		needs students	
	Strengthening	-Lack of awareness	-Build appropriate capacity
	coordination and	-Limited community	-Conduct sensitization campaigns
	provision of ECD	participation	-Establish and rehabilitate preschool's sanitary and kitchen facilities
	and CBE	-Poor coordination of	-Develop, maintain and utilize database of programmes for out of school
		stakeholders	children and youth.
		-Lack of appropriate	-Scale up adult literacy and post literacy programmes.
		infrastructure	-Integrate technical and vocational training in CBE
		-Inadequate financial and	
	Promoting the role	-Poor coordination	-Mobilize private sector investment in Basic Education
	of private sector	-Inadequate financial	-Provide incentives to private investors
	and private	resources	-Strengthen coordination
	financing in	-Inadequate incentives	-Strengthen adherence to standards
	education system	-Weak enforcement of	
		standards	
	Promoting Public	-Lack of incentives	-Develop public-private partnership policy
	Tilyan		TIOVIUS IIISOIIUVOS IO DIIVAIS IIIVOSIOIS

	Partnerships in the provision of education infrastructure and services	resources	-Strengthen coordination
	Increasing number of girls opting for mathematics and science subjects at all levels	-Lack of awareness -High girl drop-out rate	-Conduct sensitization campaigns -Encourage career guidance in mathematics and science subjects
Improved quality and relevance of education	Training and recruiting additional teaching staff Providing adequate and relevant teaching and learning	-Inadequate capacity of training colleges -Ineffective deployment of teachers (more teachers in urban areas than in rural areas) -Inadequate incentives -Lack of support infrastructure infrastructure -Lengthy procurement procedures -Inadequate financial	-Construct new TTCs -Expand the Open Distance Learning teacher training programme -Train and recruit additional primary school teachers -Train ECD caregivers and CBE instructors -Provide attractive terms / conditions to teachers -Develop guidelines and train head teachers for double shifting and overlapping classrooms -Provide incentives to teachers under double shifting schools -Provide adequate supply of teaching and learning materialsProvide Continuing Professional Development (CPD) for teachers -Revise policies on teacher education and development -Develop proper guidelines of incentive schemes -Develop and rehabilitate support infrastructureIntroduce and implement teacher assistant system in primary classroomsProcure adequate and relevant teaching and learning materials -Build capacity of procurement personnel
	materials	Low capacity of suppliers -Corruption and fraud -Lack of support infrastructure -Mismanagement of school resources	-Improve procurement procedures -Improve distribution channels and management capacity
	Introducing standardized testing to measure and	- Inadequate resources and capacity	-Standardize testing in primary education to measure and monitor quality of learning and teaching at different levels

		monitor quality of learning and teaching		
		Reviewing and reforming school and training	-Limited financial and human resources -Lack of guidelines	-Identify national needs -Review the primary school curriculum -Incorporate national needs in the curriculum
		college curricula to address national needs at all levels		-Develop curricula for adult literacy -Introduce standardized testing to measure and monitor quality of learning and teaching
				-Develop and review guidelines -Recruit and train personnel
		Promoting systematic and	-Inadequate human and financial resources	-Recruit and train inspectors -Provide frequent inspection and advisory visits to schools
		regular inspection of all learning	-Inadequate skills of PEAs/Inspectors	-Conduct sensitization campaigns -Define career path for PEAs/Inspectors
		institutions	-Inadequate equipment -Lack of motivation	-Provide support infrastructure and equipment -Enhance accountability and transparency
			-Lack of support infrastructure	
			-Corruption	
In	Improved management	Decentralizing	and	-Devolve sector functions to local authorities
ar	and governance of education	management and	financial resources -I ack of annronriate	-Review devolution guidelines -Build institutional capacity at local levels
·		education system	information	-Enhance community participation and empowerment
			-Poor coordination	-Enhance school-based improvement planning and management -Enhance stakeholder coordination
		Strengthening	-Inadequate financial and	-Conduct annual school census
		education management and	human resources -Inadequate equipment	-Conduct school mapping -Train and recruit personnel
		information	-Unreliable data	-Procure equipment
		93961113		-Conduct sensitization campaigns on data management
				-Update database

4.1.2 Secondary Education

Goal	Medium-Term	Strategies	Constraints	Focus Actions/Activities
	Expected Outcome	Ö		
To improve access to	Expanded equitable	Accelerating	-Lack of capacity of	-Identify and rehabilitate all existing dilapidated secondary school facilities
quality and relevant	access to education	rehabilitation of	contractors	-Construct new secondary schools and hostels
education		existing learning	-Poor coordination	-Construct and rehabilitate teachers' houses.
		institutions and	-Rigorous procurement	-Promote monitoring and supervision of construction works
		construction of	processes	-Construct and rehabilitate school sanitary facilities
		additional	-Inadequate project	-Improve community participation
		infrastructure at all	monitoring and	-Recruit and train procurement personnel
		levels	supervision	-Enhance stakeholder coordination
			-Inadequate financial	-Strengthen capacity of contractors
		Scaling up School	-Inadequate financial	-Provide First Aid support mechanisms to secondary schools
		Health and	and human resources	-Strengthen AIDS Clubs
		Nutrition, and HIV	-Prohibitive cultural	-Promote nutritious diets in secondary schools
		and AIDS	attitude	-Promotion of home economics education
		programs	-Poor sanitary facilities	-Provide life skills education, counselling, care and support to teachers and
			-Poor diet diversification	OVCs in schools.
			of food preparation skills	-Provide micro-nutrient supplements.
			-Stigma and	-Scale up safe, healthy and productive school environments
			discrimination	-Provide girl friendly sanitary facilities
			-Poor community	-Conduct awareness campaigns
			participation Shortage of chills	
		Cooling on of shild	Logartin milting	Described life of water advisor connection consecuent and assessment to transform and
		Scaling up of child friendly schools	-riarmiui cuiturai nractices	-Frovide life skills education, counselling, care and support to teachers and OVCe in schools
		programmes	-Lack of awareness	-Develon mechanisms for renorting forms of student abuse
			-Lack of guidelines on	-Disseminate and enforce policy against all forms of corporal punishment
			school discipline	-Implement measures to reduce violence against students
				-Conduct awareness campaigns
		Providing a	-Prohibitive cultural	-Provide supportive infrastructure/ facilities for girls
		conductive	practices to giris	-Keylew policies related to gift students Drovide greats to schools to address equity issues
		cirtuolinicii toi	Caucaton, Lighty cleaned	-1 IOVIUS glains to semons to addices equity issues Drovida cirl friandly, coniton, facilities
		gins cuucanon includino boardino	-inging stewed distribution of special	-110vide giri mendiy sanitary facilities -Conduct sensitization campaigns
			needs students	-Construct girls' hostels
			-Lack of girl-friendly	
			sanitation facilities	

		infrastructure	- Provide incentives to teachers under double shifting schools
	Reviewing and	-Inadequate financial	-Conduct needs assessment
	reforming	and human resources	-Review the secondary school curriculum
	secondary school	-Lack of guidelines	-Incorporate national needs in the curriculum
	curricula to address		-Develop and review guidelines
	national needs		-Recruit and train personnel
	Providing adequate	-Lengthy procurement	-Procure adequate and relevant teaching and learning materials
	and relevant	procedures	-Build capacity of procurement personnel
	teaching and	-Inadequate financial	-Provide support infrastructure
	learning materials	resources	-Develop relevant teaching and learning materials
		-Low capacity of	-Implement zero tolerance on corruption
		suppliers	-Conduct sensitization campaigns
		-Corruption and fraud	-Develop and review textbook policy
		-Lack of support	-Improve procurement procedures
		infrastructure	-Improve distribution channels and management capacity
		-Mismanagement of	
		school resources	
	Promoting	-Inadequate human and	-Train and recruit inspectors
	systematic and	financial resources	-Provide frequent advisory and inspection visits
	regular inspection	-Inadequate equipment	-Conduct sensitization campaigns
	of all learning	-Corruption	-Procure equipment
	institutions		
Improved management	Decentralizing	-Inadequate human and	-Complete devolution of sector functions to local authorities
and governance of	management and	financial resources	-Build institutional capacity at local levels
education	financing of the	-Lack of appropriate	-Enhance community participation and empowerment
	education system	information	-Enhance school-based improvement planning and management
		-Poor coordination -Conflicting policies	-Enhance stakeholder coordination
	Strengthening	-Inadequate financial	-Conduct annual school census
	education	and human resources	-Conduct school mapping

Goal	Medium-Term Expected Outcome	Strategies	Constraints	Focus Actions and Activities
To improve access to quality and relevant education	Expanded equitable access to education	Accelerating rehabilitation of existing learning institutions and construction of additional infrastructure at all levels	-Lack of capacity of contractors -Poor coordination -Rigorous procurement processes -Inadequate project monitoring and supervision -Inadequate financial and human resources.	-Construct new infrastructure -Establish a college for special needs teacher education -Identify and rehabilitate all existing dilapidated tertiary and vocational facilities, -Strengthen and promote monitoring and supervision of construction works -Recruit and train procurement personnel -Enhance stakeholder coordination -Strengthen capacity of contractors
		Establishing new universities and colleges	-Lack of capacity of contractors -Rigorous procurement processes -Inadequate project monitoring and supervision -Inadequate financial and human resources -Corruption	-Construct new Universities and colleges -Strengthen and promote monitoring and supervision of construction works -Recruit and train personnel -Strengthen capacity of contractors -Provide support infrastructure
		Scaling up School Health and Nutrition, and HIV and AIDS programs	-Inadequate financial and human resources -Poor sanitary facilities -Poor diet -Stigma and discrimination	-Provide health support facilities -Establish and support resource centres -Promote nutritious diets -Provide life skills education, counselling, care and support -Enhance safe and healthy environments -Conduct awareness campaigns
		Providing a conducive environment for girls including boarding facilities	-Inadequate girl-friendly sanitation facilities	-Advocate for girl education -Provide guidance, counselling, care and support to girl students -Provide supportive infrastructure/ facilities for girls -Expand provision of grants to college and university students
		Providing a conducive environment for students with special education	-Inadequate SNE teaching and learning materials and devices -Inadequate appropriate SNE infrastructure	-Provide supportive infrastructure/ facilities for special needs students -Review policies related to special needs students -Conduct sensitization campaigns -Train and recruit SNE lecturers -Establish and rehabilitate resource centres for children with special needs

	needs		-Provide special needs teaching and learning materials such as Braille materials, assistive devices
	Promoting Public Private Partnerships in the provision of education infrastructure and services	-Inadequate financial resources -Inadequate incentives	-Implement public-private partnership policy -Provide incentives to private investors -Strengthen coordination amongst stakeholders -Strengthen adherence to standards
	Increasing number of girls opting for mathematics and science subjects at all levels	-Lack of awareness -High drop-out rate	-Conduct sensitization campaigns -Encourage career guidance in mathematics and science subjects -Increase enrolment of girls in science programmes
Improved quality and relevance of education	Training and recruiting additional teaching staff	-Inadequate incentives -Lack of support infrastructure -Poor coordination -Inadequate financial resources	-Train and recruit personnel -Improve terms and conditions of service for lecturers -Provide supportive infrastructure
	Providing adequate and relevant teaching and learning materials	-Lengthy procurement procedures -Inadequate financial resources -Low capacity of suppliers -Corruption and fraud -Lack of support infrastructure	-Procure adequate and relevant teaching and learning materials -Build capacity of procurement personnel -Provide support infrastructure -Implement zero tolerance on corruption
	Reviewing and reforming college curricula to address national needs	-Inadequate financial and human resources	-Conduct needs assessment -Review tertiary curriculum to incorporate national needs -Develop and review guidelines -Recruit and train personnel
	Promoting systematic and regular inspection of all learning institutions	-Inadequate human and financial resources -Inadequate equipment -Corruption -Poor coordination	-Establish National Council for Higher Education -Provide adequate financial and material resources for inspectors to ensure adherence to standards -Train and recruit inspectors -Provide frequent advisory and inspection visits

and Strengthening -Inadequate financial and education human resources -Train and recruit personnel -Inadequate equipment information -Unreliable data -Conduct sensitization campaigns on data management -Inadequate equipment -Dracher management information systems -Conduct sensitization campaigns on data management -Update database	Decentralizing the management and management and financing of the education system Provide adequate Financial and management and financing of the education system Provide adequate resources and training		cted Strategies Constraints Focus Actions and Activities	Promoting -Inadequate expertise -Strengthen institutional capacity and multi- infrastructure - Strengthen public/private partnership disciplinary - Inadequate private - Provide support infrastructure and multi Inadequate equipment - Conduct awareness campaigns - Technophobia - Provide incentives - Lack of awareness - Weak institutional capacity - Lack of incentives - Provide incentives - Lack of incentives - Provide incentives - Lack of incentives - Lack of incentives - Lack of incentives - Lack of awareness - Retablish networks with other vibrant Science, Technology and Innovation institutions and - Inadequate support infrastructure - Provide support infrastructure - Inadequate equipment - Low literacy levels
Strengthening education management and information systems	Decentralizing the management and financing of the education system		Strategies	Promoting prioritized, focuse and multi- disciplinary research and development Enhancing linkage between research, science and technology institutions and users
Improved governance and management of education system		Science and Technology	Medium-Term Expected Outcome	Well-coordinated science and technology generation and dissemination
		4.2. Science an	Goal	To enhance the contribution of research, science and technology to national productivity and competiveness

	Promoting information, education and communication on research science	-Inadequate financial and human resources -Inadequate equipment -Lack of skills	-Provide equipment -Develop and rehabilitate support infrastructure -Enhance science and technology information dissemination -Procure equipment -Mainstream science and technology across sectors
	and technology development	infrastructure	-Recruit and train personnel
	ablic-	-Underdeveloped private	-Establish collaborative research programmes between the public and private
	in generating and	-Lack of incentives	-Enhance coordination
	disseminating beneficial	-Poor coordination -Poor linkages between	-Implement public-private partnerships policy -Provide incentives
	technologies	researchers,	-Promote innovative schemes and science culture at all levels
		Government and private sector	
Improved operation of	Mainstreaming	-Lack of awareness	-Conduct awareness campaigns
Research and Development	research, science	-Inadequate human and	-Train and recruit personnel
ınstıtutıons	and technology	financial resources	-Procure equipment
	development across all sectors	-Lack of support infrastructure	-rrovide support mitastructure -Advocate for research, science and technology mainstreaming
		-Inadequate equipment	-Establish research grants
	Strengthening	-Unavailability of	-Develop R&D regulations and guidelines
	institutional and	regulations	-Review policy and regulatory frameworks
	regulatory	-inadequate imancial and	-Procure equipment
	including	numan resources -Weak institution	-Strengtmen institution capacity -Undertake R&D and Innovation Surveys
	protection of	capacity	-Recruit and train personnel
	intellectual	-Inadequate equipment	-Review the education Act
	property rights		
	Strengthening	-Inadequate financial and	-Develop and implement capacity building programmes
	capacity for research, science	numan resources -Inadeauate eauinment	-Procure equipment -Provide incentives
	and technology	-Lack of support	-Develop and rehabilitate support infrastructure
	institutions	infrastructure	-Train and recruit personnel
		-Lack of incentives -Absence of mentorshin	-Review education curricula at all levels of education to strengthen the teaching and learning of science and technology
		for voung scientists	
		- Lack of career path for	
		researchers	

	Improving	-Inadequate financial	-Construct office buildings and other facilities
	scientific and	resources	-Establish a Science and Technology Park
	technological	-High cost of scientific	-Establish Incubation Centre for Science, Technology and Innovation
	infrastructure for	and technological	development
	research and	infrastructure	-Establish a cyber-infrastructure, S&T Radio and TV broadcasting studio
	development, and	-Lack of support	-Identify and promote centre of excellence in Science and Technology
	innovation	infrastructure	-Establish Malawi Academy of Sciences
Increased adoption of	Promoting	-Inadequate financial and	-Recruit and train personnel
beneficial technologies	adoption, transfer	human resources	-Develop and rehabilitate support infrastructure
	and utilization of	-Inadequate equipment	-Provide incentives
	beneficial	-Lack of support	-Procure equipment
	technologies	infrastructure	-Disseminate new technologies
		-Lack of incentives	-Conduct demonstrations on new technologies
		-High cost of scientific	-Develop intellectual property guidelines
		and technological	
		infrastructure	
		-Low literacy levels	

5.0: Public Health, Sanitation, Malaria and HIV and AIDS Management 5.1 Public Health

GOAL	Medium-Term Expected Outcome	Strategies	Constraints	Focus actions and Activities
To control and prevent occurrence and spread of diseases.	Reduced incidence and prevalence of diseases;	Improving availability of essential drugs and medical supplies;	- Inadequate financial resources - Pilferage of drugs and supplies - Inadequate skills in supply chain management;	 Strengthen the drugs and medical supplies chain; Train personnel in supply chain management; Develop guidelines and measures to eliminate drug pilferage
		Strengthening health support system;	 Inadequate human and financial resources Inadequate infrastructure and equipment Inadequate drugs and medical supplies High attrition rates; 	 Develop support infrastructure Procure equipment Recruit and train community health workers Ensure an efficient drugs and medical supplies procurement distribution system Provide incentives; Enhance community participation and ownership
		Strengthening community health service delivery system	- Inadequate incentives - Inadequate financial and skilled human resources - Inadequate infrastructure and equipment - Inadequate drugs and medical supplies	 Develop support infrastructure Procure equipment Recruit and train community health workers Ensure an efficient drugs and medical supplies procurement and distribution system Provide incentives in underserved areas Enhance community participation and ownership
		Improving the quality of diagnosis and treatment of communicable and non	- Lack of coordination - Lack of equipment - Inadequate skills to diagnose diseases - Inadequate coverage of EHP services	 Provide standardised treatment with supervision and support Scale up community based initiatives Ensure early case detection, and diagnosis Implement advocacy, communication and social mobilisation strategy

	communicable diseases		- Provide effective drugs for management of diseases including TB - Decentralise TB registration centres - Provide in-service training for health workers in the clinical management of Multi drug resistance and extra-drug resistance TB - Integrate TB and HIV at service delivery level - Address the needs of TB contacts
	Promoting water and food safety	- Inadequate human and financial resources	 Strengthen quality control systems Provide public sewerage systems in local councils Conduct water and food safety inspection Enforce standards for importation and preparation of water and foodstuffs Conduct health IEC
	Strengthening and promoting initiatives to improve prevention, diagnosis and treatment of emerging diseases such as cancer, and high blood pressure	- Lack of skilled human resources - inadequate technology capacity Inadequate infrastructure - Inadequate drugs and medical supplies - Inadequate financial resources - Lack of awareness	 Provide screening services Conduct awareness campaigns Develop and rehabilitate support infrastructure Procure equipment Recruit and train personnel Ensure an efficient drugs and medical supplies procurement and distribution system
Improved maternal and child health	Strengthening availability and utilization of quality integrated family planning services	- Lack of skilled human resources - Inadequate financial resources - Low literacy levels - Inadequate infrastructure - Lack of awareness - Youth-unfriendly reproductive health services	 Advocate for male involvement in family planning Recruit and train personnel Conduct awareness campaigns Ensure provision of youth-friendly reproductive health services Provide contraceptives through social marketing and community outreach Promote use of modern family planning methods
	Improving availability and	- Lack of skilled human resources - Inadequate financial resources	- Conduct awareness campaigns - Promote use of modern family planning

nethods - Provide skilled attendance at antenatal care, during birth, postnatal care, and under five services - Provide PMTCT services - Provide treatment of moderate and severe malnutrition - Provide micronutrient supplementation - Scale up extended program of immunization - Scale up and sustain Baby Friendly Health Initiatives (BFHI) facilities - De-worm Under 5 children	- Rehabilitate, upgrade and construct health facilities - Improve the internal procurement standard operating processes (SOPs) and procedures - Strengthen reporting and auditing - Establish proper financial system - Implement service level agreements - Train and recruit personnel - Deploy health workers in hard to reach areas - Provide human resource incentives for underserved areas - Strengthen internal financial controls - Strengthen the health management information and quality control systems - Procure equipment - Strengthen administrative, planning and central support systems - Strengthen sector coordination - Encourage private sector participation in the health sector	esources - Develop guidelines and national standards for esonnel; health, medical equipment - Recruit and train human resources - Procure equipment and technologies
- Low literacy levels - Inadequate infrastructure - Lack of awareness - Inadequate geographical coverage of health care facilities	- Inadequate financial resources - High staff attrition rates - Inadequate human resources - Inadequate infrastructure	 Inadequate financial resources Inadequate skilled personnel; Lack of guidelines for maintaining technologies
access to quality integrated maternal and child care services	Increasing geographical access to EHP services	Increasing availability of health technologies for prevention,
	Increased and sustained coverage of high quality EHP services;	

Increased access and	Providing	-Inadequate financial	-Mainstream sanitation in public institutions
usage of improved	improved	resources	-Conduct awareness campaigns
sanitation facilities	sanitation facilities	-Inadequate human	-Procure and install equipment
	in schools, health	resources	-Recruit and train personnel
	care centres,	-Lack of awareness	
	community based	-Inadequate equipment	
	child care centres,		
	markets and all		
	other public places		
Improved management	Promoting private	-Poor coordination	-Provide incentives for private sector participation
and disposal of waste	sector participation	-Inadequate financial	-Conduct awareness campaigns
	in the provision of	resources	-Strengthen coordination
	sanitation and	-Lack of incentives	
	hygiene services		
	Promoting research	-Inadequate financial and	-Conduct operations research
	in waste	skilled human resources	-Provide support infrastructure
	management	-Inadequate infrastructure	-Procure equipment
)	-Inadequate equipment	-Recruit and train personnel
			-Provide incentives
	Improving	-Inadequate financial and	-Conduct awareness
	management and	skilled human resources	-Improve refuse collection
	disposal of both	-Lack of awareness	-Provide support infrastructure
	liquid and solid	-Low literacy levels	-Procure equipment
	waste	-Inadequate infrastructure	-Recruit and train personnel
		-Inadequate equipment	-Improve community health surveillance system
		-Limited technology	
	Enhancing	-Inadequate skilled human	-Review the Public Health Act and related policies
	institutional	resources	-Recruit and train community health surveillance assistants
	capacity	-Inadequate financial	-Strengthen coordination between local councils and central government
		resources	-Provide support infrastructure
		-Inadequate support	-Procure equipment
		infrastructure and	
		equipment	
	Strengthening	-Poor coordination	-Review the Public Health Act and related policies
	regulatory	-Outdated legislation	-Streamline procedures
	framework	-Lengthy procedures	-Recruit and train personnel

			nd high risk		e circumcision,		d economic		I human rights		ion services	ion guidelines	Suc	is at the		ĕ	of the facilities	nprove access		standards	ervices and			հ facility and			nd out of school			e health services	
	Focus Actions and Activities		-Develop programs to reduce transmission among stable couples and high risk	sexual practices	-Conduct IEC on promotion of preventive measures including male circumcision,	condom use	-Develop programs addressing the cultural, human rights, social and economic	environment, and gender inequalities	-Facilitate linkages between services and interventions on legal and human rights	issues	-Advocate and lobby for interventions that promote male circumcision services	-Develop male circumcision policy, interventions and communication guidelines	-Disseminate the National Condom Strategy and safe blood donations	-Scale up the promotion of both free and socially marketed condoms at the	workplace to high risk and vulnerable populations	-Provide adequate safe blood supplies and promote their rational use	- Strengthen infection prevention and waste management in the health facilities	-Provide Post Exposure Prophylaxis in the health care services to improve access	and use	-Train health workers on national screening and quality assurance standards	-Identify best practices for integrating HIV prevention with other services and	scale-up nationally	-Scale up quality STI management in health facilities	-Link community-based groups with health services to support both facility and	community-based prevention activities	-Provide HTC to TB patients	-Establish and scale up life skills training programmes for school and out of school	youths	-Strengthen the development of role model initiatives for the youth	-Provide youth friendly HIV and AIDS prevention and reproductive health services	-Scale up sex and sexuality education in and out school youths
	Constraints		-Inadequate skilled human	resources	-Inadequate financial resources	-Inadequate equipment and	support infrastructure																								
	Strategies		Promoting	interventions that	reduce HIV	transmission																									
HIV and AIDS Management	Medium-Term	Expected Outcome	Reduced HIV	infection and	transmission	rate																									
5.4 HIV and AID	Long- Term Goal		To prevent spread of	HIV infection and	mitigate the health,	socio economic and	psychosocial impact	of HIV and AIDS																							

	-Promoting HIV	-Lack of willingness of people	-Scale up the provision of quality HTC services
	Testing and	to go for testing	Expand the coverage of door to door HTC.
	Counselling	-Unavailability of funds to	-Provide adequate testing kits and other testing requirements
	(HTC)	establish enough testing	-Conduct annual HTC testing weeks
		centres	-Conduct IEC, advocacy and social mobilization on HTC
		-Inadequate availability of	-Train HTC service providers
		testing kits	-Strengthen linkage between HTC services and other care and support services.
	Promoting	-Inadequate financial and	-Strengthen capacity to deliver PMTCT
	Prevention of	skilled human resources,	-Strengthen provision and access to integrated quality PMTCT services
	Mother-to-Child	-Lack of awareness	-Conduct advocacy and community mobilization for increased PMTCT demand,
	Transmission of	-Low literacy levels	male involvement and community support
	HIV (PMTCT)	-Inadequate support	-Follow up on all HIV exposed infants and their parents or caregivers at facility and
		infrastructure	community levels
		-Cultural beliefs	-Increase access to ART and other HIV related services to positive mothers and
		-Poor supply chain	their partners
		management	-Strengthen follow up and referral of infants born to HIV positive mothers for care
		-Limited male involvement in	and support services
		PMTCT	-Promote education and support safe infant feeding according to PMTCT guidelines
	Promoting HIV	-Unavailability of IEC	-Conduct research on the major factors facilitating HIV spread among various
	and AIDS	materials	groups
	advocacy and	-Unavailability of user friendly	-Train various stakeholders in the development and effective dissemination of HIV
	awareness	IEC materials	prevention messages
	campaigns	-Low literacy levels	-Produce and disseminate IEC materials on HIV prevention and linkages between
		-Low capacity to use IEC by	vulnerability groups HIV, stigma and discrimination and AIDS
		various stakeholders	-Develop specific communication interventions to increase advocacy activities
			targeting particularly women and girls
Improved	Enhancing	-Inadequate skilled human	-Train and retain health workers
quality of lives	capacity of health	resources,	-Strengthen quality assurance, infrastructure and referral systems
of People	care delivery	-Inadequate financial resources	- drug and other medical supplies procurement and logistics management
Living with	system to manage	-Inadequate infrastructure and	-Strengthen laboratory support services for HIV diagnosis and management
HIV (PLHIVs),	HIV and related	equipment	
OVCs and	illnesses	-Inadequate drugs and medical	
affected		supplies	
individuals and		-Weak coordination	
nousenoids			
	Promoting access	-Inadequate human and financial resources	-Develop the capacity for pre-ART management for people with HIV -Strenothen capacity for access and use of quality of ART, quality management of
	HIV treatment and	-Poor supply chain	HIV related diseases and OI management
			, , , , , , , , , , , , , , , , , , ,

	care services	management	-Build capacity in quality Early Infant Diagnosis and paediatric HIV and AIDS
		-Compliance and drug resistance	services, care, rollow-up and support for HLV exposed children -Provide integrated TB, HIV and AIDS prevention, care and support services
		-Low literacy rates	-Scale up palliative care for HIV patients
			-Conduct advocacy campaigns to address obstacles to equitable access to ART
			 -Provide a framework for planning, organizing, implementing, monitoring and evaluating delivery of TB, HIV and AIDS intervention
	Promoting access	-Weak coordination among	-Strengthen community home based care models including palliative care and
	to quality	service providers	psychosocial support
	Community Home	-Limited human and financial	-Scale up coverage of home based care for people in need
	Based Care	resources	-Build the capacity of volunteers, CBOs, FBOs and NGOs involved in CHBC
	(CHBC), palliative	-Limited capacity at	-Provide support to referral mechanisms between CHBC providers and facility-
	care and other	community level	based care
	support services		-Conduct advocacy for greater involvement of PLHIVs and OVC in planning and
			implementation of CHBC
			-Develop CHBC guidelines that spell out the roles of families, communities and
			service providers
			 -Develop and strengthen coordination mechanisms of implementers of CHBC
			programmes
			-Support community mobilisation in the provision of CHBC, palliative care and
			psychosocial support
			-Advocate and lobby for support towards the integration of palliative care in the
			national health system and training curricula for pre-service and in-service training
			-Provide support to programmes targeting boys and men to become involved in
			providing CHBC
	Promoting support	-Inadequate financial and	-Establish income generating activities and micro credit programmes targeting
	to PLHIVS, OVCS	human resources	PLHIVS, UVC and affected households
	and affected	-Limited capacity for	-Provide training to PLHIVS, OVCs and affected households in business
	individuals and	Vocational and technical	development services, food and nutrition security interventions, technical and
	nousenoids	Ganagity to loans for the	Vocational SKIIIS Tink DI UIIV OVO and offsoted households neationisals and skild hooded
		-capacity to leaffil for the	-LIIIR FLIIIV, OVC and affected mouseholds particularly female- and chine-neaded households to the Social Cash Transfer and Input Subsidy Programmes
		and affected households	-Provide educational and material support to OVCs and affected households
			-Build capacity of professional, health education, social welfare service providers
			and lay counsellors in public sector and civil society
			-Strengthen capacity of families and communities to care for OVC
			-Improve the involvement of faith leaders in the provision of psychosocial and
			spirituai support

			-Advocate for enforcement of national and sectoral HIV and AIDS legislation -Establish programmes on legal literacy and awareness among PLHIV, OVC and affected communities -Facilitate systems for reporting cases of violations and for the provision of legal assistance and legal remedies to PLHIV and vulnerable populations -Produce IEC programmes on rights of PLHIVs, OVCs and affected targeting the general population
	Promoting mainstreaming of HIV and AIDS	-Limited human and financial resources -Limited capacity for resource mobilization, management and tracking at all levels -Limited human resource capacity -Ineffective coordination and implementation structures especially at district and community levels -Limited use of technology	-Scale up and expand workplace interventions in public, private and NGO sectors Disseminate the mainstream guidelines to all stakeholders -Provide both technical and financial support for the implementation of workplace programmes -Conduct advocacy and lobbying on development of workplace programmes in the private sector and among civil society organizations -Strengthen the capacity of Local Councils to develop and implement workplace programmes -Monitor the utilization of the least 2 percent ORT in the public sector -Facilitate review of public, private and strategies to mainstream HIV and AIDS -Develop capacity of public, private and civil society organizations to mainstream HIV and AIDS
	Promoting effective coordination and management of the national HIV and AIDS response	-Limited human and financial resources -Limited capacity for resource mobilization, management and tracking at all levels -Limited human resource capacity -Ineffective coordination and implementation structures especially at district and community levels -Limited use of technology	-Advocate for increased resource allocation for HIV and AIDS in the budget at national and district levels -Strengthen financial resource mobilisation -Develop capacity for resource mobilization for HIV and AIDS activities in the private and non-profit sectors -Develop and implement a comprehensive resource mobilization strategy -Develop mechanisms for gender sensitive resource allocation and tracking, and monitoring of the response -Develop capacity of grant recipient organizations for proposal processing for HIV and AIDS funding -Develop capacity and timely implementation of activities -Develop systems for monitoring impact of the grants facility -Develop transparent and simple measures for timely accountability on resource use-Strengthen capacity of institutions to collect and report HIV and AIDS data using the National M&E Plan -Implement quality HIV and AIDS related research -Strengthen the capacity of institutions to undertake HIV and AIDS research -Strengthen the capacity of institutions to undertake HIV and AIDS research -Support collection of routine and periodic gender sensitive programmatic data -Support implementation of national HIV surveillance strategy -Review the monitoring and evaluation tools

			-Strengthen mechanisms for analysis and packaging of surveillance and research findings
			-Disseminate strategic information to policy makers and programme planners -Advocate for enactment of HIV and AIDS Bill
			-Align sectoral policies and strategies to the National HIV and AIDS Act
			-Provide support to the various structures for the national response
			 Strengthen policy coordination, implementation and monitoring of nutrition, HIV and AIDS programmes
			-Commemorate international HIV and AIDS days
			-Build capacity and provide institutional and operational support for effective coordination and management of the national HIV and AIDS response at council
			and national levels.
			-Strengthen the capacity of local authorities and other stakeholders to plan, monitor
			and evaluate the response
			-Strengthen mechanisms for coordination and partnerships at national, regional and
			district levels
	Promoting	-Inadequate financial and	-Establish income generating activities and micro credit programmes targeting
	reintegration of	human resources	PLHIVs, OVC and affected households
	eligible PLHIV	-Stigma and discrimination	-Provide training to PLHIVs, OVCs and affected households in business
	into economic	-Weak legislation	development services, tood and nutrition security interventions and technical and
	acuviues		VOCALIONAL SKILIS 1 :-1: DI IIIX 0377 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
			-Link PLHIV, OVC and affected households particularly female- and child-headed households to the GoM Social Cash Transfer Programme
			-Facilitate access to the Innut Subsidy Programme by PI HIVs OVCs and affected
			-racintate access to the input substity frogramme by refirms, oves and affected households
			-Provide educational support to OVCs and affected households
Improved	Promoting food	- Existence of stigma and	-Develop programmes on nutrition management of HIV-related illnesses
dietary	and nutrition	discrimination	-Provide infant and young child nutrition interventions for HIV exposed children
practices of	security among	-Limited capacity at local	-Develop programmes on nutrition for positive living and affected individuals
PLHIVS, OVCs	HIV and AIDS	council level	-Compile and disseminate best approaches to providing nutritional therapy to
individuals and	households		-Monitor utilization of the 2 percent ORT budgetary allocation for nutrition, HIV
households.			and AIDS programmes
			-Support households affected by HIV and AIDS with sustainable economic and
			social protection interventions
			-Mobilize PLHIVs to demand tood and nutrition security programmes
			-Scale up and increase access to sustainable economic and social protection for households affacted by UIV and AIDS
			nouscholds aliceled by the Aliba

-Recruit and train personnel		
financial resources	-Inadequate support	infrastructure

7.0 GREEN BELT IRRIGATION AND WATER DEVELOPMENT 7.1 Green Belt Irrigation

Focus Actions and Activities	-Increase water harvesting technologies -Construct small, medium and large scale irrigation schemes -Provide financial services to smallholder irrigation farmers -Provide credit facilities to commercial irrigation farmers -Undertake integrated planning in irrigation programmes -Provide support infrastructure -Strengthen private sector participation -Strengthen market infrastructure -Undertake supply chain analysis	-Rehabilitate existing irrigation schemes and small earth dams -Conduct training programmes -Procure equipment -Mobilize resources -Provide support infrastructure -Enhance maintenance	-Conduct research in irrigation technology -Enhance technology transfer and absorptionDevelop marketing infrastructure -Procure equipment -Recruit and train personnel
Focus Acti	-Increase v -Construct -Provide ff -Provide cs -Undertake -Provide su -Strengthei -Strengthei	-Rehabilitate existin -Conduct training pr -Procure equipment -Mobilize resources -Provide support inf -Enhance maintenan	-Conduct research in -Enhance technolog -Develop marketing -Procure equipment -Recruit and train pe
Constraints	-Lack of modern irrigation technologies -Inadequate support infrastructure -Lack of reliable markets for irrigated crop produce -Inadequate irrigation infrastructure -Inadequate skills in irrigation infrastructure development infrastructure development -Inadequate financial resources -Inadequate private sector participation	-Inadequate plant and equipment -Inadequate human and financial resources -Lack of support infrastructure	Inadequate use of modern irrigation technologies -Lack of awareness -Inadequate human and financial resources -Lack of equipment
Strategies	Promote development of areas with irrigation potential	Promote rehabilitation of irrigation infrastructure	Promoting research and use of appropriate technologies in irrigation
Medium-Term Expected Outcome	Increased land under irrigation	Increased agricultural production and productivity	
Goal E	To increase agriculture production and productivity through irrigation intensification		

Reduced	Enhancing	-Low literacy levels	-Review curriculum in the training institutions
dependence on	information,	-Lack of equipment	-Undertake awareness campaigns
rain-fed	education and	-Lack of human and financial	-Procure equipment
agriculture	communication	resources	-Recruit and train personnel
	on irrigation		
Increased	Enhancing	-Lack of human and financial	-Enhance capacity in irrigation institutions
agriculture	technical and	resources	-Establish and empower cooperatives and water user associations
production and	administrative	-Inadequate equipment	-Create an enabling environment for private sector participation
productivity	capacities in	-Inadequate skills	-Promote collaboration among stakeholders
	irrigated	-Weak institutional capacity	-Develop the irrigation master plan
	agriculture	-Poor coordination	-Enhance capacity building
Increased	Promoting the	-Weak farmer organizations for	-Procure and provide agro-processing facilities
household	establishment of a	participatory irrigation	-Enhance availability and utilization of market information system
income levels	well coordinated	development and management	-Promote crop diversification
	marketing system	-Poor quality of produce	-Develop support infrastructure
	for products from	-Insufficient market	-Enhance stakeholder coordination
	irrigation farming	information	-Provide appropriate storage facilities
		-Poor coordination	-Strengthen producer organizations
		-Lack of appropriate storage	-Organize and strengthen local produce markets
		facilities	-Encourage contract marketing
		-Inadequate support	
		infrastructure	

			ose dams	/ coverage	tourism and recreation)		on trans-boundary water						•
	Focus Actions and Activities		-Construct new small, medium and large multipurpose dams	-Construct boreholes in areas with low water supply coverage	-Develop springs for multipurpose uses (irrigation, tourism and recreation)	-Identify trans-boundary aquifers	-Facilitate ratification of all appropriate agreements on trans-boundary water	courses	-Enhance stakeholder coordination	-Recruit and train personnel	-Consolidate database on water resources	-Establish water management information system	
	Constraints		-Lack of integrated water	resource management	-Degradation of water resources	-Land tenure systems	-Lack of awareness on water	issues	-Poor coordination	-Lack of consolidated database	on water resources	-Inadequate human and	•
	Strategies		Promoting	development of	potential multi-	purpose dam sites	and ground water	resources	Strengthening and -Poor coordination	institutionalizing	monitoring and	evaluation system	
pincint	Medium-Term Strategies	Expected Outcome	Well developed	and managed	water resources								
7.2 water Development	Goal		To improve access to	water through an	integrated water	management system							

	Promoting	-Inadequate human and	-Enhance stakeholder coordination
	equitable distribution of	Inancial resources	-Strengthen M&E system
	water points to		
	rural areas		
	mapping		
	Enhancing	-Inadequate human and	-Conduct awareness campaigns
	information,	financial resources	-Recruit and train personnel
	education and	-Low levels of awareness	-Procure equipment
	communication	-Inadequate equipment	-Enhance coordination of IEC
		-Inadequate skills	
	Enhancing	-Weak legal framework	-Review and strengthen legal framework
	institutional	-Inadequate human and	-Recruit and train personnel
	capacity at all	financial resources	-Enhance coordination
	levels	-Poor coordination	
	Promoting user	-Inadequate construction	-Conduct awareness campaigns
	friendly	equipment	- Conduct research on use of simple technologies
	technologies for	-Lack of collaboration amongst	-Strengthen stakeholder collaboration
	water resources	key stakeholders	-Promote efficient water use technologies
	conservation and	-Lack of awareness	-Rehabilitate existing water infrastructure such dams and boreholes
	utilization	-Inadequate financial resources	
	Enhancing water	-Inadequate capacity among	
	resources	stakeholders	
	monitoring,	-Lack of skills	
	preservation,	-Lack of awareness	
	development and	-Low literacy levels	
	management	-Inadequate institutional	
		capacity	
	Strengthening	-Inadequate capacity among	-Establish and empower water users' associations
	research in the	stakeholders	-Conduct awareness campaigns
	water resources	-Lack of skills	-Enhance stakeholder coordination
		-Lack of awareness	-Train key stakeholders
		-Low literacy levels	

Increased	Improving existing water	-Inadequate institutional	-Rehabilitate existing water infrastructure -Develon additional water infrastructure
safe water	infrastructure	-Inadequate human and	-Train personnel
points within		financial resources	-Develop water users' associations
500 m distance		-Insufficient self financing for sustainability	-Strengthen institutional capacity
	Promoting the	-Inadequate capacity among	-Establish and empower water users' associations
	empowerment of	stakeholders	-Conduct awareness campaigns
	local communities	-Lack of skills	-Enhance stakeholder coordination
	in water resources	- Lack of awareness	-Train key stakeholders
	development and	-Low literacy levels	
	management		
	Increasing number	-Poor coordination among	-Construct new small, medium and large multipurpose dams
	of people	stakeholders	-Construct boreholes in areas with low water supply coverage
	connected to	-Inadequate participation of	-Enhance stakeholder coordination
	piped water	stakeholders in water	-Review and harmonize policies
	supply systems in	management	-Develop and rehabilitate water supply infrastructure
	both urban and	-Limited financial services	-Increase water points
	rural areas	-Population pressure	-Increase capacity of service provider
		-Unharmonized policies	
	Strengthening	-Inadequate participation of	-Rehabilitate existing water infrastructure
	institutionalizatio	stakeholders in water	-Recruit and train personnel
	n of practical	management	-Enhance stakeholder coordination
	operations and	-Inadequate financial and	-Strengthen institutional arrangement
	maintenance	human resources	-Review regulations
	framework at all	-Inadequate skills	-Enhance stakeholder participation in water management
	levels	-Weak institutional	
		arrangement -Weak law enforcement	
	Promoting private	-Availability, readiness and	-Promote public and private sector participation in water resources management
	sector	willingness of the private sector	and development
	participation in the	to take up the challenge	-Enhance stakeholder coordination
	provision of water	-Poor coordination	-Recruit and train personnel
	services	-Inadequate human and	
		IIIIaiiciai resources	

8.0-CHILD DEVELOPMENT, YOUTH DEVELOPMENT AND EMPOWERMENT 8.1 Child Development

Goal	Medium-Term	Strategies	Constraints	Focus Actions and Activities
	Expected			
	Outcome			
To ensure that	Reduced	Protecting children	-Inadequate human and	-Conduct awareness campaigns
children grow into	number of	against abuse,	financial resources	-Promote income generating activities
productive and	children living	exploitation,	-Poverty	-Recruit and train personnel
responsible citizens	below the	neglect and	-Weak regulatory framework	-Strengthen regulatory framework
	poverty line	violence		 Promote child protection initiatives with emphasis on female and physically challenged children
		Eliminating	-Inadequate financial & human	-Formation of parenting groups in all communities
		harmful cultural	resources	-Conduct awareness campaigns
		practices	-Lack of awareness	-Strengthen enforcement of legislation
			-Weak enforcement of	
			legislation	
		Reducing the	-Inadequate financial resources	-Train caregivers, committees, parents and field workers in nutrition values
		adverse effects of	-Limited economic	-Enhance stakeholder coordination to ensure adequate technical support
		poverty on children	opportunities	-Increase economic opportunities in both rural and urban areas
			-Low literacy level	
	Improved	-Promoting access	-Inadequate financial and	-Develop tailor-made teaching and learning aids for children with special needs
	equitable access	to education, health	human resources	-Recruit and train teachers for children with special needs
	to quality child	and counselling	-High incidences of poverty	-Construct and rehabilitate Early Childhood Development Centres (ECD) across
	development	services	-Inadequate support	the country
	services		infrastructure	-Promote access to health services for the vulnerable children
			-Inadequate equipment	-Lobby Parliament to enact the ECD legislation
			-Inadequate teaching and	-Provide school health and nutritional services
			learning materials	-Recruit and train counsellors
			-Inadequate institutional	
			capacity	
	Strengthened	-Promoting early	-Inadequate financial and	-Train technical staff, caregivers, guardians and parents in ECD and parenting
	national child	childhood	human resources	services
	protection	development and	-Inadequate skills	-Conduct awareness campaign on ECD and parenting
	systems to	pre-primary	-Inadequate infrastructure and	-Institute in-service training of primary school teachers in ECD
	reduce	education	equipment	-Cluster ECD centres around primary schools to enhance transition to primary
	children's		-Lack of standardized	school activities
	vulnerability to		curriculum	-Support joint meetings for ECD caregivers, local leaders, PEAs and primary

violence, abuse, and exploitation		-Lack of awareness	school teachers -Provide school bursaries to OVCs -Link OVC to social protection interventions, essential health, education and other psychosocial support interventions -Upgrade institutional support services -Strengthen social rehabilitation centres -Construct and rehabilitate ECD infrastructure
	Establishing a legal and institutional framework to promote early childhood development services	-Inadequate human and financial resources -Inadequate equipment -Poor coordination -Rigorous bureaucratic procedures	-Provide training and incentives to caregivers -Conduct national mapping and invest for the distribution of services -Formulate, enact and review child sensitive laws - Develop rehabilitation centres
	Promoting the integration of child issues in sectoral policies and strategies	-Inadequate human and financial resources -Inadequate skills -Lack of awareness	-Conduct stakeholder sensitization meetings -Train technical staff and communities in mainstreaming child issues
	-Strengthening inter-sectoral coordination and capacity of all stakeholders	-Inadequate human and financial capacity -Weak institutional framework	- Establish focal points for efficient coordination -Design and operationalise an IMS for social support - Mainstream child protection indicators in household surveys -Build capacity of Local Councils, ADCs & VDCs -Conduct sensitization of DECs and AECs on importance of child participation in decision making
	Promoting support to children infected and/or affected by HIV and AIDS	-Inadequate information -Inadequate financial and human resources -Stigma and discrimination -Lack of awareness -Inadequate support infrastructure	-Design and develop CBCC/ECD play materials with nutrition and HIV and AIDS messages -Establish linkages between CBCC/ECD and existing nutrition and HIV and AIDS services -Train care givers, parents and committees on care for children with HIV and AIDS -Develop and distribute IEC materials and guidelines on care and support of HIV positive children -Support poor families in providing alternative care
	Promoting advocacy and awareness on child issues	-Low literacy levels -Lack of knowledge on child rights -Inadequate financial and human resources	Develop national plan for child protection and standard package of services - Raise stakeholder awareness - Train personnel -Introduce Child Abuse Prevention in School (CAPS) programmes

Promoting civil	1 -Weak registration system	-Enforce laws and regulations
registration of	-Inadequate financial and	-Conduct sensitization campaigns
children	human resources	-Provide support infrastructure and equipment
	-Inadequate equipment and	
	support infrastructure	
Protecting chil	Protecting children -Inadequate human and	- Review laws
against abuse,	financial resources	-Recruit and train personnel
exploitation,	-Inadequate enforcement	-Strengthen institutional and regulatory mechanism
neglect, and	mechanism	-Conduct awareness campaigns
violence	-Outdated and lenient laws	-Develop support infrastructure
	-Lack of awareness	-Strengthen enforcement mechanism
	-Weak institutional and legal	
	framework	
	-Poverty

8.2 Youth Development and Empowerment	nt and Empowern	nent		
Goal	Medium-Term	Strategies	Constraints	Focus Action and Activities
	Expected Outcome			
To enhance effective	Increased	Improving youth's	-Inadequate youth	-Develop former Malawi Young Pioneers (MYP) bases into skills training centres
youth participation	absorption of	technical,	participation structures	-Orient facilitators on life skills curriculum for out of school youth
in economic	skills,	vocational,	-Narrow scope of youth	-Mobilize out of school young people to participate in education classes
activities	technology and	entrepreneurial and	activities and structures,	-Review curriculum of vocational training and complementary basic education
	innovations by	life skills	-Low incentive for innovation	-Conduct career guidance and promote attachment programmes
	the youth		-Low literacy levels	-Train the youth in technical, vocational, entrepreneurial and life skills
				-Promote study of sciences among the youth
				-Promote intellectual property rights
		Improving youth's	-Stringent procedures to access	-Form and train youth cooperatives
		access to credit	credit	-Provide start-up capital in form of material to youth that have graduated from skills
		facilities for	-High cost of borrowing	development centres
		entrepreneurship	-Low literacy levels	-Establish more youth structures (youth clubs, business incubation centres, village
			-Limited access to information	polytechnics, youth networks, youth NGOs, youth centres)
			on credit	-Link youth entrepreneurs to markets
			-Inadequate financial services	-Conduct training in leadership and management, entrepreneurship and livelihood
			in rural areas	-Strengthen YEDEF across the country

			-Advocate for the provision of microcredit services to the youth -Streamline condition and procedures for accessing credit
-Improved coordination of youth programs	-Strengthening and establishing youth development centres	-Inadequate financial and human resources -Lack of youth policy	-Rehabilitate and establish youth development centres across the country -Introduce complementary basic educational classes in development centres -Train youth workers, youth networks and youth leaders in advocacy and lobbying skills -Implement Youth Initiative Week -Provide guidelines to youth structures -Provide ICT equipment to youth structures
Increased youth participation in decision making processes	Promoting youth participation in the decision making processes	-Limited skill, experience and knowledge to participate in development activities - Limited guidance and counselling services among the youth -Low institutional capacity	-Organize discussion forums for parents and opinion leaders to solicit support for youth initiatives -Encourage girls participation in youth development activities -Train the youth in leadership skills -Train youth workers in information management systems -Establish a Youth Management Information System to facilitate evaluation of youth programmes -Train more youth counsellors and peer educators -Create youth awareness on emerging issues including climate change
	Constructing and rehabilitating sports infrastructure	-Inadequate financial resources -Lengthy procurement procedures	-Construct and rehabilitate sports infrastructure - Involve communities in construction, rehabilitation and management of sport infrastructure - Promote public private partnerships - Train youth and sports personnel in facility management
	Eliminating gender based violence, harmful cultural practices, abuse and trafficking	-Lack of awareness -Lack of guidance and counselling services among the youth -Low literacy levels -High incidences of poverty	-Conduct awareness campaigns on GBV and harmful cultural practices, abuse and trafficking -Implement youth empowerment programs -Strengthen institutions which advocate for the right of the youth -Encourage girl child education -Establish more victim support units -Strengthen law enforcement
	Improving access to Youth Friendly Sexual and Reproductive Health (SRH), HIV and AIDS services	-Inadequate financial and human resources -Inadequate support infrastructure -Low literacy levels -Stigma and discrimination	-Conduct awareness campaigns on Sexual and Reproductive Health (SRH), HIV and AIDS services -Promote youth friendly health services -Educate youth on their reproductive health rights and other emerging health issues -Introduce HCT and psycho-social services in youth centres

Building and	-Inadequate human and	-Procure equipment
strengthening the	financial resources	-Develop and rehabilitate support infrastructure
capacity of		-Recruit and train personnel
institutions that are		
responsible for		
coordination and		
delivery of youth		
development and		
sports services		

9.0 CLIMATE CHANGE, NATURAL RESOU RCES AND ENVIRONMENTAL MANAGEMENT 9.1 Climate Change Management

Goal	Medium-Term Expected Outcome	Strategies	Constraints	Focus Actions and Activities
To enhance resilience to climate change risks and impacts	Improved climate change mitigation and adaptation measures	Implementing a comprehensive national climate change investment plan including all potential global and national funding opportunities	-Bureaucratic procedures - Inadequate infrastructure and equipment -Inadequate data and information - Weak institutional capacity	-Conduct user needs assessment survey on climate change and meteorological services -Undertake a comprehensive climate change and meteorology institutional inventory -Disseminate and implement national climate change investment plan -Recruit and train personnel -Acquire and install modern equipment -Provide appropriate support infrastructure -Streamline procurement procedures -Strengthen collection of climate change and meteorological data and information
		Improving weather and climate monitoring, prediction and information and knowledge management systems	-Poor coordination -Inadequate personnel -Inadequate financial and skilled human resources -Inadequate equipment -Inadequate data -Inadequate infrastructure	-Produce manuals on table driven codes in weather observations -Conduct training on the use of the Table Driven Codes Manual -Produce weather forecasts -Derive climate seasonal forecasts -Produce wind atlas, solar maps and flight weather reports -Introduce new areas of observing weather patterns -Conduct a survey on indigenous rainfall indicators -Introduce indigenous indicators for observing weather -Prepare and communicate information on weather and climate -Strengthen coordination among stakeholders -Modernize climate change database -Establish Global Telecommunication System (GTS) linkages -Undertake data management activities

			-Recruit and train personnel
			-Procure equipment
			-rroylde support intrasuructure - Produce and disseminate high quality climate information and tools
	Developing and	-Outdated meteorological data	-Review, formulate and harmonize strategies, policies and legislation related to
	harmonizing	policy	climate change
	climate change	-Inadequate financial resources	
	related strategies,		
	policies and legislation		
	Mainstream climate	-Bureaucratic procedures	-Incorporate climate change issues into national and sectoral development plans and
	change issues in	-Inadequate financial and	policies
	sectoral policies	human resources	-Incorporate climate change and meteorology in school curricula
	and programmes	-Lack of awareness	-Conduct advocacy and awareness campaigns Recent and train perconnel
	1.1.	XX = -1 =1 : + : : - : - : - : - : - : - :	
	Enhancing	-weak coordination	-Develop and implement projects on mitigation and adaptation to climate change
	implementation of	-Inadequate personnel	-Produce crop weather yield forecast using crop weather models
	mitigation and	-Inadequate equipment	-Conduct awareness campaigns and advocacy on crop weather insurance
	adaptation	-Inadequate data and	-Review agroclimatological requirements on selected main crops, livestock and
	programmes	information	wildlife
		-Weak regulatory framework	-Develop and disseminate crop weather calendar
		and policies	-Intensify collection of data and information on climate change
		-Weak institutional	
		arrangement	
		-Lack of awareness	-
	Promoting	-Weak regulatory tramework	-Review country green house gases inventory
	dissemination of	-Inadequate financial and	-Develop and operationalise the regulatory framework
	climate change	human resources	-Conduct awareness campaigns
	information for		-Establish a climate change and meteorological communication centre
	early warning,		-Recruit and train personnel
	preparedness,		-Intensify coordination among stakeholders
	response and		-Develop a communication strategy
	recovery		 Produce high quality climate information and tools for risk management
	Enhancing legal	-Inadequate human capacity	-Formulate a Climate Change Policy and Act
	and regulatory	-Absence of a climate change	-Review meteorological data policy
	framework on	policy	
	climate change	-Outdated meteorological data	
		poney	

		-Bureaucratic policy formulation processes	
	Enhancing cross sectoral co-	-Weak institutional capacity -Inadequate equipment	-Promote networking with international organizations -Participate in regional and international meetings
	ordination of	-Inadequate human and	-Produce and submit National Communication to the UNFCCC
	climate change	financial resources	-Develop a sectoral strategic plan
	programmes	-Limited knowledge	-Conduct awareness campaigns
			-Conduct stakeholder training
			-Intensify stakeholder coordination
			-Recruit and train personnel
			-Procure equipment
	Promoting climate	-Inadequate trained personnel	-Establish a meteorological and climate change library
	change related	-Inadequate financial resources	-Recruit and train personnel
	education, training,	-Lack of necessary	-Procure equipment
	awareness and	infrastructure and equipment	-Provide support infrastructure
	capacity building		-Conduct awareness campaigns and advocacy
			-Conduct stakeholder training
			-Incorporate climate change issues into school curricula
			-Produce high quality climate information and tools
	Developing and	-Lack of technical expertise	-Conduct sensitization campaigns
	implementing	-Lack of awareness	-Recruit and train personnel
	appropriate green	-Inadequate financial resources	-Procure equipment
	house gas	-Weak enforcement of	-Develop a database on the consumption of ozone depleting substances
	mitigation	standards and regulations	-Develop capacity and regulations for carbon trading ,Polluter Pays Principle and
	programmes and	-Inadequate equipment	payment for ecosystem services
	actions		-Intensify enforcement of regulations on importation of ozone depleting substances
			-Promote implementation of oreen house oas mitigation programmes and actions

Medium-Term Strategies		aints Focus Actions and Activities		institutional capacity - Develop Sector Wide Approach for management of Natural Resources and	quate human and Environment	al resources Recruit and train personnel	cting policies - Integrate environmental and natural resources management issues into national	ncracy and sectoral development plans and policies
Expected Outcome Sure Improved Improved Genvironmental and natural Action of the Improved Improved Improving Improved Improving Improved Improving Improved Improving		Focus Actions and A			Environment	-Recruit and train pers	-Integrate environme	and sectoral developm
lus sui		Constraints		-Weak institutional capacity	-Inadequate human and	financial resources	-Conflicting policies	- Bureaucracy
lus sui	illiciitai Management	Strategies		Improving	coordination of	environment and	natural resource	programmes
lus sui	ources and Enviro	Medium-Term	Expected Outcome	Improved	environmental	and natural	resource	management
	7.4 Matural INCS	Goal		To ensure	sustainable	management and	utilization of the	environment and

		natural resources	-Streamline procedures -Harmonize sectoral policies
	Developing capacity for Environment and Natural Resource Management (ENRM)	Inadequate financial resources Inadequate infrastructure and equipment -Weak institutional capacity	-Recruit and train environmental officers -Operationalise Environmental Management Fund -Procure equipment -Provide support infrastructure -Promote community participation in ENRM
	Enhancing mainstreaming of environment and natural resource management issues in sectoral policies and programmes at national and local levels	-Lack of appreciation of the importance of ENRM -Unharmonized policies -Lack of awareness -Inadequate human and financial resources	-Sensitize developers on EIA -Harmonize sector specific strategies for dealing with problems affecting natural resources -Develop policies and strategies for coordination of common programmes and activities -Conduct EIAs and Audits in development projects -Review EIA reports -Monitor implementation of Environmental Management Plans (EMP) for approved projects -Facilitate co-management arrangements in ENRM programs
	Strengthening education and public awareness programmes on environment and natural resources management	-Inadequate human and financial resources -Inadequate equipment	-Review and develop advocacy materials -Conduct outreach programs on environment -Procure equipment -Intensify environment and natural resources education
	Enhancing environmental protection, restoration and rehabilitation	-Inadequate human and financial resources -Inadequate equipment -Conflicting interests	-Implement Polluter Pays Principle (PPP) -Promote private sector participation - Recruit and train personnel -Build capacity of communities in ENRM -Phase out use of thin plastic papers -Conduct inspections on pollution -Conduct awareness campaigns -Promote stakeholder participation in land use planning -Promote rehabilitation and protection of catchment ecosystems
Reduced environmental pollution and degradation	Promoting biodiversity conservation programs	-Weak enforcement of regulations and standards -Inadequate human and financial resources	-Develop and implement projects on biodiversity conservation and rehabilitation of the environment -Strengthen enforcement of regulations -Conduct outreach programmes on biodiversity conservation

		-Lack of biodiversity policy	-Phase out use of burnt bricks and thin plastic papers -Develop biodiversity policy
	Promoting development and implementation of Clean Development Mechanism (CDM), voluntary carbon markets and Reduced Emissions from Deforestation and Degradation of Forest (REDD) projects	-Intense rainfall -Wide spread drought and floods -Inadequate financial resources -Inadequate skills, knowledge and technology on issues of climate change	-Enforce compliance to regulations governing importation of equipment or facilities containing Ozone Depleting Substances -Develop and implement community adaptation programmes -Sensitize communities on climate change issues -Build capacity of personnel to develop and implement CDM and REDD plus programs -Develop policy and legislation on CDM, voluntary carbon markets / REDD plus -Develop, implement and monitor carbon voluntary markets/ REDD plus programs -Promote research, dissemination and utilization of CDM, voluntary carbon markets and REDD plus initiatives
	Promoting projects on waste management	-Inadequate skilled human and financial resources -Weak enforcement of regulation and standards -Low levels of public awareness -Inadequate equipment	-Update green house gases (GHG) emissions inventories -Promote research and dissemination in waste management and air pollution -Train Law enforcers and technicians on ozone depleting substances -Strengthen coordination in waste management - Enforce compliance to regulations governing importation of equipment or facilities containing Ozone Depleting Substances -Develop and implement projects on air pollution management -Promoting use of environmentally friendly technologies and practices -Conduct awareness campaigns -Develop public private partnerships on waste management -Procure equipment
	Promoting use of environmental friendly technologies and practices	Inadequate human and financial resources -Low levels of literacy -Inadequate equipment -Limited appropriate technology -Inadequate research and development	-Conduct research and dissemination on environmental friendly technologies -Build capacity of stakeholders -Operationalise environmental information management systems -Procure equipment -Recruit and train personnel -Conduct awareness campaigns - Promote adoption and adaptation of technologies
Improved regulatory framework for harmonized environmental	Enforcing compliance to environmental and natural resource management	-Inadequate human and financial resources -Poverty -Conflicting messages -Inadequate equipment	-Provide alternative economic opportunities -Procure equipment -Conduct inspections on compliance to ENRM legislation -Recruit and train personnel -Strengthen regulatory framework

and natural	legislation	-Weak regulatory framework	-Review EIA guidelines
resource			-Conduct awareness campaigns
management			
	Harmonizing	- Inadequate resources	-Review and enact Bio-safety Act
	environment and	-Poor coordination	-Review and formulate ENRM policies and legislation
	natural resources	-Conflicting sectoral policies	-Strengthen stakeholder coordination
	management		-Establish the National Environmental Protection Agency and Atomic Energy
	policies and		Regulation Agency
	legislation

2.1 Energy							
Developing additional power stations	P1	32,820	37,686	35,743	38,245	40,923	185,417
Promoting public- private partnerships in energy generation and distribution	P2	22	23	2526	30		126
Improving management of energy generation, transmission, distribution and supply,	P1	18,285	19,497	16,317	16,288	11,952	82,339

Promoting the use of renewable sources of energy	P2	3,205	3,429	3,670	3,926	4,201	18,431
Improving regulatory environment	P2	150	160	172	184	198	864
Enhancing urban and rural electrification;	P1	4,065	8,377	8,965	9,590	10,264	41,261
Increasing liquid fuel stock-holding and distribution capacity;	P1	950	706	557	260	869	3,371
Developing long-term systems of tapping and delivering liquid fuel	P1	13,505	11,942	10,373	9,627	9,685	55,132
Total Energy		73,002	81,820	75,822	78,446	77,851	386,941
2.2 Industrial Development							
Promoting the use of modern technology in manufacturing	P2	2,970	2,640	2,390	1,740	1,340	11,080
Enhancing backward and forward linkages in the industrial sector	P1	1,300	1,325	1,210	1,015	735	5,585
Promoting labour intensive industries	P1	604	682	594	317	472	2,669
Facilitating accreditation of quality assurance institutions and enhance quality standards	P2	1,616	1,458	1,605	1,610	1,506	7,795
Promoting value addition in existing and potential products	P1	380	430	436	446	999	2,252
Total Industrial Development		6,870	6,535	6,235	5,128	4,613	29,381
2.2.1 Trade							
Promoting adherence to standards in tradable products	P2	1,028	1,028	728 5	528	528	3,840
Promoting trade in services	P2	870	870	785	585	360	3,470

Promoting market diversification	P1	260	240	195	230	170	1,095
Promoting trade integration	P1	2,445	2,035	1,915	066	655	8,040
Promoting efficient and modernized boarder infrastructure to facilitate trade	P1	140	145	145	145	140	715
Promoting Exports	P1	3,120	2,926	2,927	2,402	1,597	12,972
Simplifying and streamlining trade and customs procedures	P1	35	42	4446	27		194
Improving fair trading and intellectual property rights	P2	33	42	4552	38		210
Promoting consumer loyalty to domestically produced goods	P1	1,132	1,081	1,010	647	528	4,398
Total Trade		9,063	8,409	7,794	5,625	4,043	34,934
2.2.2 Agro-processing							
Promoting OVOP on Agro processing	P1	29	42	4333	25		172
Improving support infrastructure for agro- processing of key industries	P2	80	06	13547	37		389
Promoting investment in agro-processing with special focus on private sector participation	P1	89	29	7366	44		318
Improving policy and regulatory frameworks impacting on agro-processing	P1	33	35	5030	15		163
Strengthening capacity for small and medium scale agro-processing enterprises	P1	169	172	141	144	151	777
Total Agro-processing		379	406	442	320	272	1,819

2.3 Mining							
Producing detailed geological map of Malawi;	P1	245	261	1,941	2,055	2,198	6,700
Strengthening institutional capacity of the sector	P1	160	370	230	222	207	1,189
Enforcing legislations on sustainable use and management of mineral resources;	P3	35	37	4043	46		201
Enforcing environmental, occupational health and safety in the mining sector;	P2	42	44	4852	55		241
Promoting both local and foreign investment;	P2	449	460	334	318	341	1,902
Strengthening seismic monitoring;	P2	165	224	234	219	233	1,075
Developing an integrated data management system	P1	180	192	159	170	182	883
Total Mining		1,276	1,588	2,986	3,079	3,262	12,191
2.4 Tourism							0
Enforcing tourism industry standards and planning controls;	P2	375	500	809	729	850	3,062
Strengthening institutional capacity at all levels;	P3	870	885	570	680	790	3,795
Enhancing marketing of Malawi's tourism products;	P1	400	452	494	556	618	2,520
Providing infrastructure that is supportive to tourism development;	P1	415	527	645	748	755	3,090
Promoting the development of high-quality tourism facilities in designated areas	P1	855	1,025	1,170	1,300	1,430	5,780
Promoting eco-tourism	P2	285	342	380	423	470	1,900

				•			
Promoting participation of local investors in the tourism industry	P2	440	542	625	655	685	2,947
Adhere to best practices of sustainable and responsible tourism	P3	110	110	110	110	110	550
Total Tourism		3,750	4,383	4,602	5,201	5,708	23,644
Total Energy, Industrial Development, Mining and Tourism		94,340	103,141	97,881	97,799	95,749	488,910
3.0 Transport Infrastructure							
3.1 Road Infrastructure							
Ensuring comprehensive and coordinated planning of road and other modes of Transport	P1	575	297	221	216	414	1,723
Enhancing Public Private Partnerships in the transport system	P1	215	157	155	192	255	974
Enhancing axle load control	P1	190	200	160	170	180	006
Providing adequate network of roads based on appropriate standards	P1	30,392	28,368	25,938	28,367	30,217	143,282
Enhancing routine road maintenance and upgrading	P1	829	793	096	637	580	3,648
Building technical and institutional capacity at all levels	P2	426	151	152	142	277	1,148
Promoting competition in the construction industry	P2	550	850	647	445	545	3,037
Improving management of road network throughout the country	P1	7,683	7,947	10,169	10,329	8,975	45,103

Promoting high road safety standards and traffic management	P1	118	139	146	154	161	718
Total Road Transport		40,827	38,902	38,548	40,652	41,604	200,533
3.2 Rail Transport							
Rehabilitating and expanding the railway line and related infrastructure	P1	831	1,074	1,220	1,179	905	5,209
Creating linkages to ports, industrial sites and regional and international markets	P1	316	319	290	267	265	1,457
Promoting railway safety and environmental protection	P1	549	756	298	495	390	2,789
Improving operational efficiency and commercial viability of the existing railway infrastructure and levels of service	P1	294	477	551	575	528	2,425
Total Rail Transport		1,990	2,626	2,659	2,516	2,088	11,880
3.3 Inland Water Transport Infrastructure							
Developing an efficient and productive maritime transport system	P1	840	858	906	893	870	4,367
Promoting Public Private Partnerships in the industry	P2	35	37	3331	30		166
Improving port infrastructure	P1	915	1,718	1,592	1,526	1,430	7,181
Opening up navigable rivers	P1	880	1,360	1,541	1,685	1,430	968'9
Promoting affordable and safe water transport system	P1	137	207	253	199	84	088
Total Inland Water transport		2,807	4,180	4,325	4,334	3,844	19,490

Total Transport Infrastructure		45,624	45,708	45,532	47,502	47,536	231,902
4.0 Education Science and Technology				•	•		
4.1 Education							
4.1 Basic Education (Pre-primary and primary education)	ucation)			•			
Accelerating rehabilitation of existing learning institutions and construction of additional school infrastructure;	P1	32,927	42,495	56,398	81,694	31,420	244,934
Scaling up school feeding program	P2	3,444	4,418	5,452	6,531	7,717	27,562
Scaling up school health and nutrition, and HIV/AIDS programmes	P2	1,134	1,375	1,634	1,865	2,072	8,080
Scaling Up of child friendly schools programmes;	P2	6	6	101	11		50
Providing a conducive learning and teaching environment for girls	P1	317	377	451	484	520	2,149
Providing a conducive learning and teaching environment for students with special education needs	P1	509	703	789	846	907	3,754
Strengthening coordination and the provision of ECD; CBE and adult literacy	P2	1,381	1,479	1,587	1,700	1,823	7,970
Promoting the role of private sector and private financing in the education system;	P1	22	22	2527	28		124
Promote Public Private Partnership in the provision of education infrastructure and services	P1	6	6	101	11		50
Increasing Number of girls opting for mathematics and science subjects at all levels	P3	5	5	9	9	7	29

	,			t			
Training, recruiting and retaining teaching staff;	P1	10,617	6,028	7,634	11,813	7,430	43,522
Providing adequate and relevant teaching and learning materials	P1	9,552	9,862	10,210	10,562	10,875	51,061
Introducing standardized testing to measure and monitor quality of learning and teaching;	P3	3,539	3,794	4,067	4,360	4,674	20,434
Reviewing and reforming school and training college curricula to address national needs at all levels;	P3	85	54	5963	89		329
Promoting systematic and regular inspection of all learning institutions,	P1	430	462	494	530	568	2,484
Decentralizing the management and financing of the education system;	P1	1,589	1,703	1,827	1,959	2,099	9,177
Total Basic Education		62,269	72,795	90,653	122,462	70,230	421,709
4.1.2 Secondary Education (Lower and Upper Secondary education)	ondary edu	cation)					
Accelerating rehabilitation of existing learning institutions and construction of additional school infrastructure at all levels;	P1	5,290	5,350	5,731	5,894	6,188	28,453
Scaling up School Health and Nutrition, and HIV/AIDS programs	P2	29	79	94	128	177	545
Scaling Up of child friendly schools programmes;	P2	27	29	3134	35		156
Providing a conducive learning environment for girls including boarding facilities	P1	247	271	325	348	375	1,566
Providing a conducive environment for students with special needs	P1	753	929	1,013	1,086	1,165	4,946

Promoting the role of private sector and private financing in the education system	P1	875	1,374	159	879	1,476	4,763
Promoting Public Private Partnership in the provision of education infrastructure and services	P1	27	28	3033	35		153
Increasing Number of girls opting for mathematics and science subjects at all levels	P3	12	13	1415	16		70
Train and recruit additional teaching staff;	P1	1,909	2,368	3,087	4,151	4,823	16,338
Reviewing and reforming secondary school curricula to address national needs	P3	299	13	1416	17		359
Providing adequate and relevant teaching and learning materials	P1	5,135	6,368	8,628	12,496	18,154	50,781
Promoting systematic and regular inspection of secondary schools	P1	149	161	171	183	194	858
Decentralizing the management and financing of the education system	P1	1,869	1,934	2,001	2,146	2,300	10,250
Total Secondary Education		16,659	18,917	21,298	27,409	34,955	119,238
4.1.3 Tertiary and Vocational Education							
Accelerating rehabilitation of existing learning institutions and construction of additional infrastructure at all levels	P1	10,997	10,852	9,940	10,485	10,854	53,128
Establishing new universities and colleges	P1	7,903	9,136	10,612	11,415	12,429	51,495
Scaling up School Health and Nutrition, and HIV/AIDS programs	P2	15	15	1619	19		84
Scaling Up of child friendly schools programmes;	P2	5	9	9	7	7	31

Providing a conducive environment for girls including boarding facilities	P1	3	3	3	3	4	16
Providing a conducive environment for students with special needs	P1	1,532	1,859	2,261	2,931	4,067	12,650
Promoting the role of private sector and private financing in the education system	P2	21	21	2325	26		116
Promote Public Private Partnership in the provision of education infrastructure and services	P2	9	7	7	7	8	35
Increasing Number of girls opting for mathematics and science subjects at all levels	P3	6	6	101	111		50
Training and recruiting additional teaching staff;	P1	3,136	3,404	3,875	4,225	4,401	19,041
Providing adequate and relevant teaching and learning materials	P1	717	777	1,271	926	666	4,740
Reviewing and reforming College curricula to address national needs	P3	36	38	4144	48		207
Promoting systematic and regular inspection of colleges	P1	185	202	212	227	244	1,070
Decentralizing the management and financing of the education system	P1	239	285	341	365	391	1,621
Total Tertiary Education		24,804	26,614	28,618	30,740	33,508	144,284
Total Education		107,032	118,326	140,569	180,611	138,693	685,231
4.2 Science and Technology							
Promoting adoption, transfer and utilization of beneficial technologies	P1.	395	434	478	525	578	2,410

Promoting prioritized, focused and multi-disciplinary research and development	P2.	1,791	1,969	2,165	2,381	2,619	10,926
Mainstreaming research, science and technology development across all sectors	P2	100	110	121	133	146	610
Enhancing linkages between research, science and technology institutions and users	P3	167	184	202	222	245	1,020
Strengthening institutional and regulatory framework including protection of intellectual property rights	P1	1,089	1,199	1,310	1,426	1,565	6,589
Promoting IEC and knowledge management in research, science and technology development	P2	200	220	242	266	293	1,221
Promoting public-private partnerships in generating and disseminating beneficial technologies	P2	161	177	194	213	235	086
Improving scientific and technological infrastructure for research and development and innovation	P3	250	275	303	333	366	1,527
Total Science and Technology		4,153	4,568	5,015	5,500	6,047	25,282
Total Education Science and Technolo gy		111,185	122,894	145,584	186,111	144,740	710,513
5.0 Public Health, Sanitation, Malaria and HIV and AIDS Management	I AIDS Mai	nagement		•			
5.1 Public Health							
Improving availability of essential drugs and medical supplies;	P2	291	485	477 44	4	48	1,345
Strengthening health support system;	P1	11,866	12,186	11,817	11,856	11,859	59,584

Improving the quality of diagnosis and treatment of communicable and non communicable diseases	P2	32,690	35,015	37,456	40,075	42,880	188,116
Promoting water and food safety	P1	7,824	8,410	8,996	9,577	10,249	45,056
Strengthening and promoting initiatives to improve prevention, diagnosis and treatment of emerging diseases such as cancer, and high blood pressure	P1	2,453	2,576	2,757	2,951	3,157	13,894
Strengthening availability and utilization of quality integrated family planning services	P1	469	465	497	531	569	2,531
Improving availability and access to quality integrated maternal and child care services	P1	15,572	16,057	16,717	17,469	18,309	84,124
Increasing geographical access to EHP services	P1	5,838	12,506	12,435	7,393	6,740	44,912
Increasing availability of health technologies for prevention, screening, diagnosis, treatment and rehabilitation	P2	11,495	11,754	11,345	11,397	11,391	57,382
Strengthening community health service delivery system	P2	3,591	4,360	4,331	3,895	3,793	19,970
Promoting health enhancing behaviour and life styles.	P1	134	135	129	68	96	583
Implementing integrated vector control management;	P1	33,484	36,776	40,395	44,371	48,740	203,766
Building human resource capacity at all levels	P2	27	25	2122	24		119
Exploring and implementing alternative health financing mechanisms	P2	333	366	372	398	426	1,895

Total Public Health		126,067	141,116	147,745	150,068	158,281	723,277
5.2 Sanitation							
Promoting utilization of improved sanitation facilities;	P2	689	737	789	844	904	3,963
Enhancing information, education and communication on sanitation and hygiene	P3	15	16	1718	20		98
Promoting adoption of safe hygiene practice	P2	14	15	1617	19		81
Providing improved sanitation facilities in schools, health care centres, community based child care centres, markets and all other public places	P1	133	55	2921	20		258
Promoting private sector participation in the provision of sanitation and hygiene services;	P2	15	10	1	1	1	28
Promoting research waste management;	P2	50	54	5761	99		288
Enhancing institutional capacity	P1	27	29	3133	36		156
Sanitation Subtotal		943	916	940	995	1,066	4,860
5.4 Malaria							
Scaling up the delivery of Indoor Residual Spraying (IRS) services to other high malaria transmission districts	P1	15,000	16,050	17,174	18,376	19,662	86,262
Promoting draining of mosquito breeding sites and larviciding;	P3	2	2	3	33	3	13
Scaling up distribution of Long Lasting Insecticide Nets (LLINs);	P1	31,659	34,824	38,305	42,134	46,345	193,267
Promoting directly observed treatment	P2	3,259	3,487	3,731	3,992	4,271	18,740

				•	•		
Developing capacity of community health workers in malaria case management	P2	10	10	1111	12		54
Increasing the number of health facilities providing parasitological diagnosis of malaria.	P1	45	48	5255	59		259
Malaria Subtotal		49,975	54,421	59,276	64,571	70,352	298,595
5.4 HIV and AIDS Management							
Promoting interventions that reduce HIV transmission	P1	3,536	3,846	3,195	2,707	2,503	15,787
Promoting HIV Testing and Counselling (HTC)	P2	1,134	1,194	1,221	1,251	1,300	6,100
Promoting Prevention of Mother-to-Child Transmission of HIV (PMTCT)	P1	1,046	1,083	1,036	854	098	4,879
Promoting HIV and AIDS advocacy and awareness campaigns.	P2	110	63	8363	09		379
Enhancing capacity of health care delivery system to manage HIV and related illnesses	P1	2,815	2,807	2,765	2,418	2,238	13,043
Promoting access to continuum of HIV treatment and care services	P1	1,325	1,773	1,825	2,004	2,260	9,187
Promoting access to quality Community Home Based Care (CHBC), palliative care and other support services	P2	351	382	388	334	327	1,782
Promoting support to PLHIVs, OVCs and affected individuals and households	P1	1,003	971	1,007	752	705	4,438
Promoting mainstreaming of HIV and AIDS	P2	209	192	185	140	138	864

Promoting effective coordination and management							
of the national HIV and AIDS response	P2	2,664	2,655	2,636	2,530	2,511	12,996
Promoting reintegration of eligible PLHIV into economic activities	P1	188	167	150	125	120	750
Promoting food and nutrition security among HIV and AIDS affected households	P1	999	691	636	593	623	3,209
Total HIV and AIDS Management		15,047	15,824	15,127	13,771	13,645	73,414
Total Public Health Sanitation Malaria, and HIV and AIDS Management		192,032	212,277	223,088	229,405	243,344	1,100,146
6.0 Integrated Rural Development							
Strengthening local institutional capacity: to be more responsive to the service needs of the rural Communities and also institutional capacity to be more responsive to the service needs of the most vulnerable rural households.	P1	1,390	835	1,682	1,852	2,036	7,795
Promote integrated implementation of the District Development Processes.	P2	266	292	324	355	390	1,627
Promoting the establishment of Rural Growth Centres and Satellite Model Villages.	P2	1,242	1,732	2,419	3,382	4,728	13,503
Promoting the provision of tools for rural industrialisation	P2	25	-	30	34	37	126
Total Integrated Rural Development		2,923	2,859	4,455	5,623	7,191	23,051

7.0 Green Belt Irrigation and Water Development							
7.1 Green Belt Irrigation							
Promote development of areas with irrigation potential	P1	46,200	55,440	62,370	68,607	94,500	327,117
Promote rehabilitation of irrigation infrastructure	P1	17,281	22,246	27,973	33,840	41,313	142,653
Enhancing information, education and communication on irrigation	P2	130	164	204	256	319	1,073
Enhancing technical and administrative capacities in irrigated agriculture	P1	84	104	128	157	200	673
